(1) Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

(1) Final to July 1970. See page 79 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. — Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 79 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	April 1972 Avril	March 1972 Mars	April 1971 Avril	March 1971 Mars	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	613.8	603.4	597.1	634.7	582.7	752.7	1,032.8
Beans, coffee — Grains de café	321.1	320.9	308.7	320.9	317.4	391.7	302.6
Copper, electrolytic — Cuivre électrolytique ...	490.6	490.6	494.1	475.5	492.5	541.6	483.6
Cotton, raw — Coton brut	328.0	322.9	278.5	284.0	292.1	282.0	276.3
Eggs — Oeufs	124.3	123.3	125.9	116.1	122.1	139.6	161.7
Fruits, fresh — Fruits frais	227.7	222.4	266.6	255.4	230.0	229.6	225.8
Grains — Céréales	185.3	184.1	198.0	200.3	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	263.8	238.2	169.2	154.0	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	324.9	324.9	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	439.0	447.9	377.0	380.0	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	148.5	151.5	143.1	144.7	180.8	261.6	221.9
Potatoes — Pommes de terre	173.3	187.3	182.6	177.8	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	106.1	107.9	123.0	118.6	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	265.0	265.0	295.2	309.3	284.2	328.9	250.0
Silver — Argent	399.2	394.8	451.9	435.4	405.6	478.1	497.5
Steers — Bouvillons	587.7	600.1	547.8	543.6	548.8	510.8	496.6
Sugar, raw — Sucre brut	249.8	283.4	181.0	184.1	178.7	160.9	144.1
Tin — Étain	346.8	343.4	328.8	323.7	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	151.9	150.8	146.8	143.7	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	166.3	164.4	134.8	134.7	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	400.3	400.3	344.7	333.6	357.6	341.0	326.1

(1) For explanation see page 86. - Pour de plus amples explications, voir la page 86.

(2) Includes oranges and orange juice, grapefruit, bananas, grapes, canned pineapple, raisins, tea and coffee. - Oranges et jus d'orange, pamplemousse, bananes, raisins, ananas en conserve, raisins secs, thé et café.

(3) Includes constant weighted food component. - Comprend l'élément alimentation à pondérations constantes.

(4) Includes television and radio. - Téléviseur et radio.

(5) Excludes houses, mortgage interest and property taxes. - Excluant les maisons, les intérêts hypothécaires et les taxes foncières.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items

TABEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies

	April 1972 Avril	March 1972 Mars	April 1971 Avril	March 1971 Mars	1971	1970	1969
Dairy products - Produits laitiers							
Milk, fresh - Lait frais	150.2	149.3	142.9	142.9	145.1	138.9	137.1
Milk, evaporated - Lait évaporé	131.3	131.1	116.9	113.6	119.6	112.5	112.9
Powdered skim milk - Poudre de lait écrémé	153.0	153.5	134.7	129.4	139.9	130.3	128.3
Butter, creamery, first grade - Beurre de crèmerie, 1 ^{re} qualité	108.7	108.8	101.8	101.8	104.0	102.3	103.0
Cheese, plain, processed - Fromage ordinaire fondu	148.7	149.2	129.5	128.1	133.4	130.3	127.9
Poultry and eggs - Volaille et oeufs							
Chicken, grade A evisc. - Poulet, qualité A, évis- céré	126.7	125.1	105.5	106.2	112.0	107.7	111.2
Turkey, grade A evisc. - Dinde, qualité A, éviscérée	103.7	101.6	96.5	96.6	95.8	99.1	101.6
Eggs, fresh, grade A large - Oeufs frais, qualité A gros	86.0	77.0	82.7	80.8	87.3	99.0	109.9
Eggs, fresh, grade A medium - Oeufs frais, qualité A moyens	86.7	78.4	82.7	81.1	86.8	98.6	114.1
Beef - Boeuf							
Sirloin steak - Bifteck de faux filet	150.4	149.3	137.7	137.0	143.4	139.7	139.3
Round steak - Bifteck dans la ronde	160.1	160.5	146.6	149.5	148.0	143.7	135.6
Prime rib roast(1) - Rôti de plat de côtes(1)	152.3	149.8	135.9	137.4	139.9	134.4	133.5
Blade roast(2) - Rôti de haut-côté(2)	149.9	148.2	135.6	134.4	133.1	133.5	131.8
Stewing beef - Boeuf pour ragoût	158.3	157.3	145.8	144.6	145.9	142.1	138.3
Hamburg - Boeuf haché	164.2	164.4	145.8	145.6	148.5	144.8	138.8
Liver, sliced - Foie en tranches	130.7	125.3	118.8	118.8	119.1	132.3	115.3
Pork - Porc							
Rib chops, fresh - Côtelettes fraîches	142.4	143.5	114.9	117.6	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh - Rôti dans 1'épaule, soc de Boston, frais	123.3	126.4	98.7	102.9	102.4	120.5	129.9
Sausage, pure pork - Saucisse pur porc	128.9	126.4	119.2	120.4	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off - Bacon, flanc, de fantaisie, en tranches, sans couenne	90.2	90.0	76.8	78.9	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) - Jambon fumé, désossé(3)	132.2	136.7	115.0	113.6	115.4	135.2	138.4
Other meats - Autres viandes							
Lamb, leg roast - Agneau, gigot	119.3	120.0	113.0	111.1	113.7	114.8	109.1
Veal, loin chops, rib end - Veau, côtelettes, bout de côte	185.0	177.7	163.2	165.8	165.0	162.6	151.5
Wieners or frankfurters - Saucisses de Francfort ...	126.7	124.7	118.1	117.5	119.0	121.5	120.1
Meat loaf, canned, mainly pork - Pain de viande, en conservé, principalement de porc	122.0	122.3	124.5	123.6	123.0	130.7	125.0
Fish - Poisson							
Cod filets, frozen(5) - Filets de morue, conge- lés(5)	193.1	186.9	149.9	148.9	160.6	143.3	135.4
Salmon, canned, fancy pink - Saumon, en boîte, de fantaisie, rose	146.5	147.4	140.0	140.0	143.0	144.1	129.9
Fats and oils - Huiles et corps gras							
Margarine	111.6	112.2	117.2	115.8	114.8	112.1	105.5
Lard, pure - Saindoux pur	119.2	117.7	110.6	110.3	111.4	118.7	103.6
Shortening	122.4	120.9	118.0	116.2	118.7	114.1	109.4
Salad dressing - Vinaigrette	109.4	110.5	104.2	104.2	105.4	104.7	102.7
Cereals and bakery products - Céréales et produits de la boulangerie							
Flour, white, all purpose - Farine blanche, tout usage	135.8	135.8	131.2	131.0	131.3	133.5	134.3
Corn flakes - Flocons de maïs	122.8	122.8	115.5	115.1	119.6	117.4	116.2(7)
Macaroni - Macaronis secs	126.8	127.4	123.3	125.1	126.0	126.4	119.4
Cake mix, white - Mélange à gâteaux, blanc	125.7	123.5	115.0	115.7	118.5	122.1	123.5
Bread, plain, white, wrapped, sliced - Pain blanc uni, enveloppé, coupé	133.1	133.3	129.8	129.6	130.5	125.5	123.8
Soda crackers - Craquelins	119.7	118.7	111.1	111.1	113.1	117.9	116.3
Sugar and sweets - Sucre							
Sugar, granulated - Sucre cristallisé	161.5	163.5	128.8	128.3	126.9	117.2	113.0
Jam, strawberry(4) - Confiture de fraises(4)	122.9	120.7	121.8	122.0	122.7	126.4	120.8
Honey, No. 1, white - Miel n° 1, blanc	153.1	149.0	125.2	124.7	127.0	127.8	125.4

See footnote(s) at end of table. - Voir renvoi(s) à la fin du tableau.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items - Concluded

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies - fin

	April 1972 Avril	March 1972 Mars	April 1971 Avril	March 1971 Mars	1971	1970	1969
Fruits							
Oranges, Californian, medium size (138) - Oranges de Californie, moyennes (138)	102.6	101.6	115.4	112.8	111.9	102.5	100.5
Grapefruit, white, 48's - Pamplemousses blancs, 48	133.0	135.8	133.9	123.9	154.8	140.9	122.3
Bananas, yellow - Bananes jaunes	87.4	77.8	77.0	79.3	76.2	85.7	90.7
Apples, volume seller - Pommes du type le plus vendu	121.4	113.2	118.2	107.3	118.8	112.8	128.0
Strawberries, frozen, fancy - Fraises congelées de fantaisie	119.8	122.1	120.6	120.5	121.6	127.6	122.9
Orange juice, conc., frozen, fancy - Jus d'orange concentré et congelé, de fantaisie	106.4	106.9	94.3	92.5	99.3	101.1	106.9
Apple juice, choice - Jus de pomme de choix	105.4	104.6	100.1	100.5	101.4	107.6	113.0(8)
Orange juice, unsweetened - Jus d'orange non sucré	115.8	115.0	105.5	104.2	108.9	108.6	109.5
Pears, canned, choice - Poires en conserve de choix	124.3	124.2	119.3	119.2	120.7	123.7	121.4
Peaches, canned, choice, halves - Pêches en conserve, de choix, moitiés	139.6	140.1	132.7	133.3	135.5	139.0	140.4
Pineapple, Hawaiian, sliced - Ananas de Hawaii, en tranches	95.9	96.2	96.4	95.8	96.1	100.2	99.8
Raisins, Californian and Australian - Raisins secs de Californie et d'Australie	148.6	149.2	150.1	150.0	150.2	153.0	149.2
Vegetables - Légumes							
Potatoes, No. 1 table - Pommes de terre n° 1 de table	117.7	111.4	108.4	109.0	114.7	134.0	123.1
Onions, No. 1 cooking - Oignons n° 1 à cuire	117.9	121.5	111.0	112.4	128.5	157.4	136.4
Carrots - Carottes	126.9	131.8	106.0	97.6	123.4	109.1	108.8
Turnips, Canada No. 1 - Navet canadien n° 1	133.1	125.4	116.8	117.1	125.1	171.0	141.8
Cabbage - Chou	175.8	190.5	178.5	170.6	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	175.5	147.5	202.5	175.8	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	142.1	210.5	133.3	124.9	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	147.9	163.2	157.7	153.7	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	120.6	121.0	117.6	117.7	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	105.2	104.9	101.3	101.1	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	131.0	131.5	126.8	126.7	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	121.9	124.3	113.7	113.7	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	121.1	119.8	117.9	120.0	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	132.2	131.9	123.2	123.1	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	133.7	133.8	129.6	129.0	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	100.0	100.4	99.3	98.7	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie	105.3	106.5	97.6	97.4	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	103.2	103.2	99.8	99.1	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	126.5	126.7	133.5	133.8	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	112.7	112.7	112.7	112.0	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	122.5	124.0	111.5	113.2	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	132.6	133.1	136.3	137.2	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés	132.9	131.9	127.2	124.5	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	125.9	128.3	120.6	121.4	121.5	118.0	117.1

(1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.

(2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.

(3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.

(4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.

(5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.

(6) 1965=100. - 100 en 1965.

(7) 1963=100. - 100 en 1963.

(8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. - Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

- 1) For explanation see page 86. — Pour de plus amples explications, voir la page 86.
- 2) The shelter element of regional cities housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and homeownership costs. See also page 87. — Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir la page 87.

(3) Includes shelter and household operation. The shelter element of regional city housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and home-ownership costs. See also page 87. - Comprend le logement et l'entretien du ménage. Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir aussi la page 87.

(1) For detailed explanation, see page 88. Pour de plus amples explications, voir la page 88.

TABLE 13. Inter-City Indexes of Retail Price Differentials for
Selected Groups of Commodities and Services

TABLERAU 13. Indices comparatifs des prix de détail par ville, pour
des groupes choisis de biens et de services.

The latest revised edition of this table appears as a special submission in the first pages of this month's issue. Comparisons between selected urban centers are now based on retail prices in effect during May 1971 rather than May 1969.

La version révisée la plus récente de ce tableau figure, en supplément, aux premières pages du numéro de ce mois. Les comparaisons entre certains centres urbains choisis sont maintenant basés sur les prix de détail en vigueur en mai 1971 au lieu de mai 1969.

Equipment - Matériel	106.6	92.5	97.9	104.3	100.0	100.4	96.4	97.6	95.4	99.0	95.7	91.8	91.8	95.4	98.8
Transmission lines - Total(6) - Lignes de transmission	94.4	95.7	97.0	98.9	100.0	100.9	102.3	102.7	108.5	113.0	118.7	121.9	127.5	136.5	141.1
Transformer stations - Total(6) - Postes de transformation	118.1	109.0	113.5	109.8	100.0	105.1	107.6	112.0	118.0	122.4	121.2	117.2	120.4	132.2	138.8
Structures and improvements - Installations et améliorations	105.6	101.3	102.6	103.3	100.0	102.6	108.9	112.9	124.0	131.0	127.2	123.5	131.3	137.4	139.9
Equipment - Matériel	132.6	118.4	123.2	115.7	100.0	105.9	107.3	111.9	117.4	120.4	115.1	106.7	106.1	119.4	125.5
Hydro-electric generating stations(7) - Centrales d'énergie hydro-électrique(7)					100.0	102.7	106.0	109.5	114.8	121.8	126.2	131.3	139.2	147.8	153.1

- (1) To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. - Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande.
- (2) The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. - Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957.
- (3) Major components for the provincial indexes were presented in the November 1970 issue of *Prices and Price Indexes*. - Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de *Prices and Price Indexes*.
- (4) Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. - On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents.
- (5) For further detailed explanation see *Prices and Price Indexes* - March 1971. - Pour plus de renseignements, voir *Prices and Price Indexes*. - mars 1971.
- (6) For further detailed explanation see occasional paper 62-526. - Pour plus de renseignements, voir le bulletin hors série No 62-526 au catalogue.
- (7) For further detailed explanation see occasional paper 62-533. - Pour plus de renseignements, voir le bulletin hors série No 62-533 au catalogue.

Industrial Price Indexes

Indices des prix industriels

Industry Selling Price Indexes (1961=100)

Indices des prix de vente dans l'industrie (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

General Wholesale Index (1935-39=100)

Indice général des prix de gros (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte des transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Farm Input Price Indexes (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Canadian Farm Products Price Index (1935-39=100)

Wheat prices used in the index are buying prices from the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

Indices de prix des entrées dans l'agriculture (1961=100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère nos 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

- (1) Used in original indexes from August 1969 to July 1970. — Utilisé dans les premiers indices d'août 1969 jusqu'en juillet 1970.
 (2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
 (3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
 (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators(1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

(1) National Income and Expenditure Division, Statistics Canada.

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle non résidentielle sont publiés ici pour faciliter la tâche des utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à fin. Si l'on compare ces séries avec les facteurs de dégonflement(1) des prix implicites (qui donnent une estimation de variation du prix pour la production de l'industrie), obtenue en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évaluation des prix des indices à pondération fixe des entrées.

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can combine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either correct expenditure data of machinery and equipment or price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100. Most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were fully supplied by major purchasers.

Conceptually purchasers' prices should be utilized for such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for freight, exchange and federal sales tax.

Foreign prices utilized in the index are either from the Bureau of Labour Statistics commodity indexes or from Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which include adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic version of the indexes to a 1961 time base does not reflect their percentage movements as compared to the

Industry Selling Price Indexes 1956-1968 Cat. 62-528.

The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, a cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002, catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectuées comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix de travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'œuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer de plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural union work for transmission lines.

Construction has been defined as new construction, major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. Components of cost relating to distribution and transmission facilities encompass such items as poles, wire, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating as such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and rights-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities. The majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers producing electricity for their own use and who may sell electricity have been excluded from the cost index.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se reporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the common and mining stock indexes are Thursday's closing quotations as reported in the Globe and Mail and the Montreal Gazette. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The price reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériel et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêt pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont le cours de fermeture de la Bourse du jeudi indiqués dans le Globe and Mail et dans la Montreal Gazette. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons textiles et habillement, pâtes et papiers, et huiles (sous désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Inventors Index and Preferred Index, see Prices and Price Indexes for February 1972.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1972.

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

Retail Price Indexes

Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and time base revisions are available in the occasional paper "The Consumer Price Index for Canada 1949=100 - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

Consumer Price Indexes for Regional Cities (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Also, city indexes are not as comprehensive in price content as the Canada consumer price index and may underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

Indices des prix de détail

Indice des prix à la consommation au Canada (1961=100)

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi qu'

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

L'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de la semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de la semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week B figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 (90.91/80.00x100.0). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages (100.00/80.00x100.0).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. Major omissions are shelter (both rented and owned), domestic utilities (fuel, light and water), and restaurant meals. While recognizing the importance of shelter differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 (90.91/80.00x100.0). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation effective de 13.6 % (100.0/80.00x100.0).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation d'un groupe changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général

valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1969, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in these comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1969; ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968 et novembre 1969 de Prices and Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.2 % higher in May to 126.5 from the April index of 126.3. It was 4.4 % higher than the May 1971 index of 121.2. Of the 101 industry indexes included in the Total, 45 were higher, 20 declined and 36 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the foods and beverages group, mainly in response to higher prices recorded in the distilleries, fish products, and slaughtering and meat packing industries. Advances also occurred in the wood products group reflecting price increases registered for the sawmills and planing mills, and veneer and plywood mills industries. Declines during the period were relatively insignificant.

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) a augmenté de 0.2 % en mai pour s'établir à 126.5 contre 126.3 en avril. Il était de 4.4 % supérieur à l'indice de mai 1971 (121.2). Sur les 101 indices des prix industriels qui composent le total, 45 indices ont augmenté, 20 ont baissé et 36 sont demeurés stationnaires.

En fonction de la contribution relative au changement global de l'ensemble des indices dans les industries manufacturières, les changements les plus remarquables survenus en mai ont été des augmentations enregistrées dans le groupe des aliments et des boissons, dues principalement à la hausse des prix dans l'industrie des distilleries, des produits de la pêche, et dans les abattoirs et les usines de conditionnement de la viande. Il y a eu également des augmentations dans le groupe des produits du bois, dues à l'accroissement des prix dans l'industrie des scieries et les ateliers de rabotage, et dans l'industrie des fabriques de placages et de contre-plaqués. Les diminutions au cours du mois ont été relativement peu importantes.

April to May Changes in Industry Indexes

Variations de avril à mai des indices dans l'industrie

	May/April - Mai/Avril			Major group indexes Indice des groupes principaux		
	Number of industries Nombre d'industries			May 1972	April 1972	May 1971

General Wholesale Index (1935-39=100)

The general wholesale index moved up 0.6 % in May to 305.3 from the April index of 303.4. It was 5.9 % higher than the May 1971 index of 288.3. Seven major group indexes were higher, while one declined.

The animal products group index rose 2.2 % in May to 369.0 from 361.2 mainly on higher prices for livestock, fishery products and leather. Higher prices for raw cotton and raw wool were chiefly responsible for an increase of 0.8 % to 277.6 from 275.5 in the textile products group index. Less significant advances were registered for five major group indexes; non-metallic mineral products to 232.5 from 231.6, non-ferrous metal products to 265.5 from 264.6, vegetable products to 239.0 from 238.6, wood products to 422.3 from 422.0, and iron products to 323.0 from 322.7.

The chemical products major group moved 0.2 % lower in May to 244.4 from the revised April index of 245.0.

The following table shows some of the more noteworthy changes:

Commodity group and sub-group Groupe et sous-groupe de produits	Percentage changes Variations en pourcentage		
	May - 1972 - Mai Apr. - 1972 - Avr.	May - 1971 - Mai Apr. - 1971 - Avr.	May - 1972 - Mai May - 1971 - Mai
Animal products group - Produits d'origine animale			
Livestock - Bétail	+ 2.2	- 0.2	+ 15.6
Hides and skins - Cuirs et peaux vertes	+ 6.5	+ 2.0	+ 21.6
Fishery products - Produits de la pêche	+ 3.8	- 5.5	+ 71.2
Leather - Cuir	+ 2.7	- 3.9	+ 13.8
Eggs - Oeufs	+ 2.1	-	+ 30.1
	- 2.2	- 0.7	- 2.7
Textile products group - Produits textiles			
Wool, raw domestic - Laine brute indigène	+ 0.8	+ 0.2	+ 6.6
Cotton, raw - Coton brut	+ 10.7	- 5.7	+ 21.4
Miscellaneous cotton products - Produits divers de coton	+ 4.2	+ 0.9	+ 22.0
	+ 2.8	-	+ 2.9
Non-ferrous metal products group - Produits métalliques non ferreux			
Zinc, domestic - Zinc canadien	+ 0.3	- 0.9	+ 1.2
Solder - Soudure	+ 5.5	-	+ 22.6
Lead, electrolytic - Plomb électrolytique	+ 5.4	-	+ 11.4
	+ 3.2	-	+ 18.5

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros s'est accru de 0.6 % en mai pour atteindre 305.3, contre 303.4 en avril. Il dépassait de 5.9 % l'indice de mai 1971 qui était de (288.3). Parmi les groupes principaux, sept indices ont augmenté et un a diminué.

L'indice du groupe des produits d'origine animale a progressé de 2.2 % passant de 361.2 en avril à 369.0 en mai, principalement en raison d'une hausse du prix du bétail, des produits de la pêche et du cuir. L'augmentation du prix du coton brut et de la laine brute a été la principale cause d'accroissement de 0.8 % de l'indice des textiles, qui est passé de 275.5 à 277.6. Les augmentations ont été moins considérables dans le cas des indices des cinq groupes principaux; l'indice des produits minéraux non métalliques s'est élevé à 232.5 contre 231.6, celui des métaux non ferreux à 265.5 contre 264.6, celui des produits d'origine végétale à 239.0 contre 238.6, celui des produits du bois à 422.3 contre 422.0, et celui des produits du fer à 323.0 contre 322.7.

Le grand groupe des produits chimiques a diminué de 0.2 % en mai, son indice passant de 245.0 en avril (indice révisé) à 244.4 en mai.

On trouvera dans le tableau ci-dessous un aperçu des variations les plus importantes:

Security Price Indexes (1961=100)

The Investors Index of common stock prices edged 0.6 % over April to an all time high of 169.8 from 168.8. Within the three major groups, industrials rose 1.1 % from 170.7 to 172.6, utilities moved down 0.8 % to 154.9, and finance eased back 0.4 % to 179.4 from 180.2. Advances within the thirteen industrial sub-groups ranged from 12.3 % for textiles and clothing and 6.0 % for chemicals to 0.6 % and 0.7 % for non-metallic minerals and petroleum respectively. Increases showed in all other sub-groups except industrial mines, which declined 4.1 % to 125.0 from 130.3 in April. In utilities, losses predominated, gas distribution showing the greatest loss of 4.1 %, with transportation showing the only increase of 0.8 % to 296.1 from 293.8. The Finance index decline, resulted from Banks dropping 1.2 % from 213.0, whilst Investments and Loans gained 1.9 % to 131.2.

In the same period the index of mining stock prices rose 2.2 % to 117.5 as a result of an increase in Golds of 9.7 % to 117.2 from 106.8 at the same time as Base Metals fell 1.5 % to 118.7.

Of the two supplementary price indexes, Uraniums, primary oils and gas showed decreases of 0.3 % and 4.6 % respectively.

The Preferred Stock Index rose 0.3 % to 70.1 from 69.9 in April.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, advanced 1.3 % to 294.5 in May from the April index of 290.6. Prices were higher for twelve commodities, lower for seven and unchanged for eleven. Principal changes included increases for raw wool, spruce lumber, sisal, hogs, domestic zinc, raw rubber, steers, domestic lead, fir timber, beef hides and export wheat, while decreases were recorded for cottonseed oil, raw sugar, bleached sulphite pulp, linseed oil and tin.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 2.7 % to 284.0 in May from the April index of 276.5. An increase of 3.8 % to 398.8 from 384.3 in the animal products index reflected higher prices for lambs, hogs, raw wool, calves and steers on both Eastern and Western markets, and for poultry in the East. Lower prices were shown for eggs in the East and for fluid milk in the West. The field products index advanced 0.4 % to 169.2 from 168.6 on higher prices for wheat, corn and oats on the Eastern market. Lower prices were shown for hay on both markets and for rye, flax and potatoes in the West.

Indices des cours des valeurs mobilières (1961=100)

L'indice des cours des actions ordinaires a atteint le chiffre record de 169.8 en mai contre 168.8 en avril, soit un accroissement de 0.6 %. Au sein des trois grands groupes, les valeurs industrielles sont passées de 170.7 à 172.6 (+ 1.1 %), les services d'utilité publique sont tombés à 154.9 (- 0.8 %) et le groupe des finances est revenu à 179.4, contre 180.2 (- 0.4 %). Les gains enregistrés dans les treize sous-groupes des d'activités industrielles ont varié de 12.3 % dans le cas des textiles et de l'habillement et 6.0 % pour les produits chimiques, à 0.6 % et 0.7 % respectivement pour les minéraux non métalliques et le pétrole. Il y a eu accroissement dans toutes les autres sous-groupes, sauf dans le cas des mines industrielles dont l'indice est tombé de 130.3 en avril à 125.0 en mai, soit 4.1 % de moins. Dans le cas des services d'utilité publique les diminutions ont été en majorité; la distribution du gaz a enregistré la perte la plus sensible soit 4.1 %, et le groupe des transports a marqué la seule augmentation, de 0.8 %, son indice passant de 293.8 à 296.1. L'indice du groupe des finances a diminué par suite d'une baisse de 1.2 % dans les banques depuis avril où l'indice était à (213.0), tandis que l'indice des investissements et prêts a marqué un gain de 1.9 % et a atteint 131.2.

Au cours de la même période, l'indice des prix des titres miniers a augmenté de 2.2 % et a atteint 117.5 par suite d'un accroissement de 9.7 % de l'indice du prix de l'or qui est passé de 106.8 à 117.2 et d'une diminution de 1.5 %, de celui des métaux communs qui est tombé à 118.7.

Dans le cas des deux indices supplémentaires des prix, soit l'uranium et le pétrole et le gaz primaires, on signale une diminution de 0.3 % et de 4.6 % respectivement.

L'indice des actions privilégiées a marqué un gain de 0.3 % en passant de 69.9 en avril à 70.1 en mai.

Indice des prix de trente produits industriels (1935-39=100)

L'indice des prix de trente produits industriels, calculé sous forme de moyenne géométrique non pondérée, a progressé de 1.3 % passant de 290.6 en avril à 294.5 en mai. Les prix de douze produits ont augmenté, ceux de sept produits ont diminué et ceux des onze autres produits sont restés stationnaires. Les principaux changements comprennent une augmentation du prix de la laine brute, du bois d'épinette, du sisal, des porcs du zinc produit au Canada, du caoutchouc brut, des bouvillons, du plomb d'origine canadienne, du sapin, des peaux de boeuf, et du blé d'exportation, tandis que l'on observait une diminution du prix de l'huile de coton, du sucre brut, pâte au sulfite blanchie, de l'huile de lin et de l'étain.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a progressé de 2.7 %, passant de 276.5 en avril à 284.0 en mai. L'augmentation de 3.8 % de l'indice des produits d'origine animale, qui est passé de 384.3 à 398.8, est le résultat de l'augmentation des prix des agneaux, des porcs, de la laine brute, des veaux et des bouvillons sur les marchés de l'Est et de l'Ouest, et de la volaille sur les marchés de l'Est. Le prix des oeufs a diminué dans l'Est et celui du lait diquide a diminué dans l'Ouest. L'indice des produits de grande culture a augmenté de 0.4 %, passant de 168.6 à 169.2, en raison de la hausse du prix du blé, du maïs et de l'avoine sur les marchés l'Est. On a constaté une diminution des prix du foin sur les deux marchés et du seigle, du lin et des pommes de terre dans l'Ouest.

Consumer Price Movements

The Consumer Price Index for Canada (1961=100) rose 0.1 % to 138.3 in May from 138.2 in April. In the latest month the Food component fell 0.7 % but all other components registered increases. The Housing index rose 0.4 %, while the indexes for Health and Personal Care and for Recreation and Reading each advanced 0.7 %. Both the Clothing and the Tobacco and Alcohol components moved up 0.3 %, and a 0.2 % rise was recorded in the Transportation index. Between May 1971 and May 1972 the All-Items index advanced 4.2 %.

The Food index fell 0.7 % to 137.4 in May from 138.3 in April mainly because of price declines in Montreal and Toronto. In the latest month the price level of food consumed at home decreased by 0.8 %, contrasting with food eaten outside the home which rose by 0.7 %. Dairy, bakery and cereal products as well as some other foodstuffs were the main contributors to the decline in the average price of food at home. The bakery and cereal index moved down 1.0 % between April and May as special prices in Montreal and Toronto took effect on bread, cake mixes and a variety of other such products. In the latest month the price of butter, cheese, powdered and evaporated milk and ice cream also declined, but fluid milk edged up in price as higher quotations were registered in Vancouver and Winnipeg. Quits prices, on average, rose 2.9 % between April and May — an increase similar to the seasonal average but considerably less than that recorded between these two months last year. Though vegetable prices advanced 0.9 % in the latest month, their level stood 2.0 % below that of a year earlier. The meat, fish and poultry index moved up 0.3 % as pork prices rose by 1.0 % and poultry quotations advanced by 1.3 %; in contrast, beef prices evidenced a decline of 1.0 %. Since May 1971 the meat, fish and poultry index rose by almost 1 %, with pork and poultry prices increasing 1.9 % and 1.3 %, respectively and beef quotations up almost 8 %. Though egg prices rose 2.4 % in the latest month they stood 2.5 % below their level of a year previous. Among other food items, sugar prices continued their decline for the fourth consecutive month but still stood over 20 % above their May 1971 level. Some other foodstuffs which registered price decreases in the latest month, and were selling at prices lower than a year earlier, were ground and instant coffee and peanut butter. In the twelve months to May 1972 the Food index advanced by 5.6 % as did each of its two components, for food consumed at home and for restaurant meals.

The Housing index advanced 0.4 % to 142.2 in May from 141.6 in April was attributable to a 0.7 % increase in the shelter component, mainly because of higher new house prices and repair charges; rents rose only fractionally in the latest month. No change was recorded in the household operation component as furniture prices rose 0.2 % and quotations for floor coverings, on average, dipped 0.4 %. Lower prices due to sales were also recorded for a number of household appliances including light bulbs, toilet paper, floor coverings, and detergent. Amongst household services items, telephone rates increased in St. John's. In May 1972, the Housing index stood 4.5 % above its level of May 1971.

The Clothing index rose 0.3 % to 131.5 in May from 131.1 in April because of increases in the men's wear (0.5 %), footwear (0.6 %) and children's wear (0.2 %) components. Among men's wear items, higher prices were recorded for suits, topcoats, trousers and sweaters only due to the removal of earlier sale prices. The wear advance resulted from higher quotations for men's and women's and children's shoes in a number of

Mouvements des prix à la consommation

L'indice des prix à la consommation au Canada (1961=100) est passé de 138.2 en avril à 138.3 en mai, ce qui représente une augmentation de 0.1 %. Le mois dernier, l'indice de l'alimentation a régressé de 0.7 % tandis que tous les autres éléments ont enregistré des augmentations. L'indice de l'habitation est monté de 0.4 % tandis que les indices des soins personnels et de santé, de la lecture et des loisirs se sont accrus chacun de 0.7 %. Les éléments de l'habillement, du tabac et des alcools ont progressé de 0.3 %, tandis que l'indice des transports s'est accru de 0.2 %. Entre mai 1971 et mai 1972, l'indice général a marqué une avance de 4.2 %.

L'indice de l'alimentation a diminué de 0.7 % passant de 138.3 en avril à 137.4 en mai, diminution attribuable en grande partie à une baisse des prix à Montréal et à Toronto. Le mois dernier, le prix des aliments consommés au foyer a diminué de 0.8 %; par contre les aliments consommés à l'extérieur du foyer ont subi une hausse de 0.7 %. Les produits laitiers, céréaliers et de boulangerie, ainsi que certains autres produits alimentaires, ont le plus contribué à faire baisser la moyenne des prix des aliments consommés au foyer. L'indice des produits de la boulangerie et des céréales a régressé de 1.0 % d'avril à mai, par suite de l'entrée en vigueur à Montréal et à Toronto de prix spéciaux pour le pain, les mélanges à gâteaux et divers autres produits du même genre. Au cours du mois dernier, le prix du beurre, du fromage, du lait en poudre et évaporé, et de la crème glacée a également diminué, mais le lait liquide a légèrement augmenté en raison d'une hausse des cours enregistrée à Vancouver et à Winnipeg. Les prix des fruits se sont accrus en moyenne de 2.9 % d'avril à mai, augmentation qui correspond à la moyenne saisonnière mais reste bien inférieure à celle enregistrée entre ces deux mois l'année dernière. Bien que le prix des légumes ait augmenté de 0.9 % le mois dernier, il est encore inférieur de 2.0 % à ce qu'il était un an plus tôt. L'indice de la viande, du poisson et de la volaille a progressé de 0.3 %, du fait d'une hausse de prix de 1.0 % de la viande de porc et de 1.3 % de la volaille; par contre, le prix du bœuf a diminué de 1.0 %. Depuis mai 1971, l'indice de la viande, du poisson et de la volaille s'est accru de près de 12 %, les prix du porc et de la volaille augmentant respectivement de 19 % et de 18 %, le prix du bœuf augmentant de près de 8 %. Le prix des oeufs a augmenté de 2.4 % le mois dernier, mais il est encore inférieur de 2.5 % à ce qu'il était un an plus tôt. Parmi les autres denrées alimentaires, le sucre a continué de diminuer de prix pour le quatrième mois consécutif mais son prix dépasse encore de 20 % celui de mai 1971. Certains autres produits alimentaires, à savoir le café moulu et instantané et le beurre d'arachides ont vu leur prix diminuer le mois dernier et se vendaient à des prix inférieurs à ceux de l'année précédente. Au cours des douze mois précédant mai 1972, l'indice de l'alimentation a progressé de 5.6 %, tout comme chacun de ses deux éléments, soit les aliments consommés au foyer et les repas pris au restaurant.

L'indice de l'habitation a marqué un gain de 0.4 % en passant de 141.6 en avril à 142.2 en mai par suite d'une augmentation de 0.7 % de l'élément logement, attribuable en grande partie à la hausse du prix des maisons neuves et des frais de réparations les loyers n'ont augmenté que légèrement le mois dernier. Aucune variation n'a été enregistrée dans le cas des frais d'entretien du ménage parce que le prix des meubles a augmenté de 0.2 % et que celui des revêtements de sol a diminué de moyenne de 0.4 %. Des réductions de prix attribuables à des soldes ont également été enregistrées sur certaines fournitures d'entretien ménage, y compris les ampoules, le papier hygiénique, la cire à parquet et le détergent. En ce qui concerne les services relevant de l'entretien du ménage, les tarifs téléphoniques ont augmenté à Saint-Jean (T.N.). En mai 1972, l'indice de l'habitation était supérieur de 4.5 % à celui de mai 1971.

L'indice de l'habillement a avancé de 0.3 % et est passé entre avril et mai de 131.1 à 131.5 par suite d'une hausse du prix des vêtements pour hommes (0.5 %), des chaussures (0.6 %) et des vêtements pour enfants (0.2 %). Pour ce qui est des articles qui composent les vêtements pour hommes, il y a eu des hausses de prix sur les complets, les pardessus, les pantalons et les chandails, en partie du fait du retrait des prix de solde affichés antérieurement. L'indice des chaussu-

cities; higher prices for boys' slacks and sport shirts, and girls' cotton dresses were the main cause of the rise in the children's wear component. No change was recorded in the women's wear index as reduced spring coat and cotton dress quotations, due to sales, offset higher prices for underwear and some other items. Between May 1971 and May 1972, the Clothing index rose 2.5 %.

The Transportation index rose 0.2 % to 133.2 in May from 133.0 in April. A 0.2 % increase in the automobile operation component was the result of slightly higher new car and gasoline prices, while the price level for local public transportation moved up by 0.8 % because of advances in Montreal and Toronto taxi fares. Between May 1971 and May 1972 the Transportation index rose 2.5 %.

The Health and Personal Care Index advanced 0.7 % to 149.0 in May from 148.0 in April mainly because of a 1.1 % increase in the personal care component; in contrast, health care edged up only 0.1 % as a result of higher prices for some pharmaceuticals. Chief contributors to an advance of 1.8 % in personal care services were higher men's haircut and women's hairdressing charges in a number of cities across the country. Toiletry items, on average, rose in price by 0.2 % as increased prices for toothpaste, face cream, and sanitary napkins outweighed specials on toilet soap, shaving cream and cleansing tissues. In the twelve months since May 1971, the Health and Personal Care index moved up by 4.9 %.

The Recreation and Reading index advanced 0.7 % to 139.2 in May from 138.3 in April because of a 0.8 % increase in the recreation element. Motion picture admission charges rose 3.3 % as a result of higher prices in a number of cities including Montreal, Toronto, and Vancouver, and prices of toys and games rose, on average, 1.2 % as advances were recorded in most cities. Camera film and processing charges, however, dipped 0.9 %. In May 1972, the Recreation and Reading index stood 2.7 % above its level of May 1971.

The Tobacco and Alcohol index rose 0.3 % to 132.5 in May from 132.1 in April mainly because of tax increases on tobacco products in Manitoba, though scattered price increases for cigarettes and cigarette tobacco were also recorded in other parts of the country. In the twelve months to May 1972, the Tobacco and Alcohol index increased 3.3 %.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. The services index advanced 0.7 % between April and May with higher prices for movie admission, men's haircuts, and women's hairdressing together with increased taxi fares. On the other hand, the total commodities index dipped 0.2 % because of the decline in food prices. The index for non-durables excluding food rose 0.2 % mainly as a result of higher prices for clothing, tobacco, toys and games, and durables edged up 0.1 % because of slightly higher new car and furniture prices.

res a progressé par suite d'une hausse du prix des souliers pour hommes, dames et enfants dans certaines villes; l'augmentation du prix des pantalons et des chemises sport pour garçons, et des robes de coton pour fillettes a le plus contribué à faire monter l'indice des vêtements pour enfants. Aucune variation n'a été enregistrée en ce qui concerne les vêtements pour dames, les réductions de prix sur les manteaux de printemps et les robes de coton à la suite de soldes ayant compensé l'augmentation du prix des sous-vêtements et de certains autres articles. Entre mai 1971 et mai 1972, l'indice de l'habillement a progressé de 2.5 %.

L'indice des transports a avancé de 0.2 %, passant de 133.0 en avril à 133.2 en mai. Une augmentation de 0.2 % à l'élément des frais de voiture est attribuable à une légère hausse du prix des voitures neuves et de l'essence; l'élément transport en commun local a cependant progressé de 0.8 % par suite de la hausse du prix des courses en taxi à Montréal et à Toronto. Entre mai 1971 et mai 1972, l'indice des transports a augmenté de 2.5 %.

L'indice des soins personnels et de santé s'est accru de 0.7 %, passant de 148.0 en avril à 149.0 en mai; cette progression est surtout attribuable à une augmentation de 1.1 % enregistrée à l'élément des soins personnels; par contre, l'élément des soins de santé n'a progressé que de très peu, soit de 0.1 %, par suite d'une hausse du prix de quelques produits pharmaceutiques. Une augmentation de 1.8 % enregistrée dans les services de soins personnels est attribuable à une hausse du prix des coupes de cheveux pour hommes et de la coiffure pour dames dans un certain nombre de villes au Canada. Le prix des articles de toilette a augmenté de 0.2 %, en moyenne, en effet les prix plus élevés de la pâte dentifrice, de la crème de beauté et des serviettes hygiéniques ont plus que contrebalancé les prix spéciaux offerts pour le savon de toilette, la crème à raser et le papier de démaquillage. Au cours des douze mois écoulés depuis mai 1971, l'indice des soins personnels et de santé a avancé de 4.9 %.

L'indice des loisirs et de la lecture a progressé de 0.7 % pour atteindre 139.2 en mai comparativement à 138.3 en avril en raison d'une augmentation de 0.8 % de l'élément des loisirs. Les billets de cinéma ont enregistré une avance de 3.3 % par suite d'une hausse de prix dans certaines villes, notamment à Montréal, à Toronto et à Vancouver. L'indice des jouets et des jeux a progressé en moyenne de 1.2 %, des augmentations ayant été enregistrées dans la plupart des villes. Le prix des pellicules photographiques et les frais de développement, par contre, ont régressé de 0.9 %. En mai, 1972, l'indice des loisirs et de la lecture était supérieur de 2.7 % au niveau en mai 1971.

L'indice des tabacs et alcools a avancé de 0.3 % pour se chiffrer à 132.5 en mai comparativement à 132.1 en avril, par suite surtout de la majoration de la taxe sur les produits du tabac au Manitoba, bien que des hausses du prix des cigarettes et du tabac à cigarette aient aussi été enregistrées dans d'autres régions du Canada. Au cours des douze mois qui précèdent mai 1972, l'indice des tabacs et alcools a progressé de 3.3 %.

Lorsqu'ils sont classés par biens et services, les éléments de l'indice des prix font ressortir un autre aspect de la variation des prix. L'indice des services a avancé de 0.7 % entre avril et mai en raison de la hausse des prix des billets de cinéma, des coupes de cheveux pour hommes et de la coiffure pour dames, ainsi que de l'augmentation du prix des courses en taxi. L'indice de l'ensemble des biens, pour sa part, a diminué de 0.2 % à cause d'une hausse du prix des denrées alimentaires. L'indice des biens non durables, à l'exception des aliments, a progressé de 0.2 %, en raison surtout de la hausse du prix des vêtements, du tabac, des jouets et des jeux; l'indice des biens durables a progressé d'à peine 0.1 % par suite d'une légère hausse du prix des voitures neuves et des meubles.

TABLE 1. Summary of Current Price Indexes

TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	May 1972 — Mai	April 1972 — Avril	May 1971 — Mai	April 1971 — Avril	May 1972 April 1972 — Mai 1972 Avril 1972	May 1971 April 1971 — Mai 1971 Avril 1971	May 1972 May 1971 — Mai 1972 Mai 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:	126.5	126.3	121.2	121.2	+ 0.2	—	+ 4.4
General wholesale index — (1935-39=100)(2) — L'indice général de gros							
Vegetable products — Substances végétales	305.3	303.4	288.3	288.4	+ 0.6	—	+ 5.9
Animal products — Produits animaux	239.0	238.6	237.0	239.9	+ 0.2	+ 1.2	+ 0.8
Textile products — Produits textiles	369.0	361.2	319.3	320.1	+ 2.2	+ 0.2	+ 15.6
Wood products — Produits du bois	277.6	275.5	260.4	259.9	+ 0.8	+ 0.2	+ 6.6
Iron products — Produits du fer	422.3	422.0	392.3	386.2	+ 0.1	+ 1.6	+ 7.6
Non-ferrous metals — Métaux non ferreux	323.0	322.7	314.8	314.5	+ 0.1	+ 0.1	+ 2.6
Non-metallic minerals — Minéraux non métalliques	265.5	264.6	262.3	264.8	+ 0.3	+ 0.9	+ 1.2
Chemical products — Produits chimiques	232.5	231.6	225.5	225.3	+ 0.4	+ 0.4	+ 3.1
	244.4	245.0 ^a	238.0	238.9	— 0.2	— 0.4	+ 2.7
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	284.0	276.5	269.1	265.8	+ 2.7	+ 1.2	(3)
Western — Total — De l'ouest	316.0	307.2	292.1	288.6	+ 2.9	+ 1.2	+ 8.2
Field — Cultures	232.0	245.7	246.1	243.0	+ 2.6	+ 1.3	(3)
Animal — Animaux	169.2	168.6	188.2	185.4	+ 0.4	+ 1.5	(3)
	398.8	384.3	349.9	346.2	+ 3.8	+ 1.1	+ 14.0
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	294.5	290.6	266.1	267.6	+ 1.3	— 0.6	+ 10.7
Residential building materials — (1961=100) — Matériaux de construction résidentielle	156.6	155.2	142.6	141.9	+ 0.9	+ 0.5	+ 9.8
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	141.1	140.3	132.2	132.8	+ 0.6	+ 0.3	+ 5.9
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	138.3	138.2	132.7	132.2	+ 0.1	+ 0.4	+ 4.2
Food — Alimentation	137.4	138.3	130.1	129.1	— 0.7	+ 0.8	+ 5.6
Housing — Habitation	142.2	141.6	136.1	136.0	+ 0.4	+ 0.1	+ 4.5
Clothing — Habillement	131.5	131.1	128.3	127.9	+ 0.3	+ 0.3	+ 2.5
Transportation — Transports	133.2	133.0	129.9	129.4	+ 0.2	+ 0.4	+ 2.5
Health and personal care — Soins personnels et de santé	149.0	148.0	142.0	141.4	+ 0.7	+ 0.4	+ 4.9
Recreation and reading — Loisirs et lectures	139.2	138.3	135.6	135.3	+ 0.7	+ 0.2	+ 2.7
Tobacco and alcohol — Tabacs et alcools	132.5	132.1	128.3	127.6	+ 0.3	+ 0.5	+ 3.3
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	169.8	168.8	148.5	153.1	+ 0.6	— 3.0	+ 14.3
Industrials — Total — Industriels	172.6	170.7	151.6	157.1	+ 1.1	— 3.5	+ 13.9
Industrial mines — Mines industrielles	125.0	130.3	142.4	156.9	— 4.1	— 9.2	— 12.2
Foods — Aliments	140.8	133.7	133.8	140.1	+ 5.3	— 4.5	+ 5.2
Beverages — Boissons gazeuses	230.4	223.1	188.4	189.7	+ 3.3	— 0.7	+ 22.3
Textiles and clothing — Textiles et vêtements	178.6	159.1	110.0	106.1	+ 12.3	+ 3.7	+ 62.4
Pulp and paper — Pâte et papier	99.5	95.4	91.8	99.8	+ 4.3	— 8.0	+ 8.4
Printing and publishing — Impression et édition	316.6	304.8	251.1	254.7	+ 3.9	— 1.4	+ 26.1
Primary metals — Métaux primaires	107.2	106.1	99.0	101.5	+ 1.0	— 2.5	+ 8.3
Metal fabricating — Fabrications des métaux	186.4	180.8	161.2	160.7	+ 3.1	+ 0.3	+ 15.6
Non-metallic minerals — Minéraux non métalliques	171.4	170.4	137.7	144.8	+ 0.6	— 4.9	+ 24.5
Petroleum — Pétrole	261.6	259.9	200.2	198.3	+ 0.7	+ 1.0	+ 30.7
Chemicals — Produits chimiques	113.2	106.8	86.2	91.6	+ 6.0	— 5.9	+ 31.3
Construction — Construction	103.6	98.1	63.0	62.0	+ 5.6	+ 1.6	+ 64.4
Retail trade — Commerce de détail	161.9	159.2	118.4	122.0	+ 1.7	— 3.0	+ 36.7
Utilities — Total — Services publics	154.9	156.1	148.1	152.5	— 0.8	— 2.9	+ 4.6
Pipeline — Pipe-line	189.8	191.9	165.5	169.1	— 1.1	— 2.1	+ 14.7
Telephone — Téléphone	296.1	293.8	256.4	264.9	+ 0.8	— 3.2	+ 15.5
Electric power — Énergie électrique	92.0	92.1	96.4	99.9	— 0.1	— 3.5	— 4.6
Gas distribution — Distribution du gaz	122.2	123.7	119.0	122.2	— 1.2	— 2.6	+ 2.7
Finance — Total — Finances	179.4	180.2	136.7	137.3	— 0.4	— 2.6	— 13.1
Banks — Banques	210.4	213.0	157.7	157.0	— 1.2	+ 0.4	+ 31.2
Investment and loan — Placements et prêts	131.2	128.8	105.2	108.5	+ 1.9	— 3.0	+ 34.4
Mineral stocks — Actions minier							
General index — Indice général	117.5	115.0	113.9	120.4	+ 2.2	— 5.4	+ 3.2
Iron — Or	117.2	106.8	109.1	113.7	+ 9.7	— 4.0	+ 7.4
Base metals — Métaux communs	118.7	120.5	117.5	125.1	— 1.5	— 6.1	+ 1.0
Elementary indexes — Indices supplémentaires							
Minerals — L'uranium	176.4	177.0	174.5	187.1	— 0.3	— 6.7	+ 1.1
Mineral oils and gas — Pétrole et gaz primaires	443.9	465.1	439.1	438.9	— 4.6	—	+ 1.1

Gross weighted, including inter-industry shipments. For explanation see page 79. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 79.

Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.

Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 80 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 80 pour les prix détaillés des grains de l'Ouest.

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

Revisions of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased), necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels.

	Old Series Ancienne série	New series Nouvelle série

Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes éléments des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

(1) Final to July 1970. See page 80 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. - Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 80 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	May 1972 — Mai	April 1972 — Avril	May 1971 — Mai	April 1971 — Avril	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	613.8	613.8	555.4	597.1	582.7	752.7	1,032.8
Beans, coffee — Grains de café	326.3	321.1	306.0	308.7	317.4	391.7	302.6
Copper, electrolytic — Cuivre électrolytique ...	490.6	490.6	494.1	494.1	492.5	541.6	483.6
Cotton, raw — Coton brut	342.8	329.1	281.0	278.5	292.1	282.0	276.3
Eggs — Oeufs	121.6	124.3	125.0	125.9	122.1	139.6	161.7
Fruits, fresh — Fruits frais	226.6	227.7	222.2	266.6	230.0	229.6	225.8
Grains — Céréales	188.1	185.3	191.0	198.0	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	273.8	263.8	159.9	169.2	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	335.4	324.9	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	467.4	439.0	384.4	377.0	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	186.5	148.5	147.7	143.1	180.8	261.6	221.9
Potatoes — Pommes de terre	174.2	173.3	217.7	182.6	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	109.2	106.1	127.4	123.0	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	264.8	264.8	283.4	295.2	284.2	328.9	250.0
Silver — Argent	404.4	399.2	444.4	451.9	405.6	478.1	497.5
Steers — Bouvillons	612.7	587.7	552.8	547.8	548.8	510.8	496.6
Sugar, raw — Sucre brut	239.8	249.8	176.3	181.0	178.7	160.9	144.1
Tin — Étain	339.3	346.8	322.8	328.8	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	168.2	151.9	138.5	146.8	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	168.6	166.3	136.3	134.8	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	422.5	400.3	344.7	344.7	357.6	341.0	326.1

(1) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

Turnips, Canada No. 1 - Navet canadien n° 1	139.4	133.1	118.4	116.8	125.1	171.0	141.8
Cabbage - Chou	186.4	175.8	186.0	178.5	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	172.0	175.5	187.9	202.5	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	166.4	142.1	127.5	133.3	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	132.1	147.9	161.7	157.7	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	120.2	120.6	117.4	117.6	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	104.9	105.2	102.2	101.3	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	128.2	131.0	127.9	126.8	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	118.7	121.9	114.3	113.7	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	120.5	121.1	119.4	117.9	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	131.3	132.2	123.5	123.2	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	132.9	133.7	129.8	129.6	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	99.7	100.0	99.5	99.3	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie ...	105.8	105.3	98.6	97.6	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	102.8	103.2	100.4	99.8	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	124.2	126.5	133.6	133.5	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	111.0	112.7	112.8	112.7	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	121.5	122.5	111.9	111.5	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	131.9	132.6	137.2	136.3	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés ...	132.4	132.9	127.7	127.2	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	125.1	125.9	123.7	120.6	121.5	118.0	117.1

(1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.

(2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.

(3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.

(4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.

(5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.

(6) 1965=100. - 100 en 1965.

(7) 1963=100. - 100 en 1963.

(8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. — Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

1) For explanation see page 87. — Pour de plus amples explications, voir la page 87.

2) The shelter element of regional cities housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and homeownership costs. See also page 87. — Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir la page 87.

To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. - Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande. The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. - Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957. Major components for the provincial indexes were presented in the November 1970 issue of Prices and Price Indexes. - Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de Prices and Price Indexes. Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. - On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents. For further detailed explanation see Prices and Price Indexes - March 1971. - Pour plus de renseignements, voir Prices and Price Indexes. - mars 1971. For further detailed explanation see occasional paper 62-526. - Pour plus de renseignements, voir le bulletin hors série N° 62-526 au catalogue. For further detailed explanation see occasional paper 62-533. - Pour plus de renseignements, voir le bulletin hors série N° 62-533 au catalogue.

(5) Implicit weights of the 1961=100 arithmetically converted indexes, materials 51.9, wages 48.1. — Coefficients implicites de Pondération obtenus par conversion arithmétique à 1961=100, matériaux 51.9, main-d'oeuvre 48.1.

(6) Implicit weights materials 55.1, wages 44.9. — Coefficients implicites de Pondération, matériaux 55.1, main-d'oeuvre 44.9.

(7 & 8) National Income and Expenditure Accounts, Catalogue 13-001, quarterly. — (N° 13-001 au catalogue, trimestriel).

(8) This series contains an engineering component as well as a building component, and is therefore not precisely comparable in coverage with the non-residential composite index. The implicit price indexes are adjusted for changes in contractors profit and productivity. — Cette série comprend une composante génie aussi bien qu'une composante construction: elle n'a donc pas tout à fait la même portée que l'indice synthétique pour la construction non-résidentielle. Les indices synthétiques sont corrigés des variations des profits et de la productivité des entrepreneurs.

* For further detailed explanation see Prices and Price Indexes — May 1970. Pour des explications détaillées voir Prix et indices de prix — Mai 1970.

Explanation of Methods Used and Additional
Sources for Price Series

Industrial Price Indexes

Industry Selling Price Indexes (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight for the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their products, e.g., bread, biscuits, cakes, etc.

General Wholesale Index (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because it uses its ingredient prices relative to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also includes transactions of "middle men" who trade in commodities of a type or in quantities characteristic of intermediary marketing functions.

Though general wholesale price indexes have been used by many countries for years there is no simple answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Even a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities

Explication des méthodes utilisées et sources
supplémentaires des séries de prix

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services,

and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Farm Input Price Indexes (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Canadian Farm Products Price Index (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Indices de prix des entrées dans l'agriculture (1961=100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reproduite dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère nos 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

- (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators(1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement(1) des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

(1) National Income and Expenditure Division, Statistics Canada.

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

(2) Industry Selling Price Indexes 1956-1968 Cat. 62-528.

(3) The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

Previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the eight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Canada Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'oeuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and right-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se rapporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in common and mining stock indexes are Thursday's closing quotations as reported in the *Globe and Mail* and the *Montreal Gazette*. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The index reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Lumber, Textile and Clothing, Pulp and Paper, and Petroleum (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le *Globe and Mail* et dans la *Montreal Gazette*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Inventors Index and Preferred Index, see Prices and Price Indexes for February 1972.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1972.

Detail Price Indexes

Indices des prix de détail

Consumer Price Index for Canada (1961=100)

Indice des prix à la consommation au Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases of a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the present index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influence of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada tends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated from 1949=100 to 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and the base revisions are available in the occasional report "The Consumer Price Index for Canada 1949=100 - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

Consumer Price Indexes for Regional Cities (1961=100)

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and in coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Also, city indexes are not as comprehensive in content as the Canada consumer price index and underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyen passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendrait pas plus avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de la semaine B en dollars de la semaine A, ou encore qu'elle renvoie le niveau effectif de la rémunération hebdomadaire de la semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes $113.6 (90.91/80.00 \times 100.0)$. Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages $(100.00/80.00 \times 100.0)$.

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending on occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring variations in the levels of consumption of wage-earners' families; they are intended to show only the trend in purchasing power of wages over the periods covered by the price index, and in addition to the factors already mentioned, do not take into account the family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both real and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other items of the family budget as clothing, transportation, household operation, health and personal care, recreation, reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. Exclusions are shelter (both rented and owned), public utilities (fuel, light and water), and restaurant meals. While recognizing the importance of these differentials in any overall comparison of the real price level being encountered by consumers in different urban centres, the problems inherent in drawing

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 $(90.91/80.00 \times 100.0)$. On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % $(100.0/80.00 \times 100.0)$.

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général

valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1969, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in this comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes qui comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1969; ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968 et novembre 1969 de Prices and Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune de prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

CANADIAN INTER-CITY DOMESTIC FUEL AND ELECTRICITY
COSTS COMPARISONS FOR A STANDARD DETACHED HOUSE

A study of
place-to-place relationships between
selected urban centres as of
May 1971 and February 1972

This study of selected comparative domestic fuel and electricity costs for a standard-sized detached house in eleven Canadian cities has been undertaken to enlarge upon and to complement published measurements of retail price differentials between urban centres for a number of other components of the consumer budget.(1) While for some groupings of commodities and services, valid inter-city retail price comparisons can be derived by use of a single Canadian average urban expenditure pattern, this approach cannot be realistically employed in relation to domestic fuel oil, gas and electricity costs. Variations in the quantities and types of fuels used from one city to another, because of climatic and other factors, call for a different measuring technique.

Accordingly, a modified degree-day formula(2) has been applied to yield estimates of fuel quantities in British Thermal Units (B.T.U.'s), for space heating in each city. Some of the factors influencing the quantity of fuel required for space heating which the formula takes into account are the following:

1. The difference as measured in degree-days between the temperature to be maintained inside the house and the outside temperature. (One heating degree-day results for each degree that the daily mean temperature is below a base of 65°F. No degree-days are counted when the mean temperature is 65°F or higher.)
2. Those characteristics of the house which determine its ability to retain heat. (Since our primary objective is to measure Canadian inter-city fuel and electricity cost differentials rather than to determine typical or average costs within a given city, the hypothetical dwelling used for comparative purposes in each city was arbitrarily chosen to be a 1,400 square foot, detached house. Though this specified size of house may not invariably represent what is most typical in each city, examination of the limited heat-loss data available suggested that a 1,400 square foot house would yield the best approximations for this study.)
3. An adjustment factor which takes into consideration the amount of heat generated by sources other than the heating system itself (e.g. lights, appliances, solar radiation, etc.).

After ascertaining the number of B.T.U.'s required for space heating the specified type of house in a given city, an estimate of the quantity of fuel oil or of natural gas needed to deliver this amount of energy was derived from information about the heating value of each type of fuel and its efficiency of utilization.(3) The heating value of fuel oil was estimated at 166,000 B.T.U.'s per imperial gallon and that of natural gas at 1,000 B.T.U.'s per cubic foot. The efficiency of fuel utilization in furnaces assumed to be in good working order was judged to be close to

COMPARAISONS ENTRE LES COÛTS DU COMBUSTIBLE ET DE
L'ÉLECTRICITÉ POUR UNE MAISON INDIVIDUELLE
MOYENNE DANS DIFFÉRENTES VILLES DU CANADA

Étude comparative entre divers
centres urbains choisis,
en mai 1971 et février 1972

Cette étude comparative des divers coûts, relevés dans onze villes du Canada, du combustible et de l'électricité pour une maison individuelle de taille moyenne a été entreprise en vue d'approfondir et de compléter les données publiées sur les différences entre les prix de détail dans différents centres urbains pour un certain nombre d'autres éléments de l'indice des prix à la consommation(1). Bien que des comparaisons valables des prix de détail dans différentes villes puissent être déduites pour certains groupements de biens et services en se basant sur une moyenne de la répartition des dépenses urbaine du Canada, cette méthode ne peut être employée pour le calcul des coûts du mazout, du gaz et de l'électricité d'une ville à l'autre. A cause du climat et d'autres facteurs il faut utiliser une méthode différente de calcul.

Ainsi, la formule connue sous le nom de "formule corrigée des degrés-jours(2)" a été utilisée pour mesurer estimativement en British Thermal Units (B.T.U.) les quantités de mazout consommées pour le chauffage dans chaque ville. Cette formule tient compte de certains des facteurs qui jouent sur la quantité de combustible nécessaire au chauffage. Ce sont les facteurs suivants:

1. La différence, mesurée en degrés-jours, entre la température qui doit être maintenue à l'intérieur de la maison et celle qui règne à l'extérieur. (Un degré-jour de chauffage correspond à chaque degré de la température moyenne quotidienne en deça de la base de 65°F. On ne compte aucun degré-jour quand la température moyenne est égale ou supérieure à 65°F.)
2. Les caractéristiques particulières des maisons qui leur permettent de retenir la chaleur. (Puisque notre but premier est de mesurer les différences des coûts du mazout et de l'électricité dans les villes du Canada et non pas de calculer le coût moyen ou caractéristique d'une ville donnée, l'habitation théorique utilisée dans chaque ville aux fins de la comparaison a été arbitrairement choisie; il s'agit d'une maison détachée de 1,400 pieds carrés. Même si cette grandeur de maison n'est pas nécessairement la plus répandue dans toutes les villes, l'examen des données disponibles sur la perte en chaleur nous a permis de croire qu'une maison de 1,400 pieds carrés donnerait les meilleures estimations possibles dans le contexte de cette étude.)
3. Un coefficient d'ajustement qui tient compte de la quantité de chaleur fournie par des sources autres que le système de chauffage (c.-à-d. les lumières d'éclairage, les appareils électriques, les radiations solaires, etc.).

Après avoir déterminé le nombre de B.T.U. nécessaires pour chauffer le genre de maison choisie dans une ville donnée on a évalué la quantité de mazout ou de gaz naturel nécessaire pour produire la quantité d'énergie requise, à partir des renseignements sur la valeur calorifique et de l'efficacité d'utilisation de chaque type de combustible(3). On a estimé la valeur calorifique du mazout à 166,000 B.T.U. par gallon impérial et celle du gaz naturel à 1,000 B.T.U. par pied cube. L'efficacité de l'utilisation du combustible dans des chaudières que l'on considère en bon état a été évaluée à près de 80 pour le mazout et le gaz. Ces estimations sur la production

- (3) Les combustibles de chauffage qui ne représentent qu'une faible part du marché national n'ont pas été étudiés.

10 % for both fuel oil and gas. The foregoing values of heat content and efficiency of utilization of the respective fuels are considered to be representative generally of conditions across Canada although not necessarily related to the specific operating experience of any given geographic area or dwelling.

For houses heated by fuel oil, a uniform quantity of electricity in all cities, namely 12,000 kilowatt-hours per annum was selected, after consultation with hydro authorities, as an appropriate amount to allow for lighting and appliances and cooking as well as water heating.

For gas-heated houses the electricity requirement was uniformly reduced to 5,880 kilowatt-hours per annum on the assumption that natural gas would also be used for water heating. Accordingly, estimates of the quantity of natural gas consumed annually include the amount required for both water and house heating.

Finally, the annual costs of fuel and electricity for the specified house heated by fuel oil and by natural gas were combined in the proportion of houses using these fuels for home heating on the basis of estimates derived from surveys of household facilities and equipment, to represent the mix of heating fuels prevailing in each city.

The resulting differentials in annual domestic fuel and electricity costs for the hypothetical dwelling used in the comparisons, on the basis of May 1971 and February 1972 price levels, are shown in index form in the accompanying table. While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

It should be noted that, unlike the published Canadian urban place-to-place retail price indexes which maintain quantities constant and compare only prices, these cost indexes reflect inter-city differentials arising from variations in both prices and quantities. While price differentials are frequently employed in the context of living-cost comparisons, the underlying assumption of a constant pattern of consumption from city to city may be quite inappropriate in respect of some components of the family budget, in particular those elements, such as fuel and electricity, which must take account of climatic conditions.

chaleur et l'efficacité de l'utilisation des combustibles correspondants sont considérées comme assez représentatives des conditions dans l'ensemble du Canada, sans toutefois s'appliquer à un cas déterminé dans une habitation ou une région donnée.

Dans le cas des maisons chauffées au mazout, on a choisi après avoir consulté les représentants de la Commission hydro-électrique une quantité uniforme d'électricité de 12,000 kilowatts-heures par année, dans chaque ville, quantité appropriée à l'éclairage, à la cuisine et aux appareils électriques ainsi qu'au chauffe-eau.

Dans le cas des maisons chauffées au gaz naturel, la quantité d'électricité nécessaire a été réduite à 5,880 kilowatts-heures par année, car on suppose que le gaz naturel sert également pour le chauffe-eau. Par conséquent, les estimations de la quantité de gaz naturel consommée annuellement comprennent le chauffage de l'eau et de la maison.

Enfin, les coûts annuels du combustible et de l'électricité dans les maisons chauffées au mazout ou au gaz naturel ont été combinés selon la proportion du nombre de maisons faisant usage de ces combustibles pour le chauffage à partir des estimations tirées des enquêtes annuelles sur l'équipement ménager, de manière à représenter la combinaison des combustibles de chauffage les plus utilisés dans chaque ville.

Les différences, obtenues en date de mai 1971 et de février 1972, des coûts annuels des combustibles de chauffage et de l'électricité pour l'habitation théorique qui a servi aux comparaisons, sont présentées sous forme d'indices dans le tableau ci-joint. Ces indices ont été basés sur les chiffres enregistrés à Winnipeg (=100), mais le choix de Winnipeg comme base de l'indice ne revêt aucune importance particulière, et n'importe quelle autre ville où sont prélevées les données pourrait servir de base pour l'établissement des indices.

Il est à noter que contrairement aux indices publiés des prix de détail comparatifs par ville du Canada, qui tiennent compte uniquement des prix sur une base quantitative constante, ces indices des coûts indiquent les différences par ville suivant la variation des prix et des quantités. Bien qu'on se serve souvent des différences de prix pour les comparaisons du coût de la vie, l'hypothèse sous-entendue ici d'une habitude de consommation constante d'une ville à l'autre peut s'avérer tout à fait erronée en ce qui a trait à certains éléments du budget familial, en particulier des éléments tels que le combustible et l'électricité, cas où il faut tenir compte des conditions climatiques.

INTER-CITY INDEXES OF FUEL AND ELECTRICITY COSTS AS AT MAY 1971 AND FEBRUARY 1972

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.1 % higher in June to 126.8 from the May index of 126.7. It was 4.2 % higher than the June 1971 index of 121.7. Of the 101 industry indexes included in the total, 37 were higher, 28 declined and 36 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded for the foods and beverages group in response to higher prices in the slaughtering and meat packing industry. More moderate advances were registered for the wood industries group, and for the miscellaneous manufacturing industries group, reflecting higher price levels in the sash, door and other millwork, and jewellery and silverware manufacturers industries respectively. The primary metals group declined during the month, attributable to price decreases in the smelting and refining industry; the paper and allied industries group also moved down reflecting lower prices in the pulp and paper mills industry.

May to June Changes in Industry Indexes

Variations de mai à juin des indices dans l'industrie

NOTES SUR LES CHIFFRES DES PRIX ET INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industrie manufacturière (1961=100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) a augmenté de 0.1 % en juin pour s'établir à 126.8, contre 126.7 en mai. Il était de 4.2 % supérieur à l'indice de juin 1971 (121.7). Sur les 101 indices des prix industriels qui composent le total, 37 indices ont augmenté, 28 ont baissé et 36 sont demeurés stationnaires.

En fonction de la contribution relative à la variation globale de l'ensemble des indices des industries manufacturières, les variations les plus remarquables survenues en juin ont été les augmentations enregistrées dans les aliments et boissons, suite à la hausse des prix dans l'industrie de l'abattage et du conditionnement de la viande. Des augmentations moins rapides ont été enregistrées dans l'industrie du bois, et dans les industries manufacturières diverses, en raison d'une hausse des prix dans l'industrie des portes et chassis et les ateliers de rabotage d'une part, et dans les bijouteries et les orfèvreries, d'autre part. Les industries de première transformation des métaux ont régressé au cours du mois à la suite de la baisse des prix dans l'industrie de la fonte et de l'affinage; les industries du papier et des activités connexes ont aussi connu une baisse qui reflétait la diminution des prix dans l'industrie des pâtes et papiers.

General Wholesale Index (1935-39=100)

The general wholesale index moved up 0.3 % in June to 306.5 from the revised May index of 305.7. It was 5.9 % higher than the June 1971 index of 289.3. Six of the eight major group indexes were higher, while two declined.

The animal products group index rose 1.0 % in June to 372.7 from 369.0 on higher prices for fresh and cured meats and livestock. An advance of 0.5 % to 245.5 from 244.4 in the chemical products group index reflected price increases for paint materials and inorganic chemicals. Moderate advances were recorded for four major group indexes; vegetable products to 239.6 from 239.0, textile products to 278.4 from 277.6, non-metallic minerals to 233.3 from 232.5 and iron products to 323.2 from 323.0.

The non-ferrous metals products group index moved 0.6 % lower to 264.0 from 265.5 on price decreases for refined copper (export prices) and silver. A slight decline occurred in the wood products group index to 425.2 from 425.4.

The following table shows some of the more noteworthy changes:

Commodity group and sub-group — Groupe et sous-groupe de produits	Percentage changes — Variations en pourcentage		
	June — 1972 — Juin May — 1972 — Mai	June — 1971 — Juin May — 1971 — Mai	June — 1972 — Juin June — 1971 — Juin
Animal products group — Produits d'origine animale	+ 1.0	+ 0.7	+ 15.9
Boots and shoes — Bottes et chaussures	+ 2.9	—	+ 6.5
Meats, fresh — Viandes fraîches	+ 2.6	+ 2.5	+ 17.2
Hides and skins — Peaux et cuirs	+ 2.5	— 1.9	+ 79.0
Meats, cured — Viandes salées ou fumées	+ 1.8	— 1.3	+ 20.9
Livestock — Bétail	+ 1.1	+ 0.4	+ 22.4
Fishery products — Produits de la pêche	— 0.5	+ 2.1	+ 10.9
Chemical products group — Produits chimiques	+ 0.5	+ 0.8	+ 2.3
Paint materials — Produits de la peinture	+ 1.3	—	+ 7.8
Inorganic chemicals — Produits chimiques inorganiques	+ 0.4	+ 0.1	+ 7.1
Coal tar products — Produits de goudron de houille	— 1.1	—	— 2.1
Non-ferrous metal products group — Produits métalliques non-ferreux	— 0.6	— 0.1	+ 0.8
Solder — Soudure	— 4.3	—	+ 6.6
Copper, refined (export prices) — Cuivre, affiné (prix à l'exportation)	— 1.9	— 1.0	— 2.1
Tin — Etain	— 1.4	— 0.5	+ 4.1
Silver — Argent	— 1.3	— 3.6	— 6.8

Farm Input Price Indexes (1961=100)

Between the 1st and 2nd quarters of 1972, the total Canada Farm Input Price Index increased 1.3 % moving to 140.2 from a 1st quarter level of 138.4. It was 3.5 % higher than the 2nd quarter index of 135.4 in 1971. The Eastern and Western indexes moved upwards from their common 1st quarter level of 138.4 to 140.4 and 140.0 respectively. In percentage terms the Eastern index increased by 1.4 % and the Western index by 1.2 %. Contributing to these changes were increased prices for feeder cattle, farm labour, building replacement, feed and fertilizer in Eastern Canada, while in Western Canada price increases for feeder cattle, machinery and motor vehicle replacement and operation, farm labour and building replacement accounted for the change.

Indice général des prix de gros (1935-1939=100)

L'indice général des prix de gros a augmenté de 0.3 % en juin et a atteint 306.5 contre 305.7 (indice rectifié) en mai. Il était de 5.9 % supérieur à l'indice de juin 1971 (289.3). Sur les huit principaux groupes, six ont augmenté et deux ont diminué.

L'indice des produits d'origine animale s'est accru de 1.0 % en juin pour se chiffrer à 372.7 contre 369.0 en mai, en raison de l'augmentation des prix du bétail, des viandes fraîches et des viandes salées ou fumées. L'avance de 0.5 % de l'indice des produits chimiques, qui a atteint 245.5 contre 244.4 traduisait la hausse des prix des produits de la peinture et des produits chimiques inorganiques. De faibles augmentations ont été enregistrées dans quatre grands groupes; de 239.0 à 239.6 pour les produits d'origine végétale, de 277.6 à 278.4 pour les textiles, de 232.5 à 233.3 pour les minéraux non métalliques ferreux et de 323.0 à 323.2 pour les produits ferreux.

L'indice des produits métalliques non-ferreux est tombé de 0.6 %, à 264.0 contre 265.5, par suite des baisses de prix du cuivre affiné (prix d'exportation) et de l'argent. Une légère baisse a été constatée dans les produits du bois dont l'indice est passé de 425.4 à 425.2.

Le tableau suivant donne les variations les plus intéressantes:

Indices des prix des entrées dans l'agriculture (1961=100)

L'indice global des prix des entrées dans l'agriculture au Canada a augmenté de 1.3 %, passant de 138.4 au premier trimestre de 1972 à 140.2 au deuxième trimestre de 1972. L'indice était de 3.5 % supérieur à celui du deuxième trimestre de 1971 (135.4). Les indices pour l'Est et l'Ouest se sont élevés au-dessus de leur indice commun de 138.4 atteint au premier trimestre pour se chiffrer à 140.4 et 140.0 respectivement. En pourcentage, l'indice de l'Est a progressé de 1.4 %, contre 1.2 % pour l'Ouest. L'augmentation des prix de bovins d'embouche, de la main-d'oeuvre agricole, du remplacement de bâtiments, des aliments pour les animaux et des engrais est la cause de ces variations dans l'Est du Canada. Dans l'Ouest, les hausses proviennent de l'augmentation des prix des bovins d'embouche, de l'utilisation et du remplacement de machines et de véhicules automobiles, de la main d'oeuvre agricole et du remplacement de bâtiments.

Security Price Indexes

The Investors Index of common stock prices rose 1.5 % from 169.8 to an all time high of 172.3. Amongst the three major groups, Finance fell 5.6 % while Industrials and Utilities rose 3.2 % and 0.5 % respectively. Amongst the thirteen sub-groups which comprise the Industrial major group, nine showed increases ranging from 0.5 % in Industrial Mines to 9.6 % for Petroleum. Three other sub-groups showed losses: the greatest loss of 1.7 % being in Primary Metals. Food remained the same at 140.8. In Utilities, the largest increase was 5.8 % for Transportation, and the greatest decrease was 3.7 % for telephone.

A decline in the Finance Index resulted from a loss in both sub-groups: Banks dropping 6.8 % from 210.4 to 196.0 and Investments and Loans moving down 1.7 % from 131.2 to 129.0.

In the same period, the index of Mining stock prices rose 1.8 % to 119.6 as a result of an increase in Golds of 11.2 % to 130.3 while Base Metal fell 3.3 % to 114.8.

Of the two supplementary price indexes, Uranium and Primary Oils and Gas showed increases of 8.5 % and 10.7 % respectively.

The preferred stock index rose 0.6 % to 70.5.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, moved up 0.4 % to 295.7 in June from the May index of 294.5. Prices were higher for eight commodities, lower for seven and unchanged for fifteen. Principal changes included increases for raw wool, linseed oil, hogs, rosin, sisal, steers and raw sugar while decreases were recorded for raw cotton, raw rubber, tin, iron ore, bleached sulphite pulp, spruce lumber and wheat for export.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 0.8 % to 286.4 in June from the May index of 284.0. An increase of 0.8 % to 70.6 from 169.2 in the field products index reflected higher prices for hay on both Eastern and Western markets, for potatoes in the East and for flax in the East. Lower prices were shown for barley in the East and for potatoes in the West. The animal products index advanced 0.8 % to 402.1 from 398.8 on higher prices for raw wool and steers on the Eastern and Western markets, and for hogs, calves and cheese-milk in the East. Lower prices were shown for lambs on both markets, and for hogs in the West.

Indice des cours des valeurs mobilières

L'indice des cours de placement des actions ordinaires a augmenté de 1.5 %; il a avancé de 169.8 à un sommet encore inégalé de 172.3. Parmi les trois groupes importants, les finances sont tombées de 5.6 % tandis que les valeurs industrielles et les services publics s'élevaient respectivement de 3.2 % et 0.5 %. Parmi les treize sous-groupes qui composent le grand groupe des industries, neuf ont connu une progression allant de 0.5 % dans les mines industrielles à 9.6 % dans le pétrole. Trois autres sous-groupes ont subi des baisses, la plus forte étant enregistrée dans les industries de première transformation des métaux (1.7 %). Les aliments sont restés stationnaires à 140.8. Dans les services publics, les transports ont connu la plus forte augmentation (5.8 %) et la diminution la plus forte est allié aux téléphones (3.7 %).

La chute de l'indice des finances provient de pertes dans ses deux sous-groupes: 6.8 % pour les banques, soit de 210.4 à 196.0, et 1.7 % pour les placements et les prêts, qui passaient de 131.2 à 129.0.

Au cours de la même période, l'indice des prix des titres miniers a augmenté de 1.8 % pour atteindre 119.6 à la suite d'une hausse de 11.2 % dans l'industrie de l'or qui totalisait 130.3, tandis que les métaux communs tombaient de 3.3 % (114.8).

Dans le cas des deux indices des prix supplémentaires, l'industrie de l'uranium et l'industrie du pétrole et des gaz primaires ont connu des augmentations respectives de 8.5 % et 10.7 %.

L'indice des actions privilégiées s'est élevé de 0.6 % pour se chiffrer à 70.5.

Indice des prix de trente produits industriels (1935-39=100)

L'indice des prix de trente produits industriels, calculé sous forme de moyenne géométrique non pondérée, a progressé de 0.4 % pour atteindre 295.7 en juin contre 294.5 en mai. Les prix de huit produits a augmenté; celui de sept produits a diminué et celui des quinze autres est resté stationnaire. Les principales variations comprennent une augmentation du prix de la laine crue, de l'huile de lin, du porc, de la colophane, du sisal, des bouvillons et du sucre brut, et une diminution du prix du coton cru, du caoutchouc brut, de l'étain, du minerai de fer, de la pâte de bois au sulfite blanchie, du bois d'épinette et du blé destiné à l'exportation.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a progressé de 0.8 % passant de 284.0 en mai à 286.4 en juin. L'augmentation de 0.8 % de l'indice des produits de grande culture, qui passe ainsi de 169.2 à 170.6, traduit l'augmentation des prix du foin dans les marchés de l'Est et de l'Ouest, des pommes de terre dans les marchés de l'Est et du lin dans les marchés de l'Ouest. Le prix de l'orge a diminué dans l'Est et celui des pommes de terre dans l'Ouest. L'indice des produits d'origine animale a augmenté de 0.8 %, passant de 398.8 à 402.1, en raison de la hausse du prix de la laine crue et des bouvillons dans les marchés de l'Est et de l'Ouest, et des porcs, des veaux et du lait de fromagerie dans l'Est. On a constaté une diminution du prix des agneaux dans les deux marchés et des porcs dans l'Ouest.

The Consumer Price Index for Canada (1961=100) rose 0.1 % to 138.5 in June from 138.3 in May, which compares with May to June increases of 0.2 % in the preceding two years. In the latest month, both the Housing and the Transportation components moved up 0.3 %, while the Tobacco and Alcohol index rose 0.2 %. The components for Recreation and Reading and for Food each edged up 0.1 %. On the other hand, Clothing prices dipped 0.2 % and the Health and Personal Care index edged down 0.1 %. In June 1972, the All-Items index stood 1.6 % above its level of six months earlier and 4.1 % higher than its June 1971 level.

The Food index edged up 0.1 % to 137.5 in June from 137.4 in May, as a 0.8 % advance in restaurant meal prices outweighed a 0.1 % decline in the index of food for home consumption. The slight decline in the level of prices of food consumed at home was mainly attributable to a seasonal fall in egg quotations and lower prices, due to specials, for a number of miscellaneous grocery items. Egg prices fell 10.8 % between May and June and stood over 5 % below their level of a year previous. Meat, fish and poultry prices, however, were 0.9 % higher in the latest month. Beef rose 0.8 % with most cuts contributing to the advance. Chicken prices advanced 1.4 % whereas pork, on average, rose 0.3 %. Since June 1971, the meat, fish and poultry index increased over 11 %. Fruit prices, on average, rose only fractionally in the latest month in contrast to increases of over 3 % between May and June in the preceding three years. Mixed movements were recorded for fresh fruits, but most canned, dried and frozen fruit quotations were marginally lower. The vegetable index, in advancing 0.6 %, also recorded a smaller increase than that between May and June in recent years. Higher prices for potatoes, tomatoes and carrots, and some other fresh vegetables more than offset decreases in celery, lettuce and cabbage quotations in the latest month. The dairy products component rose mainly as the result of the removal of earlier specials on butter, ice cream, and powdered and evaporated milk, and also because of a general increase in the Winnipeg fluid milk price. The bakery and cereal index rose marginally as higher bread prices were not quite offset by lower quotations, due to specials, on items such as cereal and cookies. Amongst other foodstuffs, lower prices were recorded for various items including instant and ground coffee, vegetable soup, catsup, jelly powder, and margarine. In June 1972, the Food index stood 5.4 % above its level of a year previous, with the price of food consumed at home increasing 5.3 % and that of restaurant meals, 6.3 %.

L'indice des prix à la consommation au Canada (1961=100) s'est accru de 0.1 %, passant de 138.3 en mai à 138.5 en juin, soit une augmentation comparable à celle de 0.2 % enregistrée entre mai et juin au cours des deux années précédentes. Le mois dernier, les indices de l'habitation et des transports ont tous deux progressé de 0.3 %, tandis que celui du tabac et des alcools s'est accru de 0.2 %. Les indices de la lecture et des loisirs et de l'alimentation ont enregistré chacun une augmentation de 0.1 %. Par ailleurs, les prix des vêtements ont diminué de 0.2 % et l'indice des soins personnels et de santé a régressé de 0.1 %. En juin 1972, l'indice général était de 1.6 % plus élevé qu'il y a six mois plus tôt et dépassait de 4.1 % l'indice de juin 1971.

L'indice de l'alimentation s'est accru de 0.1 %, atteignant 137.5 en juin contre 137.4 en mai, à la suite de l'augmentation de 0.8 % du prix des repas pris au restaurant qui a plus que compensé la diminution de 0.1 % de l'indice des aliments consommés à la maison. La légère diminution de l'indice des prix des aliments consommés à la maison résulte en grande partie de la baisse saisonnière du prix des oeufs et des rabais sur les prix de diverses denrées. Le prix des oeufs a diminué de 10.8 % entre mai et juin et se situait à 5 % en dessous de ce qu'il était un an plus tôt. Toutefois, les prix de la viande, du poisson et de la volaille ont augmenté de 0.9 % le mois dernier. Le prix du boeuf est monté de 0.8 %, la plupart des morceaux ayant enregistré des hausses; celui du poulet a progressé de 1.4 % tandis que celui du porc a augmenté en moyenne de 0.3 %. Depuis juin 1971, l'indice de la viande, du poisson et de la volaille a grimpé de plus de 11 %. Les prix des fruits n'ont augmenté en moyenne que légèrement le mois dernier, ce qui contraste avec les hausses de plus de 3 % enregistrées entre mai et juin au cours des trois années précédentes. Divers mouvements ont été enregistrés dans le cas des fruits frais, mais la plupart des fruits en conserve, surgelés et congelés ont diminué légèrement de prix. L'indice des légumes, qui s'est accru de 0.6 %, a également enregistré une augmentation moins sensée que celle enregistrée entre mai et juin ces deux années. La hausse du prix des pommes de terre, tomates et des carottes, et de certains autres légumes frais, a plus que compensé la diminution de prix du céleri, de la laitue et du chou le mois dernier. L'accroissement de l'élément des produits laitiers est attribuable en grande partie à la pression des rabais antérieurs sur le beurre, la crème glacée, le lait évaporé et en poudre, et à l'augmentation générale du prix du lait liquide à Winnipeg. L'indice des produits de boulangerie des produits céréaliers a enregistré une légère augmentation du fait que la hausse du prix du pain n'a pu être compensée par les rabais sur les produits tels que les céréales et les biscuits. Parmi les autres aliments, il y a eu diminution de prix de divers articles, dont le café instantané moulu, la soupe aux légumes, le ketchup, la pou-

The Housing index rise of 0.3 % to 142.6 in June from 142.2 in May was attributable to increases in both the shelter and the household operation components. The shelter index rose 0.1 % mainly because of a 0.6 % increase in new house prices; rents and homeowner repair charges each edged up 0.1 %. Within the household operation component, which rose 0.5 %, household service charges advanced 0.9 % because of increased telephone rates in number of centres in Ontario and Quebec. A 0.7 % advance in appliance prices mainly resulted from higher quotations for sewing machines, electric frying pans and electric toasters. Both the furniture and the household textile indexes rose 0.2 %, the former mainly because of increased living-room suite prices, the latter chiefly as a result of higher towel and sheet quotations. Among other household operation items, floor coverings, dishes, light bulbs, alarm clocks and garbage cans registered price increases while cleaning supplies were generally lower in price due to supermarket sales. Between June 1971 and June 1972, the Housing index increased 4.6 %.

The Clothing index decreased 0.2 % to 131.3 in June from 131.5 in May because of lower prices for men's wear, women's wear, children's wear, and piece goods. The men's wear decrease of 0.5 % mainly resulted from lower prices for suits, trousers, and socks, while sales on spring coats and dresses were the main cause of a 0.4 % decline in the women's wear index. On the other hand, price increases of 0.3 % and 1.2 %, respectively, were registered for footwear and clothing services, the latter because of generally higher shoe repair, dry cleaning and laundry charges. Between June 1971 and June 1972, the Clothing index rose 2.1 %.

The Transportation index rose 0.3 % to 133.6 in June from 133.2 in May as a result of increases of 3.2 % and 0.3 % in the inter-city travel and local transportation components, respectively. With respect to inter-city travel, train fares increased because of both seasonal and non-seasonal factors, and the inter-urban bus fares were raised in Quebec and Ontario. The local transportation index also rose as adoption of a cash-only payment system effectively increased Edmonton bus fares. No change was recorded in the automobile operation component as marginally

de gelée et la margarine. En juin 1972, l'indice de l'alimentation s'établissait à 5.4 % au-dessus de ce qu'il était un an plus tôt, faisant suite à une augmentation de 5.3 % du prix des aliments consommés à la maison et de 6.3 % dans le cas des repas pris au restaurant.

L'indice de l'habitation a enregistré une augmentation de 0.3 %, passant de 142.2 en mai à 142.6 en juin, à la suite de l'accroissement de l'indice du logement et de l'indice de l'entretien du ménage. L'indice du logement a progressé de 0.1 % en raison principalement d'une hausse de 0.6 % du prix des maisons neuves; ainsi que du loyer et des frais de réparation des maisons, qui ont augmenté chacun de 0.1 %. Dans le cas de l'entretien du ménage, dont l'indice s'est accru de 0.5 %, les frais d'entretien ménager se sont accrus de 1.9 % par suite d'une hausse des tarifs de téléphone dans certains centres de l'Ontario et du Québec. L'augmentation de 0.7 % des prix des appareils ménagers est attribuable principalement à une hausse du prix des machines à coudre, des poêles à frire électriques et des cuisinières électriques. Les indices de l'ameublement et des textiles ménagers ont augmenté de 0.2 % chacun, le premier en raison surtout d'une hausse du prix des meubles de salle de séjour, et le second par suite surtout d'une augmentation du prix des serviettes et des draps. Parmi les autres articles d'entretien du ménage, les revêtements de sol, la vaisselle, les ampoules, les réveils et les poubelles ont subi une augmentation de prix, tandis que les fournitures d'entretien ont en général diminué de prix à cause des soldes dans les supermarchés. Entre juin 1971 et juin 1972, l'indice de l'habitation a progressé de 4.6 %.

L'indice de l'habillement a baissé de 0.2 %: il est passé de 131.5 en mai à 131.3 en juin à la suite de la diminution des prix des vêtements pour hommes, pour femmes et pour enfants ainsi que des tissus à la pièce. Dans le cas des vêtements pour hommes, la diminution (0.5 %) est imputable principalement aux prix de soldes des costumes, des pantalons, et des chaussettes; pour sa part, la diminution (0.4 %) de l'indice des vêtements pour femmes est attribuable principalement aux soldes des manteaux de printemps et des robes. Par contre, l'indice des chaussures a augmenté de 0.3 %, et celui de l'entretien des vêtements, de 1.2 %; dans ce dernier cas, la hausse est imputable à l'augmentation en général du coût de la cordonnerie, du nettoyage à sec et des frais de blanchissage. De juin 1971 à juin 1972, l'indice de l'habillement a avancé de 2.1 %.

L'indice des transports a augmenté de 0.3 %, passant de 133.2 en mai à 133.6 en juin à la suite d'une augmentation de 3.2 % de l'indice du transport interurbain et de 0.3 % de celui du transport local. Pour ce qui est du transport interurbain, il y a eu une augmentation des tarifs des chemins de fer par suite de facteurs saisonniers et non saisonniers et il y a eu quelques augmentations de tarifs d'autobus interurbains au Québec et en Ontario. L'indice du transport local a également augmenté après que la mise en vigueur d'un système de tarif exact ait entraîné une augmentation des tarifs d'autobus à Edmonton. L'élément utilisation

higher new car prices together with widespread advances in chassis lubrication charges offset gasoline price reductions in a number of cities. In the twelve months to June 1972, the Transportation index rose 2.7 %.

The Health and Personal Care index edged down 0.1 % to 148.9 in June from 149.0 in May owing to lower prices for some personal care supplies such as toilet soap, cleansing tissues and razor blades. Between June 1971 and June 1972, the Health and Personal Care index advanced 4.7 %.

The Recreation and Reading index edged up 0.1 % to 139.3 in June from 139.2 in May. Price increases were recorded for phonograph records, bicycles, sports equipment and black and white television sets. On the other hand, color television sets and stereo combinations decreased in price. In the twelve months to June 1972, the Recreation and Reading index advanced 2.9 %.

The Tobacco and Alcohol index rose 0.2 % to 132.8 in June from 132.5 in May as a result of similar increases of 0.2 % for both the tobacco and the alcoholic beverage elements. The tobacco increase mainly resulted from higher tax levies in Newfoundland. Beer prices rose in Nova Scotia, and some higher liquor prices were recorded in Nova Scotia, Manitoba and Alberta. In the twelve months to June 1972, the Tobacco and Alcohol index increased 3.2 %.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. Between May and June, the services index moved up 0.3 % mainly because of increased telephone rates and higher clothing service and chassis lubrication charges together with increased train and local and inter-city bus fares. The total commodities index edged up 0.1 % as rises of 0.4 % and 0.1 % for durables and food, respectively, outweighed 0.1 % lower prices for non-durables excluding food. The durables increase was chiefly attributable to higher prices for bicycles, furniture, floor coverings, appliances, and some other household utensils and equipment. The decline for non-durables excluding food was mainly the result of reductions for garments, household cleaning supplies, toiletries and gasoline outweighing increased quotations for tobacco, alcoholic beverages, footwear, phonograph records and sports equipment.

de l'automobile est resté inchangé car une légère augmentation du prix des voitures neuves combinée à d'importantes avances des frais de graissage de châssis a compensée la baisse du prix de l'essence dans un certain nombre de villes. Au cours de la période de douze mois prenant fin en juin 1972, l'indice des transports a avancé de 2.7 %.

L'indice des soins personnels et de santé a diminué de 0.1 %, passant de 149.0 en mai à 148.9 en juin. Cette diminution s'explique par la baisse du prix de certains articles de soins personnels comme le savon de toilette, le tissu à démaquillage et les lames de rasoir. Entre juin 1971 et juin 1972, l'indice des soins personnels et de santé a avancé de 4.7 %.

L'indice des loisirs et de la lecture a avancé de 0.1 %, passant de 139.2 en mai à 139.3 en juin. On a observé des hausses de prix des disques des bicyclettes, des articles de sport et des téléviseurs noir et blanc. Par contre, les prix des télécouleurs et des chaînes stéréophoniques ont baissé. Au cours de la période de douze mois prenant fin en juin 1972, l'indice des loisirs et de la lecture a avancé de 2.9 %.

L'indice des tabacs et alcools a augmenté de 0.2 %, passant de 132.5 en mai à 132.8 en juin, à la suite d'une augmentation de 0.2 % de l'élément "tabacs" et de l'élément "alcools". L'augmentation observée dans le cas du tabac est principalement imputable à l'augmentation de la taxe à Terre-Neuve. Le prix de la bière a augmenté en Nouvelle-Écosse et on a observé quelques augmentations du prix de alcools en Nouvelle-Écosse, au Manitoba et en Alberta. Au cours de la période de douze mois prenant fin en juin 1972, l'indice des tabacs et alcools a augmenté de 3.2 %.

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par biens et services, on obtient une image différente du mouvement des prix à la consommation. De mai à juin, l'indice des services a avancé de 0.3 % à la suite surtout de l'augmentation des tarifs téléphoniques des frais d'entretien des vêtements et des frais de graissage de châssis, des tarifs de chemin de fer et des tarifs d'autobus locaux et interurbains. L'indice des biens a avancé légèrement (0.1 %) car des augmentations de 0.4 % et de 0.1 % dans le cas des biens durables et des aliments ont plus que compensé une baisse de 0.1 % des prix des biens non durables (aliments exceptés). L'augmentation de l'indice des biens durables est imputable principalement à l'augmentation du prix des bicyclettes, des meubles, des revêtements de sol, des appareils électroménagers et de certains autres accessoires et équipements ménagers. La baisse de l'indice des biens non durables (aliments exceptés) est attribuable surtout à la baisse du prix des vêtements, des articles ménagers de nettoyage, des articles de toilette et de l'essence, baisse qui a plus que compensé l'augmentation du prix du tabac, des boissons alcooliques, des chaussures et des disques.

TABLE 1. Summary of Current Price Indexes

TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	June 1972 — Juin	May 1972 — Mai	June 1971 — Juin	May 1971 — Mai	June — Juin 1972 May — Mai	June — Juin 1971 May — Mai	1972 June — Juin 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:	126.8	126.7	121.7	121.2	+ 0.1	+ 0.4	+ 4.2
General wholesale index — (1935-39=100)(2) — L'indice général de gros	306.5	305.7 ²	289.3	288.3	+ 0.3	+ 0.3	+ 5.9
Vegetable products — Substances végétales	239.6	239.0	237.4	237.0	+ 0.3	+ 0.2	+ 0.9
Animal products — Produits animaux	372.7	369.0	321.5	319.3	+ 1.0	+ 0.7	+ 15.9
Textile products — Produits textiles	278.4	277.6	261.3	260.4	+ 0.3	+ 0.3	+ 6.5
Wood products — Produits du bois	425.2	425.4 ²	394.3	392.3	—	+ 0.5	+ 7.8
Iron products — Produits du fer	323.2	323.0	315.3	314.8	+ 0.1	+ 0.2	+ 2.5
Non-ferrous metals — Métaux non ferreux	264.0	265.5	262.0	262.3	— 0.6	— 0.1	+ 0.8
Non-metallic minerals — Minéraux non métalliques	233.3	232.5	225.5	225.5	+ 0.3	—	+ 3.5
Chemical products — Produits chimiques	245.5	244.4	239.9	238.0	+ 0.5	+ 0.8	+ 2.3
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	286.4	284.0	269.4	269.1	+ 0.8	+ 0.1	(3)
Western — Total — De l'ouest	320.8	316.0	293.2	292.1	+ 1.5	+ 0.4	+ 9.4
Field — Cultures	252.0	252.0	245.7	246.1	—	— 0.2	(3)
Animal — Animaux	170.6	169.2	189.3	188.2	+ 0.8	+ 0.6	(3)
	402.1	398.8	349.6	349.9	+ 0.8	— 0.1	+ 15.0
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	295.7	294.5	267.2	266.1	+ 0.4	+ 0.4	+ 10.7
Residential building materials — (1961=100) — Matériaux de construction résidentielle	158.0	156.6	144.8	142.6	+ 0.9	+ 1.5	+ 9.1
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	141.5	141.1	133.8	133.2	+ 0.3	+ 0.5	+ 5.8
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	138.5	138.3	133.0	132.7	+ 0.1	+ 0.2	+ 4.1
Food — Alimentation	137.5	137.4	130.4	130.1	+ 0.1	+ 0.2	+ 5.4
Housing — Habitation	142.6	142.2	136.3	136.1	+ 0.3	+ 0.1	+ 4.6
Clothing — Habillement	131.3	131.5	128.6	128.3	— 0.2	+ 0.2	+ 2.1
Transportation — Transports	133.6	133.2	130.1	129.9	+ 0.3	+ 0.2	+ 2.7
Health and personal care — Soins personnels et de santé	148.9	149.0	142.2	142.0	— 0.1	+ 0.1	+ 4.7
Recreation and reading — Loisirs et lectures	139.3	139.2	135.4	135.6	+ 0.1	— 0.1	+ 2.9
Tobacco and alcohol — Tabacs et alcools	132.8	132.5	128.7	128.3	+ 0.2	+ 0.3	+ 3.2
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	172.3	169.8	150.6	148.5	+ 1.5	+ 1.4	+ 14.4
Industrials — Total — Industriels	178.2	172.6	153.7	151.6	+ 3.2	+ 1.4	+ 15.9
Industrial mines — Mines industrielles	125.7	125.0	140.5	142.4	+ 0.6	— 1.3	— 10.5
Foods — Aliments	140.8	140.8	137.6	133.8	—	+ 2.8	+ 2.3
Beverages — Boissons gazeuses	239.5	230.4	189.6	188.4	+ 3.9	+ 0.6	+ 26.3
Textiles and clothing — Textiles et vêtements	185.0	178.6	112.0	110.0	+ 3.6	+ 1.8	+ 65.2
Pulp and paper — Pâte et papier	98.1	99.5	95.9	91.8	— 1.4	+ 4.5	+ 2.3
Printing and publishing — Impression et édition	335.0	316.6	253.8	251.1	+ 5.8	+ 1.1	+ 32.0
Primary metals — Métaux primaires	105.4	107.2	99.0	99.0	— 1.7	—	+ 6.5
Metal fabricating — Fabrications des métaux	184.9	186.4	161.1	161.2	— 0.8	— 0.1	+ 14.8
Non-metallic minerals — Minéraux non métalliques	176.4	171.4	143.1	137.7	+ 2.9	+ 3.9	+ 23.3
Petroleum — Pétrole	286.7	261.6	207.1	200.2	+ 9.6	+ 3.4	+ 38.4
Chemicals — Produits chimiques	115.6	113.2	87.3	86.2	+ 2.1	+ 1.3	+ 32.4
Construction — Construction	106.5	103.6	62.3	63.0	+ 2.8	— 1.1	+ 70.9
Retail trade — Commerce de détail	164.6	161.9	126.8	118.4	+ 1.7	+ 7.1	+ 29.8
Utilities — Total — Services publics	155.6	154.9	148.4	148.1	+ 0.5	+ 1.0	+ 4.9
Pipeline — Pipe-line	188.8	189.8	166.9	165.5	— 0.5	+ 0.8	+ 13.1
Transportation — Transport	313.3	296.1	251.6	256.4	+ 5.8	— 1.9	+ 24.5
Telephone — Téléphone	88.6	92.0	97.1	96.4	— 3.7	+ 0.7	— 8.8
Electric power — Énergie électrique	122.4	122.2	118.8	119.0	+ 0.2	— 0.2	+ 3.0
Gas distribution — Distribution du gaz	189.6	191.5	224.4	220.4	— 1.0	+ 1.8	— 15.5
Finance — Total — Finances	169.3	179.4	141.5	136.7	— 5.6	+ 3.5	+ 19.6
Banks — Banques	196.0	210.4	164.1	157.7	— 6.8	+ 4.1	+ 19.4
Investment and loan — Placements et prêts	129.0	131.2	107.1	105.2	— 1.7	+ 1.8	+ 20.4
Mining stocks — Actions minier							
General index — Indice général	119.6	117.5	109.7	113.9	+ 1.8	— 3.7	+ 9.0
Colds — Or	130.3	117.2	98.7	109.1	+ 11.2	— 9.5	+ 32.0
Base metals — Métaux communs	114.8	118.7	116.6	117.5	— 3.3	— 0.8	— 1.5
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	191.4	176.4	159.7	174.5	+ 8.5	— 8.5	+ 19.8
Primary oils and gas — Pétrole et gaz primaires	491.2	443.9	451.1	439.1	+ 10.7	+ 2.7	+ 8.9

Gross weighted, including inter-industry shipments. For explanation see page 79. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 79.

Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.

Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 80 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 80 pour les prix détaillés des grains de l'Ouest.

	1972	124.5	125.2	125.8	126.4	126.7	126.8							

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

(2) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels:

	Old Series - Ancienne série	New series - Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

	1972	402.1	403.4	410.2	410.2	411.9	410.8							

(1) Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

(1) Final to July 1970. See page 80 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. — Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 80 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	June 1972 Juin	May 1972 Mai	June 1971 Juin	May 1971 Mai	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	411.6	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	645.1	613.8	540.8	555.4	582.7	752.7	1,032.8
Beans, coffee — Grains de café	335.8	326.3	307.0	306.0	317.4	391.7	302.6
Copper, electrolytic — Cuivre électrolytique ...	490.6	490.6	494.1	494.1	492.5	541.6	483.6
Cotton, raw — Coton brut	336.4	327.5	294.5	281.0	292.1	282.0	276.3
Eggs — Oeufs	121.9	121.6	113.0	125.0	122.1	139.6	161.7
Fruits, fresh — Fruits frais	227.6	226.6	216.5	222.2	230.0	229.6	225.8
Grains — Céréales	186.4	188.1	196.7	191.0	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	280.7	273.8	156.8	159.9	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	335.4	335.4	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	472.4	467.4	386.1	384.4	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	250.5	186.5	159.1	147.7	180.8	261.6	221.9
Potatoes — Pommes de terre	180.6	174.2	224.7	217.7	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	106.7	109.2	120.5	127.4	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	269.2	269.2	276.9	283.4	284.2	328.9	250.0
Silver — Argent	399.2	404.4	428.2	444.4	405.6	478.1	497.5
Steers — Bouvillons	623.4	612.7	554.9	552.8	548.8	510.8	496.6
Sugar, raw — Sucre brut	239.3	239.8	170.5	176.3	178.7	160.9	144.1
Tin — Étain	334.4	339.3	321.3	322.8	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	176.0	168.2	137.4	138.5	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	180.1	168.6	135.6	136.3	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	422.5	422.5	355.8	344.7	357.6	341.0	326.1

(1) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

TABLE 4A. PURCHASE PRICE INDEXES OF SECONDARY METALS(1)
 TABLEAU 4A. INDICES DES PRIX D'ACHAT DES MÉTAUX SECONDAIRES(1)
 1969=100

		Month - Mois												Annual - Annuel
		J	F	M	A	M	J	J	A	S	O	N	D

Footwear - Chaussures	144.5	144.1	141.5	140.9	141.0	136.7	132.4
Leather - Cuir	148.2	147.7	143.5	142.9	143.1	138.2	133.5
Rubber and plastic - Caoutchouc et plastique	114.4	114.0	124.7	124.1	123.9	123.7	123.4
Other non-durable - Autres non-durables ..	129.3	129.2	125.9	125.7	125.7	122.0	118.7
Services - Services:							
Total(5)	150.2	149.6	143.7	143.2	144.1	138.7	132.3
Excluding shelter - Total - Sauf logement ..	163.1	162.1	154.9	154.3	155.3	148.9	141.8

(1) For explanation see page 87. - Pour de plus amples explications, voir la page 87. (2) Includes oranges and orange juice, grapefruit, bananas, grapes, canned pineapple, raisins, tea and coffee. - Oranges et jus d'orange, pamplemousse, bananes, raisins, ananas en conserve, raisins secs, thé et café. (3) Includes constant weighted food component. - Comprend l'élément alimentation à pondérations constantes. (4) Includes television and radio. - Téléviseur et radio. (5) Excludes houses, mortgage interest, and property taxes. - Excluant les maisons, les intérêts hypothécaires et les taxes foncières.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies

	June 1972 Juin	May 1972 Mai	June 1971 June	May 1971 Mai	1971	1970	1969
<u>Dairy products - Produits laitiers</u>							
Milk, fresh - Lait frais	150.8	150.5	143.7	142.9	145.1	138.9	137.1
Milk, evaporated - Lait évaporé	134.1	131.0	120.0	119.7	119.6	112.5	112.9
Powdered skim milk - Poudre de lait écrémé	155.2	151.1	141.8	138.7	139.9	130.3	128.3
Butter, creamery, first grade - Beurre de crèmerie	108.4	107.6	102.5	102.4	104.0	102.3	103.0
Cheese, plain, processed - Fromage ordinaire fondu	147.3	148.1	132.0	131.0	133.4	130.3	127.9
<u>Poultry and eggs - Volaille et oeufs</u>							
Chicken, grade A evisc. - Poulet, qualité A, évis- céré	129.9	128.1	110.6	107.8	112.0	107.7	111.2
Turkey, grade A evisc. - Dinde, qualité A, éviscérée	107.3	106.4	96.0	94.7	95.8	99.1	101.6
Eggs, fresh, grade A large - Oeufs frais, qualité A gros	78.6	88.1	83.0	90.4	87.3	99.0	109.9
Eggs, fresh, grade A medium - Oeufs frais, qualité A moyens	83.2	90.9	88.0	94.3	86.8	98.6	114.1
<u>Beef - Boeuf</u>							
Sirloin steak - Bifteck de faux filet	151.5	149.2	145.0	140.5	143.4	139.7	139.3
Round steak - Bifteck dans la ronde	157.3	158.8	148.5	148.3	148.0	143.7	135.6
Prime rib roast(1) - Rôti de plat de côtes(1)	154.1	151.0	142.1	138.2	139.9	134.4	133.5
Blade roast(2) - Rôti de haut-côte(2)	149.3	145.4	134.0	136.9	133.1	133.5	131.8
Stewing beef - Boeuf pour ragoût	155.6	157.4	145.4	146.1	145.9	142.1	138.3
Hamburg - Boeuf haché	166.6	163.6	147.8	147.3	148.5	144.8	138.8
Liver, sliced - Foie en tranches	142.2	137.9	116.4	117.3	119.1	132.3	115.3
<u>Pork - Porc</u>							
Rib chops, fresh - Côtelettes fraîches	147.3	145.6	117.8	113.6	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh - Rôti dans l'épaule, soc de Boston, frais	123.4	125.2	99.2	97.6	102.4	120.5	129.9
Sausage, pure pork - Saucisse pur porc	127.8	129.0	119.9	119.3	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off - Bacon, flanc, de fantaisie, en tranches, sans couenne	94.9	92.2	76.5	75.5	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) - Jambon fumé, désossé(3)	127.7	132.4	113.4	114.7	115.4	135.2	138.4
<u>Other meats - Autres viandes</u>							
Lamb, leg roast - Agneau, gigot	121.7	121.1	112.8	112.5	113.7	114.8	109.1
Veal, loin chops, rib end - Veau, côtelettes, bout de côte	186.8	187.0	164.0	162.8	165.0	162.6	151.5
Wieners or frankfurters - Saucisses de Francfort ...	129.4	129.0	120.5	118.0	119.0	121.5	120.1
Meat loaf, canned, mainly pork - Pain de viande, en conservation, principalement de porc	120.1	121.8	123.3	125.4	123.0	130.7	125.0
<u>Fish - Poisson</u>							
Cod fillets, frozen(5) - Filets de morue, conge- lés(5)	213.8	206.1	160.1	157.8	160.6	143.3	135.4
Salmon, canned, fancy pink - Saumon, en boîte, de fantaisie, rose	146.0	146.0	141.5	140.9	143.0	144.1	129.9
<u>Fats and oils - Huiles et corps gras</u>							
Margarine	109.0	110.6	118.5	118.1	114.8	112.1	105.5
Lard, pure - Saindoux pur	115.7	116.0	110.4	111.0	111.4	118.7	103.6
Shortening	123.1	122.4	119.8	118.1	118.7	114.1	109.4
Salad dressing - Vinaigrette	109.9	109.7	105.0	105.0	105.4	104.7	102.7
<u>Cereals and bakery products - Céréales et produits de la boulangerie</u>							
Flour, white, all purpose - Farine blanche, tout usage	134.5	134.7	132.1	132.0	131.3	133.5	134.3
Corn flakes - Flocons de maïs	118.3	120.1	122.7	118.9	119.6	117.4	116.2(7)
Macaroni - Macaronis secs	124.9	125.9	126.1	125.8	126.0	126.4	119.4

Green beans, fr. cut, frozen - Haricots verts coupés, congelés	104.7	104.9	102.5	102.2	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	128.3	128.2	128.3	127.9	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	121.8	118.7	115.3	114.3	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	120.4	120.5	119.7	119.4	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	131.3	131.3	123.6	123.5	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	133.5	132.9	130.9	129.8	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	99.0	99.7	98.4	99.5	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie ...	104.6	105.8	100.2	98.6	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	103.3	102.8	100.2	100.4	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	123.4	124.2	133.8	133.6	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	110.7	111.0	112.4	112.8	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	120.5	121.5	113.2	111.9	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	131.8	131.9	138.0	137.2	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés ...	134.0	132.4	128.6	127.7	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	123.6	125.1	120.9	123.7	121.5	118.0	117.1

- (1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.
- (2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.
- (3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.
- (4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.
- (5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.
- (6) 1965=100. - 100 en 1965.
- (7) 1963=100. - 100 en 1963.
- (8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. — Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

(1) For explanation see page 87. — Pour de plus amples explications, voir la page 87.

(2) The shelter element of regional cities housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and homeownership costs. See also page 87. — Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir la page 87.

Déc.										

(3) Includes shelter and household operation. The shelter element of regional city housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and home-ownership costs. See also page 87. — Comprend le logement et l'entretien du ménage. Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir aussi la page 87.

Shorts - Gru	3.40	3.44	3.54	3.35	3.49	3.61	3.54	3.56	3.62
Middlings - Issues	3.51	3.52	3.66	3.05	3.08	3.35	3.69
Linseed oil meal - Farine de graine de lin	5.94	5.93	5.88	6.09	6.23	6.05	6.95	6.94	6.73
Soybean oil meal - Farine de soya	6.54	6.59	6.02	7.02	7.08	7.23	7.47	7.34	7.51
Calf starter - Moulée de début pour veaux (20-24%)	5.92	5.90	5.96	5.44	5.41	5.39	5.82	5.86	5.89
Dairy ration - Ration laitière (16%)	3.92	3.92	4.04	3.44	3.41	3.38	4.16	4.19	4.33
Dairy supplement (East) - Complément laitier (est) (24%)	4.73	4.75	4.79
Dairy supplement (West) - Complément laitier (ouest) (32%)	5.30	5.31	5.40	5.71	5.70	5.67
Pig starter mash - Moulée de début pour porcs	5.28	5.27	5.41	5.07	5.07	5.04	5.16	5.08	5.25
Hog concentrate - Concentré pour porcs (35%)	7.34	7.44	7.28	6.78	6.86	7.02
Hog grower mash - Moulée de croissance pour porcs	4.10	4.09	4.27	3.44	3.43	3.36	4.50	4.50	4.54
Chick starter mash - Moulée de début pour volailles (18-20%)	5.71	5.64	5.76	4.96	4.97	4.82	5.57	5.61	5.61
Growing mash - Moulée de croissance, pour volailles	4.69	4.67	4.84	3.90	3.88	3.76	5.09	5.11	5.01
Laying mash - Moulée de ponte (17-20%)	4.69	4.71	4.84	3.93	3.91	3.87	5.02	5.01	5.11
Broiler starter mash - Moulée début, poulets de grill (20-23%)	5.63	5.57	5.66	4.95	4.91	4.76	5.48	5.58	5.66
Turkey growing mash - Moulée de croissance, dindons	5.35	5.44	5.47	4.44	4.43	4.36	5.33	5.36	5.44

Note: Mash includes pellets, crumbles, cubes, etc.

Nota: Par pâtée on entend les boulettes, les morceaux, les dés, etc.

(1) To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. — Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande.

(2) The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. — Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957.

(3) Major components for the provincial indexes were presented in the November 1970 issue of *Prices and Price Indexes*. — Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de *Prices and Price Indexes*.

(4) Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. — On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents.

(5) For further detailed explanation see *Prices and Price Indexes* — March 1971. — Pour plus de renseignements, voir *Prices and Price Indexes*. — mars 1971.

(6) For further detailed explanation see occasional paper 62-526. — Pour plus de renseignements, voir le bulletin hors série N° 62-526 au catalogue.

(7) For further detailed explanation see occasional paper 62-533. — Pour plus de renseignements, voir le bulletin hors série N° 62-533 au catalogue.

(1) Indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à revision.

(2 & 3) From Tables 6 and 7. — Provenant des Tableaux 6 et 7.

(4) Weights used to combine wage rate series. — Coefficients de pondération utilisés pour réunir les séries sur les taux de rémunération: (Source: Dept. of Labour)

Labourer — Ouvrier	46
Carpenter — Menuisier-charpentier	30
Painter — Peintre	7
Electrician — Électricien	5
Plumber — Plombier	5
Bricklayer and Mason — Briqueteur et maçon	3
Sheet Metal Worker — Tôlier	2
Truck Driver — Conducteur de camion	2
Total	100

(5) Implicit weights of the 1961=100 arithmetically converted indexes, materials 51.9, wages 48.1. — Coefficients implicites de Pondération obtenus par conversion arithmétique à 1961=100, matériaux 51.9, main-d'oeuvre 48.1.

(6) Implicit weights materials 55.1, wages 44.9. — Coefficients implicites de Pondération, matériaux 55.1, main-d'oeuvre 44.9.

(7 & 8) National Income and Expenditure Accounts, Catalogue 13-001, quarterly. — (N° 13-001 au catalogue, trimestriel).

(8) This series contains an engineering component as well as a building component, and is therefore not precisely comparable in coverage with the non-residential composite index. The implicit price indexes are adjusted for changes in contractors profit and productivity. — Cette série comprend une composante génie aussi bien qu'une composante construction: elle n'a donc pas tout à fait la même portée que l'indice synthétique pour la construction non-résidentielle. Les indices synthétiques sont corrigés des variations des profits et de la productivité des entrepreneurs.

* For further detailed explanation see Prices and Price Indexes — May 1970. Pour des explications détaillées voir Prix et indices de prix — Mai 1970.

Explanation of Methods Used and Additional
Sources for Price Series

Industrial Price Indexes

Industry Selling Price Indexes (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, catalogue No. 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

General Wholesale Index (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities

Explication des méthodes utilisées et sources
supplémentaires des séries de prix

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services,

and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Farm Input Price Indexes (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Canadian Farm Products Price Index (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Indices de prix des entrées dans l'agriculture (1961=100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée de concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère n°s 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

Unit — Unité	Initial and total participation payments 1969-70 and 1970-71 — Paielements initiaux et ensemble des paiements de participation 1969-70 et 1970-71

- (2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
- (3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
- (4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators (1) providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement (1) des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

(1) National Income and Expenditure Division, Statistics Canada.

(1) Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

(2) Industry Selling Price Indexes 1956-1968 Cat. 62-528.

(3) The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I.(2). Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, a cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices of some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'oeuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and right-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se reporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the common and mining stock indexes are Thursday's closing quotations as reported in the Globe and Mail and the Montreal Gazette. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The price reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes express prices as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le Globe and Mail et dans la Montreal Gazette. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Inventors Index and Preferred Index, see Prices and Price Indexes for February 1972.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1972.

Retail Price Indexes

Indices des prix de détail

Consumer Price Index for Canada (1961=100)

Indice des prix à la consommation au Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and time base revisions are available in the occasional paper "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures", Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Consumer Price Indexes for Regional Cities (1961=100)

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Also, city indexes are not as comprehensive in price content as the Canada consumer price index and may underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week B figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 (90.91/80.00x100.0). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages (100.00/80.00x100.0).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustration can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, intercity price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based. For omissions are shelter (both rented and owned), domestic utilities (fuel, light and water), and restaurant meals. While recognizing the importance of shelter differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 (90.91/80.00x100.0). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % (100.0/80.00x100.0).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

A l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada. Les comparaisons omettent de mentionner principalement le logement (location et frais de possession), les services publics au profit des ménages (combustible, éclairage et eau) et les repas pris au restaurant. Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général

valid comparisons between cities are such as to require a good deal more research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1971, and broadens the scope of the study to include several more cities. A fuller explanation of the study from which this table is derived is contained in the November 1968 and November 1969 and April 1972 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number (62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. The updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in this comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent encore pas mal de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les différences entre les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1971, ce tableau élargit la portée de l'étude en y incorporant plusieurs autres villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968, novembre 1969, et avril 1972 de Prices et Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. La mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total Manufacturing) moved 0.4 % higher in July to 127.4 from the June index of 126.9. It was 4.2 % higher than the July 1971 index of 122.3. Of the 101 industry indexes included in the Total, 52 were higher, 12 declined and 37 were unchanged.

In terms of the relative contribution of the overall change in the total manufacturing index, the more notable changes were increases recorded in the wood products group. Each industry within this group showed an upward movement, the most significant being in the sawmills and planing mills industry where prices rose 3.3 %. Advances were also recorded in the foods and beverages industries as further advances in prices in slaughtering and meat packing, and fish products industries outweighed a sharp rollback in the sugar refining industry price index.

The overall effect of those industries recording decreases during the period was small.

June to July Changes in Industry Indexes

Variations de juin à juillet des indices dans l'industrie

	July/June - Juillet/Juin			Major group indexes — Indice des groupes principaux

NOTES SUR LES CHIFFRES DES PRIX ET INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industrie manufacturière (1961=100)

L'indice des prix de vente dans l'industrie pour l'ensemble des industries manufacturières (1961=100) a augmenté de 0.4 %, passant de 126.9 en juin à 127.4 en juillet. Il a avancé de 4.2 % par rapport à juillet 1971 (122.3). Sur les 101 indices d'industrie faisant partie du total, 52 ont augmenté, 12 ont baissé et 37 sont restés inchangés.

En fonction de la contribution relative au changement global de l'ensemble des indices des industries manufacturières, les variations les plus importantes ont été les progressions observées dans le groupe des produits du bois. Il y a eu des hausses dans chacune des industries de ce groupe, la plus importante étant celle observée dans les scieries, où les prix ont augmenté de 3.3 %. On a aussi observé des avances dans le groupe des aliments et boissons, les nouvelles augmentations de prix dans l'industrie de l'abattage et du conditionnement de la viande ainsi que dans le groupe des produits de la pêche ayant plus que compensé la forte baisse de l'indice des raffineries de sucre.

L'effet général des indices qui ont baissé au cours de la période est faible.

General Wholesale Price Index (1935-39=100)

The general wholesale price index moved up 0.5 per cent in July to 308.2 from the June index of 306.7. It was 5.9 per cent higher than the July 1971 index of 291.0. Four major group indexes were higher, while three declined and one was unchanged.

The animal products group index rose 1.3 per cent in July to 377.4 from 372.7 mainly on higher prices for fishery products, cured meats, livestock, eggs, fresh meats and hides and skins. An advance of 1.3 per cent to 430.7 from 425.3 in the wood products group index reflected price increases for spruce, wood pulp, cedar shingles, pine, fir, hemlock and hardwoods. Higher prices for soaps and detergents, paint materials and fertilizer materials were chiefly responsible for an increase of 0.6 per cent to 246.9 from 245.5 in the chemical products group index. The vegetable products group index moved up fractionally to 240.3 from 239.6. Fractional declines were recorded for three major group indexes; non-ferrous metals products to 262.4 from 264.0, non-metallic mineral products to 234.7 from 235.3, textile products to 278.2 from 278.4.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a progressé de 0.5 % entre juin et juillet, passant de 306.7 à 308.2. Il s'agit d'une augmentation de 5.9 % par rapport à juillet 1971 (291.0). Quatre indices de groupe principal ont augmenté, trois ont diminué et un seul est resté inchangé.

L'indice des produits d'origine animale a avancé de 1.3 % en juillet, passant de 372.7 à 377.4 à la suite surtout de la hausse des prix des produits de la pêche, des viandes salées ou fumées, du bétail, des oeufs, des viandes fraîches et des cuirs et peaux. L'indice des produits du bois a augmenté de 1.3 %, passant de 425.3 à 430.7, à la suite de la hausse des prix de l'épinette, de la pâte de bois, des bardeaux en cèdre, du pin, du sapin, de la pruche et des feuillus. L'augmentation des prix des savons et détergents, des peintures et des engrais est la cause principale de l'avance de 0.6 % de l'indice des produits chimiques, qui passe ainsi de 245.5 à 246.9. L'indice des produits chimiques d'origine végétale n'a que très peu progressé, passant de 239.6 à 240.3. On a observé de très légères diminutions dans le cas de trois indices: l'indice des produits métalliques non ferreux, (de 264.0 à 262.4); l'indice des produits minéraux non métalliques (de 235.3 à 234.7) et l'indice des produits textiles (de 278.4 à 278.2).

Security Price Indexes(1961=100)

The investors index of common stock prices increased 0.1 % to 172.4 in July from 172.3 in June. Of the three major groups, industrial eased 0.4 % to 177.5, utilities dropped 0.8 % to 154.4 and finance rose 3.4 % to 175.1. Amongst the thirteen industrial sub-groups, industrial mines down 7.2 % to 116.7, registered the largest loss, followed by chemicals decreasing 3.4 % to 111.7. The largest percentage increase was 3.2 % for pulp and paper to 102.2 followed by petroleum up 2.3 % to 293.2. Food has remained the same since May 1972. In utilities, losses predominated, gas distribution showing the greatest loss of 1.8 % to 186.2, with electric power showing the only increase of 0.4 % to 122.9 %. The finance index rose as banks and investments and loans increased 4.2 % to 204.2 and 1.2 % to 130.6 respectively.

In the same period the index of mining stock prices declined 3.1 % to 115.9 as a result of a decrease in golds of 1.0 % to 129.0 and a loss in base metals of 4.4 % to 109.7.

Of the two supplementary price indexes, uranium showed a decrease of 2.6 % to 186.4 and primary oils and gas showed an increase of 2.9 % to 505.2.

The preferred stock index rose 0.1 % to 70.6 from 70.5 in June.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, moved down 0.3 % to 294.9 in July from the June index of 295.7. Prices were lower for five commodities, higher for eleven and unchanged for fourteen. Principal changes included decreases for raw sugar, copper domestic, steel and raw cotton while increase were recorded for hogs, fir timber, beef hides, raw wool and oats.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 1.4 per cent to 290.3 in July from the June index of 286.4. An increase of 3.1 per cent to 175.9 from 170.6 in the field products index reflected higher prices for potatoes and hay on both Eastern and Western markets, and for barley and oats in the East and flax and rye in the West. Lower prices were shown for corn in the East. The animal products index also rose 0.7 per cent to 404.8 from 402.1 on higher prices for eggs, hogs and raw wool on both markets. Lower prices were shown for lambs, steers and calves on both markets.

Indices des cours des valeurs immobilières (1961=100)

L'indice des cours des actions ordinaires a progressé de 0.1 % de juin (172.3) à juillet (172.4). Parmi les trois grands groupes, les valeurs industrielles ont fléchi de 0.4 % pour se fixer à 177.5; les services publics ont baissé de 0.8 % pour s'établir à 154.4 tandis que les finances ont gagné 3.4 % pour atteindre 175.1. Parmi les treize sous-groupes industriels les mines industrielles ont baissé de 7.2 % pour se fixer à 116.7 (il s'agit de la baisse la plus importante), suivies par les produits chimiques, qui ont diminué de 3.4 % pour s'inscrire à 111.7. Ce sont les pâtes et papiers qui ont le plus monté (3.2 %) pour se fixer à 102.2, suivies par le pétrole, qui a augmenté de 2.3 % pour atteindre 293.2. Les aliments sont restés inchangés par rapport à mai 1972. Pour ce qui est des services publics, les pertes ont dépassé les gains. Ce sont les services de distribution de gaz qui ont le plus fléchi (1.8 %) pour s'établir à 186.2; seule l'énergie électrique devait avancer (0.4 %) pour atteindre 122.9. L'indice des finances a avancé, car les banques et les placements et prêts ont augmenté de 4.2 % et de 1.2 % respectivement, pour s'inscrire à 204.2 à 130.6.

Au cours de la même période, l'indice des titres miniers a baissé de 3.1 % pour s'inscrire à 115.9 à la suite d'un fléchissement de 1.0 % des aurifères (129.0) et de 4.4 % des métaux communs (109.7).

Pour ce qui est des deux indices supplémentaires, l'uranium a diminué de 2.6 % pour s'établir à 186.4, et le pétrole et les gaz primaires ont avancé de 2.9 % pour atteindre 505.2.

L'indice des actions privilégiées a monté de 0.1 %, passant de 70.5 en juin à 70.6.

Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique non pondérée, a diminué de 0.3 % passant de 295.7 en juin à 294.9 en juillet. Les prix de cinq marchandises ont diminué, ceux de onze marchandises ont augmenté et ceux de quatorze autres sont restés inchangés. Les principaux changements ont été des diminutions pour le sucre brut, le cuivre canadien, l'acier et le coton brut et des augmentations pour les porcs, le sapin de charpente, les peaux de bœuf, la laine brute et l'avoine.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur 11 marchés terminaux a progressé de 1.4 %, passant de 286.4 en juin à 290.3 en juillet. L'augmentation de 3.1 % de l'indice des produits de grandes cultures, qui passe de 170.6 à 175.9, est la conséquence de l'avance des prix de la pomme de terre et du foin dans l'Est et dans l'Ouest, des prix de l'orge et de l'avoine dans l'Est et des prix du lin et du seigle dans l'Ouest. On a observé une diminution des prix de maïs dans l'Est. L'indice des produits d'origine animale a lui aussi augmenté (0.7 %) passant de 402.0 à 404.8, à la suite d'une hausse des prix des oeufs, des porcs et de la laine brute sur les deux marchés. On a observé une diminution des prix des agneaux, des bouvillons et des veaux sur les deux marchés.

Consumer Price Movements

The Consumer Price Index for Canada (1961=100) rose 1.2 % to 140.2 in July from 138.5 in June. This increase is larger than the average recorded between these two months in recent years and compares with a June to July increase of 0.8 % last year. The major contributor to this increase in the Consumer Price Index was Food which rose 3.6 % in the latest month. Housing advanced 0.5 % and Clothing 0.2 %. Both the Health and Personal Care, and the Recreation and Reading components rose 0.1 %. The transportation and the Tobacco and Alcohol indexes remained unchanged in the latest month. Between July 1971 and July 1972, the All-Items index advanced 4.5 %.

The Food index advanced 3.6 % to 142.5 in July from 137.5 in June. While this increase was the largest recorded between these two months since before 1961, increases of over 2 % between June and July have occurred four times in the past ten years. In the latest month the price level of food consumed at home rose 4.1 %, while restaurant meal prices moved up 1.2 %. Within the food at home component, indexes for all major groups except fruit, registered advances. Fruit prices fell on average 2.7 % mainly in response to lower quotations for some fresh fruits. In contrast, vegetables rose 9.7 % in price as increases were recorded for most fresh, canned and frozen vegetables surveyed. This latest increase in vegetable prices was the highest recorded between these two months since 1967. However, in the latest month, vegetable prices stood, on average, at their level of a year previous and the fruit index was 0.5 % lower than that of July 1971. The meat, fish and poultry index rose 3 % in the latest month and was almost 14 % above its level of a year earlier. Between June and July, pork and beef rose 5.7 % and 2.9 % respectively, with all cuts priced contributing to the advance, and poultry prices increased 1.3 %. Egg prices rose over 22 % in the latest month in contrast to the small decreases that occurred between June and July in the previous six years. In July, the egg index was over 16 % above its level of a year earlier. The bakery and cereal products component rose 2.2 % between June and July as most items priced, including bread, recorded increases. Most dairy products items also registered advances as butter prices increased in Toronto and Montreal, and fluid and powdered skim milk rose in price in some centres. Amongst other food-stuffs, higher prices were recorded for jam, jelly powder, honey and infants' food. Ground and instant coffee also registered increases but were nevertheless selling at prices lower than a year earlier, and peanut butter decreased in price in the latest month. In the twelve months to July 1972, the Food index advanced 6.9 %, with the price of food consumed at home increasing 6.9 % and that for restaurant meals 6.8 %.

The Housing index advanced 0.5 % to 143.3 in July from 142.6 in June, reflecting increases of 0.4 % and 0.6 % in the shelter and household operation components, respectively. Within shelter, the homeownership index advanced 0.6 %, while rents edged up 0.1 %. Amongst household operation items, electricity prices rose, on average, 2.8 %, mainly as a result of higher rates in some Ontario cities. A 0.5 % rise in furniture prices reflected scattered increases for kitchen sets, bedroom and living room suites, and mattresses. Among other household operation items, glassware, sheets and a number of cleaning supplies registered higher quotations, and wages for household help increased in a number of cities. On the other hand, some floor coverings, dishes and light bulbs moved down in price. In the twelve months since July 1971, the Housing index advanced 4.5 %.

Mouvements des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961=100) est passé de 138.5 en juin à 140.2 en juillet, ce qui représente une augmentation de 1.2 %. Cette hausse est plus forte que l'augmentation moyenne enregistrée entre ces deux mois au cours des dernières années; en 1971, en comparaison, l'augmentation entre juin et juillet avait été de 0.8 %. Le principal facteur de l'avance de l'indice des prix à la consommation est constitué par les aliments, qui ont augmenté de 3.6 % le mois dernier. L'habitation a avancé de 0.5 % et l'habillement de 0.2 %. L'indice des soins personnels et de santé et l'indice des loisirs et de la lecture ont tous deux augmenté de 0.1 %. L'indice des transports et l'indice des tabacs et alcools sont demeurés inchangés. Entre juillet 1971 et juillet 1972, l'indice synthétique a avancé de 4.5 %.

L'indice de l'alimentation est passé de 137.5 en juin à 142.5 en juillet, ce qui représente une augmentation de 3.6 %. Il faut remonter avant 1961 pour trouver une augmentation aussi élevée, on a toutefois enregistré quatre augmentations de plus de 2 % entre juin et juillet au cours des dix dernières années. En juillet 1972, le niveau des prix des aliments consommés à la maison s'est élevé de 4.1 % et celui des repas pris au restaurant s'est élevé de 1.2 %. En ce qui concerne les aliments consommés à la maison, les indices de tous les principaux groupes, sauf celui des fruits, ont augmenté. Le prix des fruits a en, moyenne, diminué de 2.7 %, cette baisse est en majeure partie attribuable à la diminution du prix de certains fruits frais. Par contre, le prix des légumes s'est accru de 9.7 %; cette hausse est attribuable à l'augmentation du prix de la plupart des légumes frais, en conserve et congelés, sur lesquels porte l'enquête. Cette hausse récente du prix des légumes est la plus élevée qui ait été enregistrée entre ces deux mois depuis 1967. Toutefois, le prix moyen des légumes est resté à son niveau de juillet 1971 et l'indice des fruits a fléchi de 0.5 % par rapport à juillet 1971. L'indice de la viande, du poisson et de la volaille a avancé de 3 % pour atteindre un niveau supérieur de près de 14 % à celui de juillet 1971. De juin à juillet, les prix du porc et du boeuf ont respectivement augmenté de 5.7 % et 2.9 % en raison de la hausse de prix de tous les morceaux; le prix de la volaille a augmenté de 1.3 %. Le prix des oeufs a augmenté de plus de 22 %; au cours des six dernières années, le prix des oeufs diminuait légèrement entre ces deux mois. En juillet, l'indice des oeufs était supérieur de plus de 16 % à son niveau de juillet 1971. L'indice des céréales de table et de boulangerie a avancé de 2.2 % de juin à juillet et la plupart des produits observés (y compris le pain) ont enregistré des avances. Le prix de la plupart des produits laitiers a également augmenté du fait de la hausse du prix du beurre à Montréal et à Toronto et de la hausse du prix du lait écrémé liquide et en poudre dans certains centres. Parmi les autres produits alimentaires, on a enregistré une hausse du prix des confitures, de la gelée en poudre, du miel et de la nourriture pour bébés. Le prix du café moulu et du café soluble a augmenté, mais restait inférieur à celui de juillet 1971; le prix du beurre d'arachide a diminué par rapport à juin. Au cours des douze derniers mois, l'indice de l'alimentation a avancé de 6.9 %, le prix des aliments consommés à la maison s'étant accru de 6.9 % et celui des repas pris au restaurant de 6.8 %.

L'indice de l'habitation est passé de 142.6 en juin à 143.3 en juillet; cette augmentation de 0.5 % est attribuable à des hausses respectives de 0.4 % et 0.6 % de l'élément logement et de l'élément entretien de l'habitation. En ce qui concerne l'élément logement, l'indice des frais de propriété a avancé de 0.6 %, alors que les loyers n'ont que légèrement augmenté (0.1 %). Parmi les éléments qui entrent dans l'entretien du ménage, on a enregistré une augmentation moyenne de 2.8 % de l'électricité; cette hausse est en majeure partie attribuable à l'augmentation des tarifs dans certaines villes de l'Ontario. L'augmentation de 0.5 % du prix des meubles est imputable à diverses hausses du prix des matelas et des meubles de cuisine, de chambre à coucher et de salon. Parmi les autres éléments qui entrent dans l'entretien du ménage, on a enregistré une augmentation du prix de la verrerie, des draps et d'un certain nombre de produits d'entretien ménager, et une augmentation des gages versés aux aides domestiques dans un certain nombre de villes. Par contre, les prix des couvre-parquets, de la vaisselle et des ampoules électriques ont diminué dans certains cas. Au cours des douze derniers mois, l'indice de l'habitation a avancé de 4.5 %.

The Clothing index rose 0.2 % to 131.6 in July from 131.3 in June. The only component to register a decrease was children's wear which declined 0.3 % because of sales on boy's slacks and shirts, and girls' cotton dresses. The men's wear index rose 0.2 % as the removal of earlier sale prices for suits, sweaters and socks out-weighed some reductions for windbreakers. Women's wear also rose 0.2 % with increased quotations for cotton dresses and pyjamas outweighing lower prices for dresses made from synthetic material, and lingerie. A 0.8 % advance in footwear prices reflected increases for men's and children's shoes, while higher cotton dress print quotations moved the piece goods index up 0.5 %. Between July 1971 and July 1972, the Clothing index rose 1.9 %.

In July, the Transportation index was unchanged from its June level of 133.6 as a seasonal increase in the train fares index was offset by a decline in the level of automobile operation prices mainly attributable to lower gasoline quotations in some Quebec and Ontario centres. In contrast, motor oil prices advanced in a number of cities across the country, and operators' license fees rose in Ontario. In the twelve months to July 1972, the Transportation index rose 2.7 %.

The Health and Personal Care index rose 0.1 % to 149.1 in July from 148.9 in June solely on higher prices for a number of toiletries including shaving cream, razor blades, cleansing tissues and toilet soap. In July 1972, the Health and Personal Care index stood 4.9 % above its July 1971 level.

The Recreation and Reading index edged up 0.1 % to 139.4 in July from 139.3 in June as a result of higher motion picture admission charges in St. John's, and increased newspaper subscription rates in Charlottetown, Oshawa and Saskatoon. Between July 1971 and July 1972, the Recreation and Reading index increased 2.9 %.

The Tobacco and Alcohol index in July was unchanged from its June level of 132.8 and stood 3.2 % above its level of July 1971. In the latest month, higher cigarette and cigarette tobacco prices were registered in St. John's, but these were insufficient to move the component index.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. The services index rose 0.4 % between June and July mainly in response to higher prices for shelter services, household help, theatre admissions, and automobile licenses. On the other hand, the total commodities index increased 1.6 % mainly because of the 3.6 % advance in food prices. Non-durable commodities excluding food rose in price by 0.3 % chiefly because of higher quotations for clothing, electricity, cleaning supplies, toiletries and newspaper, while increased prices for furniture and glassware moved the durables index up 0.1 %. In the twelve months to July 1972, the services component advanced 5.3 %, while that for commodities increased 4.1 %, the latter largely because of a 6.9 % advance in food prices over the same period. On the other hand, non-durables (excluding food) and durables rose 2.5 % and 1.5 %, respectively, between July 1971 and July 1972.

L'indice de l'habillement est passé de 131.3 en juin à 131.6 en juillet, ce qui représente une augmentation de 0.2 %. Le seul élément qui ait enregistré une diminution est celui des vêtements pour enfants; ces derniers ont baissé de 0.3 % en raison des soldes de pantalons et de chemises pour garçons et de robes de coton pour fillettes. L'indice des vêtements pour hommes a avancé de 0.2 % car l'augmentation des prix entraînés par la fin des soldes sur les costumes, les chandails et les chaussettes a été plus élevée que la diminution des prix des blousons. Le prix des vêtements pour dames a également augmenté de 0.2 % car la hausse du prix des robes de coton et des pyjamas a été plus élevée que la diminution du prix des robes de tissus synthétiques et de la lingerie. L'avance de 0.8 % du prix des chaussures est attribuable à l'augmentation du prix des souliers pour hommes et enfants; la hausse du prix de l'imprimé de coton pour robes a fait avancer de 0.5 % l'indice des tissus à la verge. Entre juillet 1971 et juillet 1972, l'indice de l'habillement a avancé de 1.9 %.

L'indice des transports est resté à son niveau de juin (133.6), l'augmentation saisonnière du prix des billets de train ayant été annulée par la diminution des frais d'entretien des automobiles, diminution attribuable à la baisse du prix de l'essence dans certains centres du Québec et de l'Ontario. En revanche, le prix de l'huile à moteur a augmenté dans un certain nombre de villes du pays et les frais de permis de conduire ont augmenté en Ontario. Au cours des douze derniers mois, l'indice des transports a avancé de 2.7 %.

L'indice des soins personnels et de santé est passé de 148.9 en juin à 149.1 en juillet, ce qui représente une augmentation de 0.1 %; cette hausse est entièrement attribuable à l'augmentation du prix d'un certain nombre d'articles de toilette (crème à raser, lames de rasoir, papiers à démaquiller et savons de toilette). Entre juillet 1971 et juillet 1972, l'indice des soins personnels et de santé a avancé de 4.9 %.

L'indice des loisirs et de la lecture est passé de 139.3 en juin à 139.4 en juillet, ce qui ne représente qu'une augmentation de 0.1 %; cette hausse est attribuable à l'augmentation du prix des billets d'entrée au cinéma à Saint-Jean (T.N.) et des tarifs d'abonnement aux journaux à Charlottetown, Oshawa et Saskatoon. Entre juillet 1971 et juillet 1972, l'indice des loisirs et de la lecture a avancé de 2.9 %.

L'indice des tabacs et alcools est resté à son niveau de juin (132.8); entre juillet 1971 et juillet 1972, il a augmenté de 3.2 %. L'augmentation du prix des cigarettes et du tabac à cigarettes enregistrée à Saint-Jean (T.N.) n'a pas été suffisante pour faire varier l'indice des tabacs et alcools.

Si l'on classe les articles qui entrent dans l'indice du prix à la consommation par biens et services, on obtient une image différente du mouvement des prix à la consommation. Ainsi, l'indice des services a avancé de 0.4 % de juin à juillet; cette hausse est en majeure partie attribuable à l'augmentation du prix des services relatifs au logement, de l'aide domestique, du prix des billets d'entrée au cinéma et du prix des permis de conduire. D'autre part, l'augmentation de 1.6 % de l'indice des biens est en majeure partie attribuable à la hausse de 3.6 % du prix des aliments. L'augmentation de 0.3 % du prix des biens non durables, sauf les aliments, est en majeure partie attribuable à la hausse du prix des vêtements, de l'électricité, des produits d'entretien, des produits de beauté et des tarifs d'abonnement aux journaux; L'avance de 0.1 % de l'indice des biens durables étant imputable à la hausse du prix des meubles et de la verrerie. Au cours des douze derniers mois, l'indice des services a avancé de 5.3 %; l'augmentation de 4.1 % de l'indice des biens au cours de la même période est en majeure partie attribuable à la hausse de 6.9 % du prix des aliments. Entre juillet 1971 et juillet 1972 d'autre part, l'indice des biens non durables (aliments exclus), a avancé de 2.5 % et l'indice des biens durables, de 1.5 %.

TABLE 1. Summary of Current Price Indexes
TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	July 1972 — Juillet	June 1972 — Juin	July 1971 — Juillet	June 1971 — Juin	July 1972 June 1972 — Juillet 1972 Juin 1972	July 1971 June 1971 — Juillet 1971 Juin 1971	July 1972 July 1971 — Juillet 1972 Juillet 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:							
General wholesale index — (1935-39=100)(2) — L'indice général de gros	127.4	126.9	122.3	121.7	+ 0.4	+ 0.5	+ 4.2
Vegetable products — Substances végétales	308.2	306.7 ²	291.0	289.3	+ 0.5	+ 0.6	+ 5.9
Animal products — Produits animaux	240.3	239.6	237.8	237.4	+ 0.3	+ 0.2	+ 1.1
Textile products — Produits textiles	377.4	372.7	323.6	321.5	+ 1.3	+ 0.7	+ 16.6
Wood products — Produits du bois	278.2	278.4	262.2	261.3	- 0.1	+ 0.3	+ 6.1
Iron products — Produits du fer	430.7	425.3 ²	398.9	394.3	+ 1.3	+ 1.2	+ 8.0
Non-ferrous metals — Métaux non ferreux	323.2	323.2	317.4	315.3	—	+ 0.7	+ 1.8
Non-metallic minerals — Minéraux non métalliques	262.4	264.0	262.8	262.0	- 0.6	+ 0.3	- 0.2
Chemical products — Produits chimiques	234.7	235.3 ²	226.7	225.5	- 0.3	+ 0.5	+ 3.5
	246.9	245.5	241.5	239.9	+ 0.6	+ 0.7	+ 2.2
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	290.3	286.4	269.4	269.4	+ 1.4	—	(3)
Western — Total — De l'ouest	327.6	320.8	292.4	293.2	+ 2.1	- 0.3	+ 12.0
Field — Cultures	253.0	252.0	246.4	245.7	+ 0.4	+ 0.3	(3)
Animal — Animaux	175.9	170.6	188.8	189.3	+ 3.1	- 0.3	(3)
	404.8	402.1	350.0	349.6	+ 0.7	+ 0.1	+ 15.7
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	294.9	295.7	266.7	267.2	- 0.3	- 0.2	+ 10.6
Residential building materials — (1961=100) — Matériaux de construction résidentielle	161.1	158.0	148.4	144.8	+ 2.0	+ 2.5	+ 8.6
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	142.5	141.5	135.0	133.8	+ 0.7	+ 0.9	+ 5.6
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	140.2	138.5	134.1	133.0	+ 1.2	+ 0.8	+ 4.5
Food — Alimentation	142.5	137.5	133.3	130.4	+ 3.6	+ 2.2	+ 6.9
Housing — Habitation	143.3	142.6	137.1	136.3	+ 0.5	+ 0.6	+ 4.5
Clothing — Habillement	131.6	131.3	129.1	128.6	+ 0.2	+ 0.4	+ 1.9
Transportation — Transports	133.6	133.6	130.1	130.1	—	—	+ 2.7
Health and personal care — Soins personnels et de santé	149.1	148.9	142.2	142.2	+ 0.1	—	+ 4.9
Recreation and reading — Loisirs et lectures	139.4	139.3	135.5	135.4	+ 0.1	+ 0.1	+ 2.9
Tobacco and alcohol — Tabacs et alcools	132.8	132.8	128.7	128.7	—	—	+ 3.2
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	172.4	172.3	150.0	150.6	+ 0.1	- 0.4	+ 14.9
Industrials — Total — Industriels	177.5	178.2	153.0	153.7	- 0.4	- 0.5	+ 16.0
Industrial mines — Mines industrielles	116.7	125.7	130.0	140.5	- 7.2	- 7.5	- 10.2
Foods — Aliments	140.8	140.8	133.3	137.6	—	- 3.1	+ 5.6
Beverages — Boissons gazeuses	241.2	239.5	190.6	189.6	+ 0.7	+ 0.5	+ 26.5
Textiles and clothing — Textiles et vêtements	186.5	185.0	115.2	112.0	+ 0.8	+ 2.9	+ 61.9
Pulp and paper — Pâte et papier	102.2	98.1	92.4	95.9	+ 3.2	- 3.6	+ 10.6
Printing and publishing — Impression et édition	334.3	335.0	256.7	253.8	- 0.2	+ 1.1	+ 30.2
Primary metals — Métaux primaires	106.6	105.4	95.0	99.0	+ 1.1	- 4.0	+ 12.2
Metal fabricating — Fabrications des métaux	185.2	184.9	160.0	161.1	+ 0.2	- 0.7	+ 15.8
Non-metallic minerals — Minéraux non métalliques	174.8	176.4	141.4	143.1	- 0.9	- 1.2	+ 23.6
Petroleum — Pétrole	293.2	286.7	222.2	207.1	+ 2.3	+ 7.3	+ 32.0
Chemicals — Produits chimiques	111.7	115.6	94.2	87.3	- 3.4	+ 7.9	+ 18.6
Construction — Construction	107.6	106.5	62.9	62.3	+ 1.0	+ 1.0	+ 71.1
Retail trade — Commerce de détail	162.1	164.6	132.8	126.8	- 1.5	+ 4.7	+ 22.1
Utilities — Total — Services publics	154.4	155.6	147.9	148.4	- 0.8	- 0.3	+ 4.4
Pipeline — Pipe-line	186.4	188.8	167.6	166.9	- 1.3	+ 0.4	+ 11.2
Transportation — Transport	312.2	313.3	249.8	251.6	- 0.4	- 0.7	+ 25.0
Telephone — Téléphone	87.5	88.6	94.9	97.1	- 1.2	- 2.3	- 7.8
Electric power — Énergie électrique	122.9	122.4	119.3	118.8	+ 0.4	+ 0.4	+ 3.0
Gas distribution — Distribution du gaz	186.2	189.6	227.2	224.4	- 1.8	+ 1.2	- 18.0
Finance — Total — Finances	175.1	169.3	141.2	141.5	+ 3.4	- 0.2	+ 24.0
Banks — Banques	204.2	196.0	164.1	164.1	+ 4.2	—	+ 24.4
Investment and loan — Placements et prêts	130.6	129.0	106.3	107.1	+ 1.2	- 0.7	+ 22.9
Mining stocks — Actions minier							
General index — Indice général	115.9	119.6	109.8	109.7	- 3.1	+ 0.1	+ 5.6
Gold — Or	129.0	130.3	101.4	98.7	- 1.0	+ 2.7	+ 27.2
Base metals — Métaux communs	109.7	114.8	115.4	116.6	- 4.4	- 1.0	- 4.9
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	186.4	191.4	146.9	159.7	- 2.6	- 8.0	+ 26.9
Primary oils and gas — Pétrole et gaz primaires	505.2	491.2	476.8	451.1	+ 2.9	+ 5.7	+ 6.0

) Gross weighted, including inter-industry shipments. For explanation see page 79. — Indice pondéré brut comprenant les livraisons inter-industrielles.
) Pour toute explication, voir page 79.
) Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.
) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1970 are subject to revision. See notes page 80 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1970 sont sujets à révision. Voir les renvois de la page 80 pour les prix détaillés des grains de l'ouest.

TABLE 2. INDUSTRY SELLING PRICE INDEXES BY INDUSTRY AND SELECTED COMMODITIES
TABLEAU 2. INDICE DES PRIX DE VENTE DANS L'INDUSTRIE PAR INDUSTRIE ET PAR CERTAINS PRODUITS
1961=100

Industries and selected commodities(1) Industrie et certains produits(1)		Month - Mensuel												Annual Annuel
		J	F	M	A	M	J	J	A	S	O	N	D	
FOODS AND BEVERAGES INDUSTRIES - INDUSTRIES DES ALIMENTS ET BOISSONS.		1968	114.1	113.8	113.3	113.5	114.1	115.4	115.8	116.7	117.2	117.0	117.7	115.5

	1972	124.5	125.2	125.8	126.4	126.7	126.9	127.4						

(1) Indexes for 1972 are subject to revision. - Les indices pour 1972 sont sujets à révision.

(2) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels:

	Old Series Ancienne série	New series Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

(1) Includes gold. - Y compris l'or. (2) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or. (3) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros. (4) Excludes gold. - Sauf l'or. (5) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

(1) Final to July 1970. See page 80 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. - Indices définitifs jusqu'en juillet 1970. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 80 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

(2) All indexes for current year are subject to revision. - Les données de l'année courante sont sujettes à révision.

TABLE 4. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 4. Indices des prix de gros de certains produits bruts(1)

(1935-39=100)

Primary commodities — Produits bruts	Months — Mois				Annual averages — Moyenne annuelle		
	July 1972 Juillet	June 1972 Juin	July 1971 Juillet	June 1971 Juin	1971	1970	1969
Asbestos, crude — Amiante brut	429.7	429.7	429.7	411.6	420.6	411.6	399.7
Beans, cocoa — Graines de cacao	645.1	645.1	603.4	540.8	582.7	752.7	1,032.8
Beans, coffee — Grains de café	382.5	335.8	303.6	307.0	317.4	391.7	302.6
Copper, electrolytic — Cuivre électrolytique ...	463.8	490.6	501.1	494.1	492.5	541.6	483.6
Cotton, raw — Coton brut	335.5	336.4	294.1	294.5	292.1	282.0	276.3
Eggs — Oeufs	138.4	121.9	111.8	113.0	122.1	139.6	161.7
Fruits, fresh — Fruits frais	214.0	227.6	210.6	216.5	230.0	229.6	225.8
Grains — Céréales	188.3	186.4	198.9	196.7	192.3	193.7	200.4
Hides and skins — Cuirs et peaux vertes	290.2	280.7	146.2	156.8	157.6	171.4	185.6
Lead, electrolytic — Plomb électrolytique	335.4	335.4	283.0	283.0	283.0	331.0	318.8
Livestock — Bétail	475.7	472.4	383.8	386.1	386.0	396.2	400.3
Nickel	474.1	474.1	474.1	474.1	474.1	474.8	390.6
Onions — Oignons	425.6	250.5	197.9	159.1	180.8	261.6	221.9
Potatoes — Pommes de terre	241.3	180.6	259.7	224.7	194.2	247.2	170.5
Rubber, raw — Caoutchouc brut	109.2	106.7	109.2	120.5	117.4	140.8	179.3
Scrap iron and steel — Déchets de fer et d'acier	269.5	269.4 ^r	273.2	276.9	284.2	328.9	250.0
Silver — Argent	443.9	399.2	413.2	428.2	405.6	478.1	497.5
Steers — Bouvillons	616.6	623.4	552.9	554.9	548.8	510.8	496.6
Sugar, raw — Sucre brut	206.9	239.3	169.7	170.5	178.7	160.9	144.1
Tin — Étain	336.8	334.4	326.5	321.3	324.2	349.6	338.0
Wool, raw domestic — Laine brute indigène	181.2	176.0	136.4	137.4	141.1	152.4	169.1
Wool, raw, imported — Laine brute importée	179.7	180.1	134.8	135.6	135.0	149.3	163.0
Zinc, prime, western — Zinc de première qualité, de l'Ouest	422.5	422.5	355.8	355.8	357.6	341.0	326.1

(1) All indexes for current year are subject to revision. — Les données de l'année courante sont sujettes à révision.

ALL-ITEMS Consumer Price Index Converted to 1949=100 — July 1972 — L'indice des prix à la consommation de tous les éléments converti à 1949=100 — juillet 1972 181.

TABLE 9. Consumer Price Indexes — Main Groups, Selected Components and Supplementary Classification(1)

TABLEAU 9. Indices des prix à la consommation — Groupes principaux, éléments choisis et répartition supplémentaire(1)
(1961=100)

	July 1972 Juillet	June 1972 Juin	July 1971 Juillet	June 1971 Juin	1971	1970	1969
All-items index — Indice de tous les éléments ..	140.2	138.5	134.1	133.0	133.4	129.7	125.5
Food — Alimentation	142.5	137.5	133.3	130.4	131.4	130.0	127.1
Food at home — Aliments consommés à la maison	138.6	133.2	129.6	126.5	127.4	126.8	124.7
Dairy products — Produits laitiers	148.8	148.5	139.7	139.3	140.7	134.7	133.1
Cereal products — Produits céréaliers	131.9	129.1	128.1	127.6	126.9	124.1	121.5
Miscellaneous groceries — Denrées diverses	131.4	130.4	125.3	124.7	124.6	122.1	118.2
Beef — Boeuf	160.2	155.7	147.0	145.1	144.3	140.7	136.7
Pork — Porc	134.6	127.4	107.3	107.4	109.6	128.1	130.6
Fresh pork — Porc frais	146.5	139.1	116.8	115.6	119.0	132.3	136.0
Cured pork — Porc salé	124.2	117.2	99.0	100.2	101.4	124.4	126.0
Other meats — Autres viandes	148.6	146.6	133.4	133.0	133.1	135.6	128.6
Fish — Poisson	182.6	179.2	157.1	156.4	157.0	150.6	136.0
Poultry — Volaille	127.3	125.7	111.9	107.8	108.9	105.8	109.2
Eggs — Oeufs	96.0	78.6	82.5	83.0	87.3	99.0	109.9
Dairy products including butter — Produits laitiers (y compris le beurre)	139.2	138.9	130.8	130.5	131.9	127.0	125.9
Fats and oils including butter — Huiles et matières grasses (y compris le beurre) ...	110.2	109.7	105.3	105.4	106.2	104.4	103.7
Fats and oils excluding butter — Huiles et matières grasses (sans le beurre)	114.5	113.5	113.2	114.0	112.6	110.6	105.6
Fruit — Total — Fruits	141.7	145.6	142.4	141.9	127.7	118.1	119.3
Fresh fruit — Fruits frais	152.4	159.1	155.7	155.5	132.7	116.0	117.4
Canned fruit — Fruits en conserve	122.4	121.0	117.9	116.9	117.7	120.5	121.4
Vegetables — Total — Légumes	148.6	135.4	148.6	139.4	130.7	133.9	129.9
Fresh vegetables — Légumes frais	159.9	140.7	162.1	148.4	135.0	138.4	133.0
Canned vegetables — Légumes en conserve ..	127.4	125.9	123.0	122.3	123.3	126.8	125.4
Direct imports(2) — Importations directes(2)	135.0	139.8	136.1	136.8	124.7	115.8	112.3
Restaurant meals — Repas consommés au restaurant	171.9	169.9	161.0	159.8	161.0	154.1	144.9
Housing — Habitation	143.3	142.6	137.1	136.3	136.8	130.9	124.7
Shelter — Logement	157.8	157.1	149.6	148.8	149.7	141.8	133.1
Tenant costs — Charges locatives	124.3	124.1	122.5	122.4	122.5	120.3	116.3
Home-ownership costs — Frais de possession	188.2	187.0	174.1	172.7	174.3	161.3	148.3
Property taxes — Taxes foncières	160.8	160.8	158.4	158.4	158.6	154.3	143.9
Mortgage interest — Intérêt hypothécaire .	216.4	212.9	201.2	196.8	198.6	177.0	156.0
Repairs — Réparations	170.1	170.0	156.5	156.2	157.8	147.7	135.7
New houses — Maisons neuves	192.2	191.3	173.2	172.1	173.8	161.4	151.6
Personal property insurance — Assurance sur l'immeuble	237.7	237.7	185.4	185.4	197.1	160.8	152.3
Household operation — Entretien du ménage	123.9	123.1	120.3	119.6	119.6	116.1	113.5
Fuel — Combustible	118.8	118.8	114.7	114.5	113.7	105.5	103.1
Coal — Charbon	150.0	150.0	145.5	145.5	145.2	134.1	126.0
Fuel oil — Mazout	115.5	115.5	110.3	110.3	108.8	99.2	97.2
Domestic gas — Gaz	102.9	102.9	102.7	101.8	102.2	100.8	102.0
Electricity — Electricité	131.3	127.7	126.9	125.5	126.1	121.9	112.2
Home furnishings — Articles d'ameublement ..	119.3	119.0	117.1	116.9	116.7	115.6	114.0

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies (1961=100)

	July 1972 Juillet	June 1972 Juin	July 1971 Juillet	June 1971 Juin	1971	1970	1969
<u>Dairy products - Produits laitiers</u>							
Milk, fresh - Lait frais	150.9	150.8	143.9	143.7	145.1	138.9	137.1
Milk, evaporated - Lait évaporé	136.7	134.1	120.6	120.0	119.6	112.5	112.9
Powdered skim milk - Poudre de lait écrémé	158.7	155.2	142.8	141.8	139.9	130.3	128.3
Butter, creamery, first grade - Beurre de crèmerie 1 ^{re} qualité	108.8	108.4	102.7	102.5	104.0	102.3	103.0
Cheese, plain, processed - Fromage ordinaire fondu	147.7	147.3	131.9	132.0	133.4	130.3	127.9
<u>Poultry and eggs - Volaille et oeufs</u>							
Chicken, grade A evisc. - Poulet, qualité A, évis- céré	131.5	129.9	115.9	110.6	112.0	107.7	111.2
Turkey, grade A evisc. - Dinde, qualité A, éviscérée	108.8	107.3	94.6	96.0	95.8	99.1	101.6
Eggs, fresh, grade A large - Oeufs frais, qualité A gros	96.0	78.6	82.5	83.0	87.3	99.0	109.9
Eggs, fresh, grade A medium - Oeufs frais, qualité A moyens	91.5	83.2	83.4	88.0	86.8	98.6	114.1
<u>Beef - Boeuf</u>							
Sirloin steak - Bifteck de faux filet	160.4	151.5	149.4	145.0	143.4	139.7	139.3
Round steak - Bifteck dans la ronde	160.5	157.3	149.3	148.5	148.0	143.7	135.6
Prime rib roast(1) - Rôti de plat de côtes(1)	157.0	154.1	143.9	142.1	139.9	134.4	133.5
Blade roast(2) - Rôti de haut-côte(2)	149.7	149.3	135.1	134.0	133.1	133.5	131.8
Stewing beef - Boeuf pour ragoût	158.2	155.6	145.5	145.4	145.9	142.1	138.3
Hamburg - Boeuf haché	170.2	166.6	149.3	147.8	148.5	144.8	138.8
Liver, sliced - Foie en tranches	142.7	142.2	119.1	116.4	119.1	132.3	115.3
<u>Pork - Porc</u>							
Rib chops, fresh - Côtelettes fraîches	156.3	147.3	119.2	117.8	122.7	137.2	140.8
Shoulder roast, Boston butt, fresh - Rôti dans l'épaule, soc de Boston, frais	129.5	123.4	101.3	99.2	102.4	120.5	129.9
Sausage, pure pork - Saucisse pur porc	131.7	127.8	119.8	119.9	119.6	127.2	127.4
Bacon, side, fancy, sliced, rind off - Bacon, flanc, de fantaisie, en tranches, sans couenne	102.2	94.9	73.4	76.5	76.4	102.2	101.1(6)
Ham, smoked, boneless(3) - Jambon fumé, désossé(3)	140.9	127.7	113.8	113.4	115.4	135.2	138.4
<u>Other meats - Autres viandes</u>							
Lamb, leg roast - Agneau, gigot	121.2	121.7	114.2	112.8	113.7	114.8	109.1
Veal, loin chops, rib end - Veau, côtelettes, bout de côte	192.0	186.8	165.1	164.0	165.0	162.6	151.5
Wieners or frankfurters - Saucisses de Francfort ...	130.2	129.4	119.8	120.5	119.0	121.5	120.1
Meat loaf, canned, mainly pork - Pain de viande, en conservation, principalement de porc	121.3	120.1	122.7	123.3	123.0	130.7	125.0
<u>Fish - Poisson</u>							
Cod fillets, frozen(5) - Filets de morue, conge- lés(5)	221.2	213.8	163.8	160.1	160.6	143.3	135.4
Salmon, canned, fancy pink - Saumon, en boîte, de fantaisie, rose	146.3	146.0	142.1	141.5	143.0	144.1	129.9
<u>Fats and oils - Huiles et corps gras</u>							
Margarine	110.1	109.0	115.2	118.5	114.8	112.1	105.5
Lard, pure - Saindoux pur	117.9	115.7	109.7	110.4	111.4	118.7	103.6
Shortening	123.4	123.1	119.8	119.8	118.7	114.1	109.4
Salad dressing - Vinaigrette	111.0	109.9	106.1	105.0	105.4	104.7	102.7
<u>Cereals and bakery products - Céréales et produits de la boulangerie</u>							
Flour, white, all purpose - Farine blanche, tout usage	135.2	134.5	132.7	132.1	131.3	133.5	134.3
Corn flakes - Flocons de maïs	119.3	118.3	123.4	122.7	119.6	117.4	116.2(7)
Macaroni - Macaronis secs	126.5	124.9	126.1	126.1	126.0	126.4	119.4
Cake mix, white - Mélange à gâteaux, blanc	124.3	121.0	119.6	117.1	118.5	122.1	123.5
Bread, plain, white, wrapped, sliced - Pain blanc uni, enveloppé, coupé	137.1	132.8	131.5	131.3	130.5	125.5	123.8
Soda crackers - Craquelins	117.9	118.0	115.4	114.7	113.1	117.9	116.3
<u>Sugar and sweets - Sucre</u>							
Sugar, granulated - Sucre cristallisé	160.3	160.2	127.9	128.6	126.9	117.2	113.0
Jam, strawberry(4) - Confiture de fraises(4)	125.7	123.2	124.1	123.3	122.7	126.4	120.8
Honey, No. 1, white - Miel n° 1, blanc	156.9	154.9	125.9	125.7	127.0	127.8	125.4

See footnote(s) at end of table. - Voir renvoi(s) à la fin du tableau.

TABLE 10. Consumer Price Indexes for Canada - Selected Food Items - Concluded

TABLEAU 10. Indices des prix à la consommation pour le Canada - Denrées alimentaires choisies - fin (1961=100)

	July 1972 Juillet	June 1972 Juin	July 1971 Juillet	June 1971 Juin	1971	1970	1969
Fruits							
Oranges, Californian, medium size (138) - Oranges de Californie, moyennes (138)	103.5	101.9	113.7	112.5	111.9	102.5	100.5
Grapefruit, white, 48's - Pamplemousses blancs, 48	176.7	163.9	196.5	186.2	154.8	140.9	122.3
Bananas, yellow - Bananes jaunes	79.7	84.8	83.7	78.6	76.2	85.7	90.7
Apples, volume seller - Pommes du type le plus vendu	134.4	127.2	141.9	132.7	118.8	112.8	128.0
Strawberries, frozen, fancy - Fraises congelées de fantaisie	120.2	119.5	121.3	121.4	121.6	127.6	122.9
Orange juice, conc., frozen, fancy - Jus d'orange concentré et congelé, de fantaisie	106.0	105.6	99.5	97.7	99.3	101.1	106.9
Apple juice, choice - Jus de pomme de choix	113.7	106.7	101.5	102.2	101.4	107.6	113.0(8)
Orange juice, unsweetened - Jus d'orange non sucré	113.8	114.8	108.8	107.8	108.9	108.6	109.5
Pears, canned, choice - Poires en conserve de choix	124.5	123.5	120.8	119.8	120.7	123.7	121.4
Peaches, canned, choice, halves - Pêches en conserve, de choix, moitiés	139.8	138.2	135.8	134.4	135.5	139.0	140.4
Pineapple, Hawaiian, sliced - Ananas de Hawaii, en tranches	96.2	95.0	97.0	95.5	96.1	100.2	99.8
Raisins, Californian and Australian - Raisins secs de Californie et d'Australie	148.5	148.4	150.6	150.8	150.2	153.0	149.2
Vegetables - Légumes							
Potatoes, No. 1 table - Pommes de terre n° 1 de table	153.8	117.7	144.6	131.4	114.7	134.0	123.1
Onions, No. 1 cooking - Oignons n° 1 à cuire	217.0	131.1	136.1	122.0	128.5	157.4	136.4
Carrots - Carottes	135.6	148.3	193.6	178.4	123.4	109.1	108.8
Turnips, Canada No. 1 - Navet canadien n° 1	193.9	158.7	131.2	124.6	125.1	171.0	141.8
Cabbage - Chou	166.6	182.9	179.7	210.9	150.4	167.4	145.2
Tomatoes, fresh - Tomates fraîches	178.6	176.0	186.8	146.8	162.2	143.7	140.5
Celery stalks, green - Céleri en branche, vert	157.7	144.9	159.7	154.5	141.6	150.3	146.7
Lettuce, head, fresh - Laitue pommée fraîche	142.7	126.1	155.3	146.6	160.8	139.9	158.1
Green peas, frozen, fancy - Pois verts congelés, de fantaisie	120.8	120.5	117.6	120.6	118.1	116.1	115.0
Green beans, fr. cut, frozen - Haricots verts coupés, congelés	105.6	104.7	102.8	102.5	102.7	102.4	102.2
Tomatoes, canned, choice - Tomates en boîte, de choix	131.2	128.3	129.2	128.3	128.9	131.6	126.7
Peas, canned, choice - Pois en boîte, de choix	122.6	121.8	115.5	115.3	117.0	125.7	126.5
Corn, canned, cream, choice - Maïs en boîte, en crème, de choix	121.6	120.4	120.2	119.7	119.9	124.7	123.3
Infants' food, vegetable - Aliments pour bébés, légumes	132.7	131.3	123.9	123.6	124.8	118.9	120.1
Beans, with pork and tomato sauce - Haricots au porc à la sauce tomate	131.7	133.5	131.9	130.9	131.6	129.3	126.8
Soup, vegetable - Soupe aux légumes	99.6	99.0	99.5	98.4	99.3	99.7	97.9
Tomato juice, fancy - Jus de tomate de fantaisie ...	108.5	104.6	101.2	100.2	100.4	100.3	98.9(8)
Beverages - Breuvages							
Tea bags - Thé, sachets, orange pekoe	103.9	103.3	102.2	100.2	100.3	101.9	102.5
Coffee, medium quality - Café, qualité moyenne	125.8	123.4	134.0	133.8	132.2	132.4	115.5
Coffee, instant, dried - Café instantané, séché	111.3	110.7	112.7	112.4	112.3	112.9	107.2
Miscellaneous Groceries - Denrées diverses							
Tomato catsup - Ketchup aux tomates	122.4	120.5	116.1	113.2	115.9	112.6	111.6
Peanut butter, plain - Beurre d'arachides, ordinaire	129.1	131.8	138.0	138.0	136.9	139.8	125.0
Pickles, sweet, mixed - Cornichons sucrés variés ...	133.8	134.0	129.1	128.6	127.7	125.3	121.4
Jelly powders, flavoured - Gelée en poudre aromatisée	127.4	123.6	123.7	120.9	121.5	118.0	117.1

- (1) Includes cuts with bone-in and boned and rolled. - Y compris les morceaux avec os, sans os et roulés.
- (2) Includes cuts with blade-in and blade removed. - Y compris les morceaux avec ou sans palette.
- (3) Indexes based on chain store prices in 7 cities. - Les indices sont fondés sur les prix dans les magasins à succursales multiples de 7 villes.
- (4) Indexes based on prices for pectin and pure jam combined. - Les indices sont basés sur les prix de la confiture avec pectine et de la confiture pure.
- (5) Indexes based on prices in 16 cities. - Les indices sont fondés sur les prix dans 16 villes.
- (6) 1965=100. - 100 en 1965.
- (7) 1963=100. - 100 en 1963.
- (8) June 1968=100. - 100 en juin 1968.

TABLE 11. Consumer Price Indexes, Regional Cities, 1962-72(1)

TABEAU 11. Indices des prix à la consommation, agglomérations urbaines, 1962-72(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 13. - Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au Tableau 13.

For explanation see page 87. — Pour de plus amples explications, voir la page 87.
The shelter element of regional cities housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and homeownership costs. See also page 87. — Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir la page 87.

(3) Includes shelter and household operation. The shelter element of regional city housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and home-ownership costs. See also page 87. — Comprend le logement et l'entretien du ménage. Au niveau des agglomérations urbaines, l'élément logement de l'indice de l'habitation varie selon les changements dans les prix des loyers; par contre, au niveau du Canada, l'élément logement tient compte à la fois des changements dans les prix des loyers et dans les frais de possession d'une maison. Voir aussi la page 87.

To assist comparison with other published series the indexes presented have been arithmetically converted from 1956=100 to 1961=100. The 1956=100 indexes are available on request. — Afin de faciliter la comparaison avec les autres séries publiées, les indices qui figurent ici ont été l'objet d'une conversion arithmétique portant l'indice à 100 en 1961 au lieu de 1956. Les indices calculés sur la base de 100 en 1956 sont fournis sur demande. The years referred to are fiscal years. For example 1956 represents the period April 1, 1956 to March 31, 1957. — Les années données ici sont des années financières. Par exemple, l'année 1956 représente la période allant du 1^{er} avril 1956 au 31 mars 1957. Major components for the provincial indexes were presented in the November 1970 issue of *Prices and Price Indexes*. — Les principaux éléments des indices pour les provinces ont paru dans la livraison de novembre 1970 de *Prices and Price Indexes*. Direct comparisons should not be made between this index and the highway index published by the Ont. Dept. of highways. The item content of the indexes is different. — On ne peut comparer directement cet indice avec celui de la voirie publié par le Ministère de la voirie de l'Ontario. Les éléments des deux indices sont différents. For further detailed explanation see *Prices and Price Indexes* — March 1971. — Pour plus de renseignements, voir *Prices and Price Indexes*. — mars 1971. For further detailed explanation see occasional paper 62-526. — Pour plus de renseignements, voir le bulletin hors série N° 62-526 au catalogue. For further detailed explanation see occasional paper 62-533. — Pour plus de renseignements, voir le bulletin hors série N° 62-533 au catalogue.

supplémentaires des séries de prix

Industrial Price Indexes

Indices des prix industriels

Industry Selling Price Indexes (1961=100)

Indices des prix de vente dans l'industrie (1961=100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes or the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue No. 62-528.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", n° 62-528 au catalogue.

Industry Selling Price Index: Manufacturing

Indices des prix de vente dans l'industrie: Industries manufacturières

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix des livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

General Wholesale Index (1935-39=100)

Indice général des prix de gros (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of many marketing functions.

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

Though general wholesale price indexes have been calculated by many countries for years there is no definite answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate, like a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services,

and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue No. 62-501).

Farm Input Price Indexes (1961=100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961=100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39=100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, Farm Input Price Indexes, 1961=100, Catalogue No. 62-534, and is reproduced in the September 1971 issue of Prices and Price Indexes, Catalogue No. 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, Farm Input Price Indexes, 1961=100, Catalogue No. 62-004, and in the monthly publication Prices and Price Indexes, Catalogue No. 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Canadian Farm Products Price Index (1935-39=100)

Wheat prices used in the index are buying prices of the Canadian Wheat Board for Nos. 1, 2 and 3 Manitoba Northern at Thunder Bay. Prices for western oats and barley are also supplied by the Wheat Board and quotations relating to No. 2 C.W., No. 3 C.W. and No. 1 Feed Oats and to Nos. 1 and 2 feed barley are included in the price index. Initial payments are first used in the index calculation and are revised as further payments are announced.

Final payments for the crop year August 1969 - July 1970 were announced on February 4, 1971 for oats and barley, and on June 17, 1971 for wheat.

sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (Vol. 23) (n° 62-501 au catalogue).

Indices de prix des entrées dans l'agriculture (1961=100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961=100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39=100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série Farm Input Price Indexes, 1961=100 (n° 62-534 au catalogue) contient une description détaillée de concepts, des méthodes et des sources de données qui est reprise dans Prices and Price Indexes de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel Farm Input Price Indexes, 1961=100 (n° 62-004) et dans le bulletin annuel Prices and Price Indexes (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de le publier.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix du blé canadien sur lesquels on se base pour calculer l'indice sont les prix payés par la Commission canadienne du blé pour les numéros 1, 2 et 3 Manitoba-nord à Thunder Bay. Les prix de l'avoine et de l'orge de l'Ouest sont également établis par la Commission du blé et les cotes se rapportant au numéro 2 O.C., au numéro 3 O.C. et à l'avoine fourragère n° 1 ainsi qu'à l'orge fourragère n° 1 et 2 font partie de l'indice des prix. Pour calculer l'indice on se sert d'abord des premiers paiements et on les rectifie à mesure que d'autres paiements sont annoncés.

Les paiements définitifs pour la campagne agricole allant d'août 1969 à juillet 1970 ont été annoncés le 4 février 1971 en ce qui concerne l'avoine et l'orge, et le 17 juin en ce qui concerne le blé.

- 1) Used in original indexes from August 1969 to July 1970. — Utilisé dans les premiers indices d'août 1969 jusqu'en juillet 1970.
- 2) Incorporated retroactively in revised final indexes August 1969 to July 1970. — Inclus rétroactivement dans les indices finals révisés d'août 1969 à juillet 1970.
- 3) Used in indexes August 1970 to present. — Utilisé dans les indices d'août 1970 jusqu'à présent.
- 4) Not yet announced by Wheat Board. — Pas encore annoncé par la Commission canadienne du blé.

Residential and Non-Residential Building Construction Price Indexes

The fixed-weighted input price indexes of materials and wage rates for residential and non-residential building construction are being published here for the convenience of users (Table 20). A more complete description of the characteristics of the indexes appeared in the May 1970 issue of Prices and Price Indexes, and this explanation is available on request from the Prices Division, as is historical monthly data for the series.

Because the indexes measure the impact of price change on the materials and labour inputs to construction, and not the effects of changes in profit margins or productivity, there is thought to be an upward bias in these indexes as indicators of price change for the output of building construction, or buildings in place. Users are therefore warned to exercise caution in making use of the series, for this purpose. A comparison of these series with the implicit price deflators⁽¹⁾ providing an estimate of price change for the output of the industry, derived from the measurement of gross fixed capital formation in constant dollars, will provide some insight into the effects on the price movement of

Indices des prix de la construction résidentielle et non résidentielle

Les indices à pondération fixe des prix des entrées de matériaux et de salaires dans la construction résidentielle et non résidentielle sont publiés ici pour faciliter la tâche aux utilisateurs (Tableau 20). On trouvera une description plus détaillée des caractéristiques des indices dans Prices and Price Indexes de mai 1970. On peut s'en procurer un exemplaire ainsi que les données mensuelles chronologiques sur cette série en s'adressant à la Division des prix.

Comme les indices mesurent l'influence des variations de prix sur les entrées de matériaux et de main-d'oeuvre du bâtiment plutôt que les répercussions des variations de marges bénéficiaires ou de productivité, on les croit surestimés en tant qu'indicateurs des variations de prix de la construction, ou des bâtiments construits. Les utilisateurs devront donc faire preuve de discernement quant ils se serviront des séries à cette fin. Si l'on compare ces séries avec les facteurs de dégonflement⁽¹⁾ des prix implicites (qui donnent une estimation de la variation du prix pour la production de l'industrie), obtenus en mesurant la formation brute de capital fixe en dollars constants, on aura un aperçu des effets de l'ajustement sur l'évolution des prix des indices à pondération fixe des entrées pour

⁽¹⁾ National Income and Expenditure Division, Statistics Canada.

⁽¹⁾ Division du revenu national et de la défense nationale, Statistique Canada.

adjusting the fixed-weighted input indexes for changes in productivity and profit margins.

During the period from 1926-1966 a special sample of respondents supplied materials prices for the index. As of 1961 this sample has been replaced with prices from the ISPI system(2). The latter are published monthly in Table 2 of this publication.

The Construction wage rate series is based on wage rate material supplied by the Labour Standards Branch, Dept. of Labour, and relates to minimum wages paid on government contracts for construction in a variety of trades and cities.

Users are reminded that the indexes were arithmetically rebased to the year 1961=100 and therefore combining the components with the weights as shown will not provide the composite index provided. Users able to provide their own weights for the components can recombine the components to suit their particular needs.

Price Indexes of Machinery & Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Highway Construction Price Indexes (1961=100) (3)

The Price Indexes of Highway Construction in Canada express prices paid by provincial governments in contracts awarded for highway construction each year, as a percentage of prices paid in 1961. The arithmetic conversion of the indexes to a 1961 time base does not change their percentage movements as compared to the

tenir compte des variations de productivité et de marges bénéficiaires.

Au cours de la période 1926-1966, un échantillon spécial d'enquêtés a donné les prix pour l'indice. En 1961, on a remplacé cet échantillon par les prix tirés du système I.P.V.I. (2) Ces prix sont publiés par mois dans le Tableau 2 du présent bulletin.

La série consacrée au taux de rémunération dans l'industrie du bâtiment est basée sur les chiffres fournis par la Direction des normes du travail du ministère du Travail; elle a trait au salaire minimum versé aux termes de marchés signés avec le gouvernement pour des travaux de construction dans divers corps de métiers et dans diverses villes.

Nous rappelons aux utilisateurs que les indices ont été recalculés sur la base 1961=100 et qu'ils n'obtiendront pas l'indice synthétique fourni en combinant les éléments et les pondérations donnés. Les utilisateurs qui sont à même de fournir leur propre pondération pour les éléments peuvent procéder à leur propre combinaison adaptée à leurs besoins spécifiques.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente des fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labor Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix des marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de la construction routière (1961=100) (3)

Les indices des prix de la construction routière au Canada représentent les prix payés chaque année par les administrations provinciales au titre des marchés de construction routière, en pourcentages des sommes payées en 1961. La conversion des indices à la base 1961=100 ne modifie pas leur évolution en pourcentages comparativement aux indices publiés

(2) Industry Selling Price Indexes 1956-1968 Cat. 62-528.

(3) The years refer to fiscal years. Thus 1968 refers to the period April 1, 1968 to March 31, 1969.

(2) Indices des prix de vente dans l'industrie, 1956-1968, n° 62-528 au catalogue.

(3) Il s'agit d'exercices financiers. 1968 représente donc la période du 1^{er} avril 1968 au 31 mars 1969.

previously published indexes to a 1956=100 time base. Users are warned that an aggregation of the converted major group indexes with the published weights will not yield the published 1961=100 all items indexes. The conversion does not create this problem for a user wishing to reweight the converted major group indexes using weights appropriate to his own purpose.

Base-weighted indexes are published annually and measure, for the period 1956 to 1968, the effect of price change on the cost of specific programmes of highway construction in Canada represented by highway construction contracts of approximately \$50,000 or more awarded by specified provincial governments during the weight-base period. Weights of items in the index, representing the relative importance of units of construction in the year 1956 are held constant. Only the estimates of prices change from year to year, and the indexes thus measure the movement of prices through time. For a more complete statement of the problems of estimating price change for highway construction see pages vi & vii of the December 1967 issue of Prices and Price Indexes, Catalogue 62-002 and pages 9 & 10 of the reference paper Price Indexes of Highway Construction in Catalogue 62-520. The all-items index or its components are useful for planning and budgeting for highway construction programmes, in escalating or up-dating previously costed roadwork, in estimating replacement cost of previously completed roadwork, and as historical measurements of price trends in highway construction.

The indexes do not necessarily reflect the price movements of non-contract construction or maintenance work. The indexes are designed to measure price changes for a fixed programme of highway construction, in each of the seven provinces. Because price levels in the time base-period (1961) varied from province to province the indexes cannot be used to compare price differences between provinces, but only to compare differences in the rate at which prices are changing in the provinces.

Prices contained in the index are not for units of labour and materials as is usually the case in construction price indexes but rather for units of construction work put in place such as an acre of clearing, cubic yard of earth excavation or a ton of bituminous hot-mix paving. In addition, the index contains prices for some materials, such as culvert pipe, usually supplied to the contractor by the highway departments. Prices of highway construction work are annual weighted averages of bid prices of units of construction in groups of contracts awarded, classified by price-determining characteristics of the contracts and the bid items such as volume of the bid item, type of contract and geographic location. Prices of material items of supply are prices paid by government departments to suppliers.

Price Indexes of Electric Utility Construction

In electric utility terms, the index is designed to provide an estimate of the impact of price change on the cost of materials, labour and equipment used in constructing and equipping electric utilities in a specified base period. The index provides an estimate of how much more, or less it would cost to reproduce the base-period programme of construction in another period, using the same construction technology as in the base period and assuming rates of profit and productivity in construction are the same in both periods.

As the market does not yield comparable selling prices for such unique transactions as, for example, the sale of a transmission line, it was not possible to produce an index of the prices of completed structures. Completed structure indexes would be appropriate for

précédemment et dont la base était 1956=100. Les utilisateurs ne doivent pas s'attendre à ce que le groupement des indices convertis des grands groupes et des pondérations publiées donne l'indice général publié (1961=100). Cette conversion ne pose aucun problème à l'utilisateur qui désire réviser la pondération des indices convertis des grands groupes en utilisant les poids adaptés à ses fins propres.

Les indices pondérés en fonction de la base sont publiés chaque année; ils mesurent, pour la période allant de 1956 à 1968, l'influence de l'évolution des prix sur le coût des programmes spécifiques de construction de routes au Canada représenté par les marchés de construction de routes d'environ \$50,000 ou plus accordés par certaines administrations provinciales au cours de la période visée par la base de pondération. Les poids des éléments des indices qui représentent l'importance relative des unités de construction en 1956 sont constants. Seules les estimations de prix varient d'une année à l'autre; les indices mesurent donc l'évolution des prix dans le temps. Pour plus de détails sur l'estimation de l'évolution des prix pour la construction routière, se reporter aux pages vi et vii du numéro de décembre de Prices and Price Indexes (n° 62-002 au catalogue de Statistique Canada) et aux pages 9 et 10 du bulletin intitulé Price Indexes of Highway Construction in Canada (n° 62-520 au catalogue de Statistique Canada). L'indice général ou ses éléments servent à la planification et à la budgétisation des programmes de construction routière, à indexer ou à mettre à jour les prix de travaux de routes effectués précédemment, à estimer le coût de remplacement des travaux routiers achevés précédemment et à mesurer chronologiquement l'évolution des prix de la construction routière.

Les indices ne reflètent pas nécessairement l'évolution des prix de la construction effectuée hors marché ou des travaux d'entretien; ils servent à mesurer les variations de prix pour un programme déterminé de construction routière dans chacune des sept provinces. Au cours de la période qui a servi de base (1961), les niveaux de prix ont varié d'une province à l'autre; aussi, on ne peut utiliser les indices pour comparer des différences de prix entre les provinces mais on peut seulement les employer pour comparer les différences entre taux de variation des prix dans les provinces.

Les prix compris dans l'indice ne se rapportent pas aux unités de travail ni de matériaux comme c'est habituellement le cas dans l'indice des prix de la construction; ils se rapportent plutôt aux unités de travail de construction effectué, comme le défrichement d'une acre de terrain, l'excavation d'une verge cube ou l'épandage à chaud d'une tonne de béton bitumineux. En outre, l'indice comprend le prix de certains matériaux, par exemple, les tuyaux de ponceau fournis habituellement à l'entrepreneur par les ministères de la Voirie. Les prix des travaux de construction routière sont des moyennes pondérées des prix de soumission pour les unités de construction par groupe de marchés classés selon les caractéristiques des marchés qui déterminent le prix et les éléments d'offre tels que le volume de chaque poste, le type de marché et la situation géographique. Les prix des matériaux fournis sont les prix payés par les ministères aux fournisseurs.

Indices des prix à la construction dans les services d'électricité

En ce qui concerne les services d'électricité, l'indice a pour but de fournir une estimation des conséquences des variations de prix sur le coût des matériaux, de la main-d'oeuvre et du matériel utilisés dans la construction et l'équipement des services d'électricité au cours d'une période de référence donnée. L'indice sert à mesurer combien il faudrait payer en plus ou en moins pour réaliser un programme de construction identique à celui de la période de référence en utilisant les mêmes techniques de construction et en supposant que les taux de rentabilité et de productivité de la construction soient les mêmes pour les deux périodes.

Comme il est impossible d'obtenir directement sur le marché des prix de vente comparables pour des opérations de caractère aussi unique, par exemple, que la vente d'une ligne de transport d'énergie, Statistique Canada n'a pu établir un indice du prix des installations en place. Un tel indice ne

users wishing either to estimate reproduction costs or to deflate capital formation. For such uses the indexes introduced in this publication have specific shortcomings. Nonetheless, they may be helpful for such purposes provided the users understand the deficiencies. Thus the reader is asked to make particular note of Section III, of Occasional Paper Catalogue 62-526 Price Indexes of Electrical Utility Construction - The Necessity for Compromise and Section XI, (of the same paper) Uses and Limitations. In addition, because particular construction projects are unique, the aggregate indexes will not likely be appropriate to specific projects since they relate to an average mix of materials, labour and equipment derived from a variety of projects in a specific base period. Thus, if the component price indexes and their weights included in the aggregate index presented herein are inappropriate for a particular purpose the user should consider selecting appropriate component indexes from among those published herein. These indexes could then be combined into an aggregate index by utilizing weights derived from the projects or assets to be costed or deflated.

Prices used in the indexes are for the most part selling prices reported monthly by manufacturers for materials or equipment. The price reported is for units and terms of sale representative of the volume sales of the manufacturer. Where sales to electric utilities form a small share of the total sales of the manufacturer, the price reported may not adequately represent the price to the construction trade and others directly involved in constructing and equipping electric utility facilities. In such cases, prices charged other manufacturers or wholesalers have been included in the index. Federal sales tax changes are reflected in the index but no adjustments have been made for provincial tax changes. Until December 1964 wage rate data were supplied by the Federal Department of Labour and represented minimum hourly rates paid to construction workers in major cities employed on federal government contracts. In 1965 union basic wage rates reported by major utilities and some contractors were incorporated into the index. The sample selected provides an estimate of wage rate change for urban own account and contract electric utility construction. Some further improvements will be made to improve the coverage relating to rural non-union work for transmission lines.

Construction has been defined as new construction or major reconstruction for distribution systems, transmission lines and transformation or switching stations. Maintenance and operating costs are excluded. Cost data were supplied by major utilities, relating to own account and to contract construction erected during the last half of the 1950's. Weights were derived from these data which indicated the relative importance of the major inputs to the construction. The components of cost relating to distribution and transmission facilities encompass such items as poles, hardware, conductors, insulators, meters, distribution transformers and expenditures for labour, e.g. - linemen and groundmen. Costs relating to construction equipment such as trucks, and components of equipment operating costs such as tires, gasoline and repairs were also included. Transformation and switching stations encompass some of the items listed above but the most important elements of cost relate to transformers and switching equipment. Expenditures for land and rights-of-way have been excluded.

The term Canadian electric utility has been defined to include municipal as well as nonmunicipal utilities but the majority of the cost data tabulated was derived from the major nonmunicipal utilities. Manufacturers who produce electricity for their own use and who may also sell electricity have been excluded from the cost survey.

serait utile que si l'on désirait obtenir une estimation des sommes qu'il faudrait engager pour réaliser à nouveau un programme de construction identique ou encore pour dégonfler une formation de capital. Les indices publiés ici présentent en ce sens certaines lacunes. Ils peuvent néanmoins servir à de telles fins pourvu que les utilisateurs en comprennent les limites. Les lecteurs peuvent se rapporter aux Sections III et XI de la publication Price Indexes of Electrical Utility Construction (Statistique Canada, 62-526): "The Necessity for Compromise" et "Uses and Limitations". De plus, en raison du caractère unique de chaque projet de construction, l'indice synthétique ne pourra sans doute pas s'appliquer à un projet bien précis car il porte justement sur une moyenne des matériaux, de la main-d'oeuvre et du matériel utilisés dans la réalisation de plusieurs projets au cours d'une période de référence donnée. Ainsi, si les indices détaillés et les poids correspondants qui composent les indices synthétiques présentés ici ne conviennent pas à un usage bien précis, l'utilisateur pourra toujours se servir des autres indices détaillés et construire, à l'aide des coefficients de pondération, les indices de son choix, soit pour évaluer le coût d'un projet, soit pour établir des facteurs de dégonflement.

La plupart des prix des matériaux et du matériel utilisés pour établir les indices sont les prix de vente déclarés mensuellement par les fabricants. Ces prix sont représentatifs des unités de mesure et des conditions de vente valables pour les ventes en grande quantité des fabricants. Lorsque les ventes aux services électriques ne représentent qu'un faible pourcentage du chiffre d'affaires d'un fabricant, il est possible que le prix déclaré ne représente pas de façon satisfaisante le prix consenti aux entreprises en construction et aux autres industries s'occupant directement de construction et d'installation de services d'électricité. Dans ces cas, on a inclus dans l'indice les prix facturés aux autres fabricants ou grossistes. On a tenu compte, dans l'établissement de l'indice, des variations de la taxe de vente fédérale; toutefois, il n'a été fait aucun redressement pour les variations de taxe provinciale. Jusqu'en décembre 1964, les données sur les taux de rémunération étaient fournies par le ministère fédéral du Travail et représentaient le salaire horaire minimum versé aux personnes travaillant au titre d'un marché accordé par le gouvernement fédéral dans certaines grandes villes. En 1965, on fit entrer dans l'indice le salaire de base exigé par les syndicats et déclaré par les principaux services et par certains entrepreneurs. L'échantillon choisi représente donc une estimation des variations du taux de rémunération dans la construction en ville de services électriques pour compte propre ou au titre d'un marché. Certaines améliorations à l'indice sont prévues de façon à l'étendre aux personnes non syndiquées travaillant dans les régions rurales à la construction de lignes de transport d'énergie.

Le terme "construction" a été défini comme étant la construction neuve ou la réparation de réseaux de distribution, de lignes de transport d'énergie, de postes de transformation ou de postes de manœuvre. L'entretien et les frais d'exploitation ne sont pas compris. Les données sur les prix de revient sont fournies par les principaux services d'électricité et portent sur la construction exécutée pour compte propre ou au titre d'un marché au cours de la deuxième moitié des années cinquante. Les poids tirés de ces données représentent l'importance relative des principaux éléments entrant dans la construction. Les composantes du coût de la distribution et du transport comprennent certains éléments comme les poteaux, la quincaillerie, les conducteurs, les isolateurs, les compteurs, les transformateurs de distribution et les dépenses en main-d'oeuvre (monteurs, personnel de service, etc.). Les dépenses entraînées par le matériel de construction (camions et pièces d'équipement) et les frais d'exploitation (pneus, essence et réparations) sont également inclus. Les postes de transformation et les postes de manœuvre comprennent certains des éléments ci-dessus; les frais les plus importants sont cependant entraînés par les transformateurs et les appareils de connexion. Les dépenses foncières et les droits de passage ont été exclus.

Par définition, l'expression "service d'électricité canadien" englobe aussi bien les services municipaux que les autres; toutefois, la majeure partie des données de coût ont été tirées des déclarations des services non municipaux. Les fabricants qui produisent de l'électricité destinée à l'autoconsommation et qui peuvent également vendre de l'électricité ont été exclus de cette enquête.

Price Indexes of Hydro-electric Generating Stations

The following additional points may be of assistance to users of the hydro-electric generating stations index which was described in some detail in Statistics Canada Occasional Paper, Catalogue 62-533.

- (a) Wage rate data are derived from a variety of sources but mainly from the Canadian Construction Association surveys of union agreements and from Federal Pay Research Bureau studies of salaries paid professional, technical and clerical personnel. Basic wage rates, excluding fringe benefits, were used in index calculations.
- (b) Prices for ready-mix concrete and for earth and gravels in place have been utilized as replacements for input prices of labour, materials and equipment rental for concrete production and embankments in place.
- (c) Prices are included for some categories of expense not previously included in input price indexes for construction: interest during construction, overhead expense and the provision and operation of temporary camp accommodation.
- (d) Weighting patterns exclude expenditure for ancillary facilities for logging and navigation, permanent houses, etc.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto, Montreal and Canadian stock exchanges. The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in common and mining stock indexes are Thursday's closing quotations as reported in the *Globe and Mail* and the *Montreal Gazette*. For preferred stocks, prices are monthly weighted averages of the daily closing prices in which weights are daily total sales. The base reference base for the indexes is the year 1956 which has been adopted as an interim base for recently developed Statistics Canada indexes. The indexes expressed as a percentage of prices in 1956 and arithmetically converted to the 1961=100 base.

Revised indexes on the base 1956=100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the index, apart from the shift in the price reference base, is the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials 4 sub-groups (Milling and Grains, and Allied Products, Machinery and Equipment, and Mining Materials) have been replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Chemical Fabricating, Non-Metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Lumber, Textile and Clothing, Pulp and Paper, and Petroleum (renamed Petroleum) have been continued. The major group Utilities is continued but the Pipelines index has been added as a sub-group and the previous Power and

Indices de prix des centrales hydroélectriques

Les points supplémentaires ci-après peuvent aider les utilisateurs de l'indice des centrales hydroélectriques décrit en détail dans le bulletin hors-série de Statistique Canada portant le numéro 62-533.

- a) Les données sur le taux de rémunération proviennent de diverses sources et surtout des enquêtes sur les accords syndicaux de l'Association canadienne de la construction et des études du Bureau de recherche sur les traitements portant sur la rémunération des travailleurs intellectuels, des techniciens et du personnel administratif. Pour le calcul de l'indice, on a utilisé les taux de rémunération de base, avantages sociaux non compris.
- b) Au lieu du prix des entrées de main-d'oeuvre, de matériaux et de location de matériel pour la production de béton et des remblais effectués, on a utilisé le prix du béton préparé et celui de la terre et du gravier en place.
- c) L'indice comprend les prix correspondant à certains postes de dépenses qui n'étaient pas repris auparavant dans les indices de prix des entrées dans la construction: intérêts pendant la construction, frais généraux, fourniture et entretien de baraquements temporaires.
- d) Les facteurs de pondération ne comprennent pas les dépenses affectées aux installations auxiliaires pour l'exploitation forestière et la navigation, les maisons permanentes, etc.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières donnent une mesure dans le temps de l'effet du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un placeur hypothétique (et non pas un spéculateur). Le portefeuille représente des titres des sociétés canadiennes cotées à la Bourse de Toronto, de Montréal et à la Bourse canadienne. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres ordinaires et des titres miniers sont les cours de fermeture de la Bourse du jeudi indiqués dans le *Globe and Mail* et dans la *Montreal Gazette*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles du total des ventes quotidiennes. La base de pondération entre les sous-groupes est l'année 1956. Toutes les séries ont été recalculées sur la base de 1961=100. Les indices sont pondérés d'après le nombre d'actions en circulation.

Les indices révisés sur la base 1956=100 ont été publiés pour la première fois dans la livraison de juin 1962 de ce bulletin. La plus importante modification à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe des services d'utilité publique a été conservé mais l'indice des pipe-lines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et

Traction sub-group has been replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A new major group Finance is composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights, which were previously limited to major groups, have been extended to sub-groups. Weights in the index continue to be based on shares outstanding.

For the list of stocks currently included in the Inventors Index and Preferred Index, see Prices and Price Indexes for February 1972.

traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans Prix et indices des prix de février 1972.

Retail Price Indexes

Indices des prix de détail

Consumer Price Index for Canada (1961=100)

Indice des prix à la consommation au Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services of items for which there is a continually measurable market price over time, corresponding to a specific quantity of the item.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index is unlikely to represent closely the experience of any one family within the group nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two adults to two adults with four children, and (c) with annual incomes during 1957 ranging from \$2,500 to \$7,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In 1952, the time base was updated to 1949=100 from 1935-39=100 and, at the same time, weights were revised to reflect family expenditure patterns in 1947-48. A subsequent revision of weights based on 1957 expenditures was introduced at the beginning of 1961 and the time base was revised from 1949=100 to 1961=100 at the beginning of 1969.

Full details on the latest weighting patterns and time base revisions are available in the occasional paper "The Consumer Price Index for Canada 1949=100" - Revision based on 1957 Expenditures, Statistics Canada Catalogue No. 62-518 and in the January 1969 issue of the monthly bulletin, Prices and Price Indexes, Catalogue No. 62-002.

Consumer Price Indexes for Regional Cities (1961=100)

Indices des prix à la consommation dans certaines agglomérations urbaines (1961=100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). The regional indexes are generally similar in concept and coverage to the Consumer Price Index for Canada except for their individual weighting systems.

Also, city indexes are not as comprehensive in content as the Canada consumer price index and underestimate slightly the degree of price movements occurring. In this connection, the shelter component of

L'indice des prix à la consommation sert à mesurer le taux de variation du prix qu'il en coûte pour acheter un "panier" de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" demeure le même; il équivaut tout au moins à une quantité égale de biens et services de qualité égale; de plus, il est constitué de produits pour lesquels on peut toujours trouver sur le marché un prix mesurable et correspondant à une quantité déterminée de ce produit.

L'indice porte sur un groupe étendu mais bien déterminé de familles urbaines et rend compte des variations des prix auxquelles l'échantillon en question a dû faire face. Il est fort peu probable que l'indice représente fidèlement l'expérience d'une famille en particulier; de même, il ne faut pas s'attendre à ce qu'il rende compte des variations des prix auxquelles ont fait face des groupes sensiblement différents par le revenu, la taille de la famille et le lieu de résidence. L'échantillon sur lequel porte l'indice est composé de familles - a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille oscille entre deux adultes et deux adultes avec quatre enfants et c) dont le revenu annuel en 1957 oscillait entre \$2,500 et \$7,000. Pour évaluer l'influence des variations de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation porte sur les variations d'environ 300 articles.

L'indice des prix à la consommation au Canada remonte au début du siècle; depuis lors, on a révisé périodiquement la période de référence et les schémas de pondération. Ainsi, en 1952, la période de référence est passée de 1935-1939=100 à 1949=100; à la même occasion, les poids ont été revus de façon à présenter un reflet de la structure des dépenses des familles en 1947-48. La révision suivante des facteurs de pondération était fondée sur les dépenses des consommateurs en 1957 et fut introduite au début de 1961. Enfin, c'est au début de 1969 qu'on porta la période de 1949=100 à 1961=100.

Le lecteur trouvera de plus amples renseignements sur les dernières révisions du schéma de pondération et de la période de référence dans la publication occasionnelle "The Consumer Price Index for Canada (1949=100) - Revision based on 1957 Expenditures" (n° 62-518) et dans la livraison de janvier 1969 du bulletin mensuel "Prices and Price Indexes" (n° 62-002).

Ces indices sont publiés mensuellement dans le présent bulletin (voir Tableau 11). Par leur conception et par les éléments qui les composent, ces indices sont en général similaires à l'indice des prix à la consommation au Canada, seuls leurs coefficients de pondération diffèrent.

Aussi, les indices de prix dans les villes ne représentent pas les prix de façon aussi complète que l'indice des prix à la consommation au Canada et ils peuvent sous-estimer légèrement l'importance des mouvements de prix. C'est ainsi que

the city indexes moves on the basis of changes in rents only, whereas changes in both rents and homeownership costs are included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and all-items indexes for cities have tended to underestimate somewhat the rates of price increase, particularly over longer periods. Studies are under way to incorporate homeownership prices in city indexes.

Each index is designed to measure the influence of changes in retail prices taking place in the localities specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas.

In using the city indexes, it should be remembered that they are not indicators of comparative levels of prices as between the cities. That is, they do not in any way indicate whether prices are higher or lower in one city than in another.

For comparisons of retail price differentials between cities see Table 13 of this publication and the relevant explanatory note.

Historical Consumer Price Indexes (1969=100) for "Thunder Bay" and "Quebec City" are available, with explanatory notes on request from Retail Prices Section, Prices Division, Statistics Canada.

Measuring the Purchasing Power of Earnings

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price increase. The adjusted average is \$90.91 ($100.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

l'élément "logement" des indices des villes varie en fonction des changements dans les loyers uniquement, alors que l'indice pour l'ensemble du Canada comprend les loyers et les coûts de propriété. A la suite d'une augmentation des coûts de propriété plus rapide que celle des loyers, les indices de l'habitation et de tous les éléments pour les villes ont tendu à sous-estimer quelque peu les taux de croissance des prix, surtout sur de plus longues périodes de temps. On étudie actuellement l'incorporation des prix de propriété dans les indices des villes.

Chaque indice est conçu de façon à mesurer les conséquences des variations des prix de détail survenues dans les agglomérations en question sur le prix d'un panier constant de biens et de services représentant la consommation d'un groupe représentatif de familles appartenant à ces secteurs.

Le lecteur devra toujours garder en mémoire que ces indices ne sont pas des indicateurs qui permettent de comparer le niveau des prix d'une ville à l'autre et qu'ils n'indiquent en aucune façon si les prix sont plus ou moins élevés dans une ville que dans une autre.

Pour étudier les différences de prix au détail entre les villes, il faut consulter le Tableau 13 de ce bulletin et les notes explicatives qui l'accompagnent.

Les indices chronologiques des prix à la consommation (1969=100) pour Québec et Thunder Bay et les notes explicatives qui les accompagnent peuvent être obtenus de la Section des prix de détail de la Division des prix de Statistique Canada.

Calcul du pouvoir d'achat

Toute variation des prix à la consommation influe directement sur la quantité de biens et de services qu'on peut acheter avec un dollar et par conséquent sur le revenu moyen. Pour mesurer le revenu en tenant compte de la variation des prix à la consommation, on peut déduire du revenu moyen réel le montant proportionnel qui correspond à l'augmentation des prix à la consommation ou ajouter au revenu réel le montant qui équivaut à la diminution des prix à la consommation. Ces moyennes corrigées peuvent ensuite servir à déterminer la quantité de biens et de services qu'on aurait pu acheter grâce à un revenu moyen, les prix à la consommation et les habitudes de consommation n'ayant pas changé. On trouvera ci-dessous des exemples de cette méthode.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B et que dans la même période de temps l'indice des prix à la consommation progresse de 100.0 à 110.0. En raison de l'augmentation de 10 % des prix à la consommation, on n'obtiendra plus autant avec \$1 au cours de la semaine B que pendant la semaine A. De même il serait exagéré de dire que, pour une augmentation de la rémunération de \$80 à \$100 le pouvoir d'achat du salaire hebdomadaire moyen s'est élevé de 25 %. On peut ramener cette augmentation à des proportions plus justes en déduisant du nouveau salaire hebdomadaire moyen l'augmentation des prix à la consommation. La rémunération moyenne corrigée s'établira donc à \$90.91 ($100.00/110.0 \times 100.0$), dont on peut dire qu'elle exprime la rémunération hebdomadaire moyenne de semaine B en dollars de la semaine A, ou encore qu'elle rend compte du niveau effectif de la rémunération hebdomadaire de semaine B par rapport à la semaine A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$80.00 and the week figure of \$90.91. Taking the week A average of \$80.00 as equal to 100.0, the week B index becomes 113.6 (90.91/80.00x100.0). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than those received in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the rise of 25% in money wages (100.00/80.00x100.0).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending on occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of changes in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring variations in the levels of consumption of wage-earners' families; they are intended to show the trend in purchasing power of wages over the time covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both nominal and real wages uses 1961 as a reference year. However, the adjustment made in the foregoing illustrations can be applied to any reference level; percentage change between any two periods will be the same regardless of the reference period selected.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation and reading, and tobacco and alcohol. In all, inter-city price comparisons are made for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based with the omission being shelter (both rented and owned.) In recognizing the importance of shelter differences in any overall comparison of the general price level being encountered by consumers in different centres, the problems inherent in drawing valid comparisons between cities are such as to require

On peut pousser plus loin les calculs et exprimer à l'aide d'un indice la relation entre le salaire moyen de la semaine A (\$80) et celui de la semaine B (\$90.91). Ainsi, si l'on considère que la rémunération moyenne de \$80 de la semaine A était égale à 100.0, l'indice de la semaine B deviendra 113.6 (90.91/80.00x100.0). On pourrait appeler cet indice l'indice de la rémunération hebdomadaire effective; il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6 % de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10 % des prix à la consommation. L'augmentation de 25 % des salaires se ramène donc à une augmentation effective de 13.6 % (100.0/80.00x100.0).

Il convient de souligner que, même si les estimations de la rémunération moyenne effective résument assez bien la situation d'un large éventail de travailleurs, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur le revenu porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur le revenu ajustées par l'indice des prix à la consommation (les habitudes de consommation étant "fixes") perdront graduellement de leur valeur. Enfin, il ne faut pas oublier qu'une partie du revenu peut être consacrée à l'épargne et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations du revenu effectif calculées à partir de moyennes du revenu brut peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés et de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente la rémunération tant réelle qu'effective prend pour base l'année 1961. Toutefois, les ajustements illustrés dans les exemples ci-dessus peuvent s'appliquer à tout niveau de référence; la variation proportionnelle entre deux périodes sera en effet identique quelle que soit la période de référence choisie.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada, la seule grande omission étant le logement (location et frais de possession). Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général des prix aux quels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes que comporteraient l'établissement d'une comparaison valable d'une ville à l'autre

further research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 13 presents the results of an updating of earlier spatial retail price measurements to May 1971 and includes more complete data on several cities. A fuller explanation of the study from which this table is derived is contained in the November 1968, November 1969 and April 1972 issues of Prices and Price Indexes (Statistics Canada, Catalogue Number 62-002).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons, efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. Except for foodstuffs and new passenger cars for which inter-city price differentials were derived directly from new comparisons based on May 1971 price data, the updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

It should be noted that the retail prices used in these comparisons, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

sont tels qu'ils nécessitent plus de recherche. Entre-temps, on estime que malgré l'absence actuelle de données sur les dépenses de logement, la publication de comparaisons des prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au Tableau 13 le résultat d'une mise à jour de mesures de prix de détail tirées précédemment jusqu'à mai 1971, ainsi que des données plus complètes sur plusieurs villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968, novembre 1969, et avril 1972 de Prices and Price Indexes (n° 62-002 au catalogue).

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. Sauf pour les denrées alimentaires et les voitures neuves, pour lesquelles les différences de prix entre villes ont été tirées directement de nouvelles comparaisons fondées sur les données de mai 1971 la mise à jour de ces mesures de différences de prix de détail entre les villes a été assurée grâce l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépenses applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux qui doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accise qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total manufacturing) moved 0.3 % higher in August to 127.8 from the July index of 127.4. It was 4.4 % higher than the August 1971 index of 122.4. Of the 101 industry indexes included in the Total, 39 were higher, 13 declined and 49 were unchanged.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the foods and beverages group due mainly to higher price movements in the pasturizing plants, sugar refineries, and slaughtering and meat packing industries. The wood products group, which has been rising steadily since late 1971 continued to advance, with the more significant increases registered for the sawmills and planing mills, and shingle mills industries. Decreases in August were relatively insignificant.

NOTES SUR LES CHIFFRES DES PRIX ET INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industrie manufacturière (1961=100)

L'indice des prix de vente dans l'industrie pour l'ensemble des industries manufacturières a augmenté de 0.3 %, passant de 127.4 en juillet à 127.8 en août. Il a donc avancé de 4.4 % par rapport à août 1971 (122.4). Sur les 101 indices d'industrie faisant partie du total, 39 ont augmenté, 13 ont baissé et 49 sont restés inchangés.

En fonction de la contribution relative au changement global de l'ensemble des indices des industries manufacturières, les variations les plus importantes ont été des augmentations dans le groupe des aliments et boissons par suite surtout de la hausse des prix dans les établissements de pasteurisation, les raffineries de sucre et l'industrie de l'abatage et du conditionnement de la viande. Le groupe des produits du bois, qui n'a pas cessé de croître depuis la fin de 1971, a continué son avance; les progressions les plus importantes ont été enregistrées dans les scieries, les ateliers de rabotage et les usines de bardeaux. Les diminutions en août sont, à toutes fins pratiques, négligeables.

General Wholesale Price Index (1935-39=100)

The general wholesale price index rose 0.7 % in August to 310.3 from the July index of 308.2. It was 6.2 % higher than the August 1971 index of 292.3. Six major group indexes were higher, while two declined.

The vegetable products group index rose 2.5 % in August to 246.2 from 240.3 on higher prices for grains, potatoes, livestock and poultry feeds, sugar and its products, bakery products, tea, coffee and cocoa and fresh fruits. An advance of 0.8 % to 280.3 from 278.2 in the textile products group index reflected price increases for raw wool, raw cotton and cotton fabrics. Higher prices for cedar, spruce, pine and hemlock were chiefly responsible for an increase of 0.8 % to 434.0 from 430.7 in the wood products group index. Fractional advances were recorded for three major group indexes; non-ferrous metal products to 262.8 from 262.4, non-metallic mineral products to 234.8 from 234.7, and iron products to 323.3 from 323.2.

The chemical products major group index declined 0.2 % to 246.3 from 246.9 in August, while the animal products group eased down to 377.2 from 377.4.

Indice général des prix de gros (1935-39=100)

De juillet à août, l'indice général des prix de gros a progressé de 0.7 %, passant de 308.2 à 310.3. Il s'agit d'une augmentation de 6.2 % par rapport à août 1971 (292.3). Six indices de groupe principal ont augmenté et deux ont diminué.

L'indice des produits d'origine végétale s'est accrue de 2.5 % en août, passant de 240.3 à 246.2 à la suite de la hausse des prix des céréales, des pommes de terre, des aliments pour bétail et volaille, du sucre et de ses produits, des produits de boulangerie, du thé, du café, du cacao et des fruits frais. Une avance de 0.8 % (de 278.2 à 280.3) de l'indice des produits textiles est attribuable à une majoration des prix de la laine brute, du coton brut et du tissu de coton. Une hausse des prix du thuya ("cèdre"), de l'épinette, du pin et de la pruche est surtout responsable de l'accroissement de 0.8 % de l'indice des produits du bois, qui passe ainsi de 430.7 à 434.0. On a observé de très légères augmentations dans le cas de trois indices principaux: l'indice des produits métalliques non ferreux (de 262.4 à 262.8); l'indice des produits minéraux non métalliques (de 234.7 à 234.8) et l'indice des produits du fer (de 323.2 à 323.3).

L'indice des produits chimiques a régressé de 0.2 % en août, passant de 246.9 à 246.3; l'indice des produits d'origine animale a aussi légèrement reculé, soit de 377.4 à 377.2.

Commodity group and sub-group Groupe et sous-groupe de produits	Percentage changes — Variations en pourcentage		
	August — 1972 — Août July — 1972 — Juill.	August — 1971 — Août July — 1971 — Juill.	August — 1972 — Août August — 1971 — Août

	+ 2.2	+ 1.6	+ 15.5

Security Price Indexes (1961=100)

The Investors index of common stock prices moved up 5.7 % over July to an all time high of 182.2 from 172.4; this is the biggest increase since January 1972. Within the three major groups, industrials, utilities and finance rose 6.4 % to 188.8, 1.7 % to 157.1 and 7.3 % to 187.8 respectively. Amongst the thirteen industrial sub-groups, increases were registered in all but one, textile and clothing which dropped 1.1 % to 184.5. The largest increase was 8.5 % to 201.0 in the metal fabricating sub-group. In utilities, all sub-groups rose without exception: the range of the increases was from 1.0 % to 124.1 for electric power, to 2.9 % to 90.0 for telephones. An increase in the finance index resulted from a gain in both sub-groups: banks rose 6.8 % to 218.0, investment and loan moving up 8.7 % to 142.0.

In the same period, the index of Mining stock prices increased 0.3 % to 116.3 with golds dropping 2.4 % to 126.0 and base metals increasing 2.1 % to 112.0.

Of the two supplementary price indexes, uranians and primary oils and gas showed increases of 0.4 % to 187.2 and 6.5 % to 537.9 respectively.

The preferred stock index rose 2.7 % to 72.5.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, advanced 2.0 % to 300.9 in August from the July index of 294.9. Prices were higher for nine commodities, lower for six and unchanged for fifteen. Principal changes included increases for beef hides, spruce lumber, linseed oil, oats, wheat, raw sugar, raw wool, hogs and tin while decreases were recorded for raw rubber, raw cotton, sisal, steers, bleached sulphite pulp and iron ore.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets declined 0.1 % to 289.9 in August from the July index of 290.3. A decrease of 0.7 % to 401.8 from 404.8 in the animal products index reflected lower prices for lambs, calves and steers on both Eastern and Western markets and for butterfat in the West. Higher prices were shown for raw wool, eggs, hogs and fluid milk on both Eastern and Western markets, and for cheesemilk in the East. The field products index advanced 1.2 % to 178.0 from 175.9 on higher prices for potatoes and barley on both markets, for hay and corn in the East, and for rye and flax in the West.

Consumer Price Movements

The Consumer Price Index for Canada (1961=100) rose 0.8 % to 141.3 in August from 140.2 in July. This compares with a rise of 0.7 % between these two months last year but contrasts with smaller July to August increases of recent years. All major components registered advances except Clothing which declined 0.2 %. The major contributor to the rise in the All-Items index was a 2.2 % increase in the Food index. Among the other components that increased, Recreation and Reading rose 0.8 %, Health and Personal Care 0.6 %, Transportation 0.5 %, Housing 0.3 %, and Tobacco and Alcohol 0.1 %. Between August 1971 and August 1972, the All-Items index advanced 4.7 %.

Indices des cours des valeurs immobilières (1961=100)

L'indice des cours des actions ordinaires a progressé de 5.7 % par rapport à juillet (172.4) pour atteindre un niveau record de 182.2; cet accroissement est le plus considérable depuis janvier 1972. Parmi les trois grands groupes, les valeurs industrielles ont avancé de 6.4 % pour se porter à 188.8; les services publics de 1.7 % pour s'établir à 157.1 et les finances de 7.3 % pour atteindre 187.8. Les treize sous-groupes industriels ont tous connu des augmentations sauf un, les textiles et vêtements qui ont décliné de 1.1 % pour s'établir à 184.5. La plus forte hausse, soit 8.5 %, a été enregistrée dans le sous-groupe de la fabrication des métaux où l'indice est passé à 201.0. Dans les services publics, tous les sous-groupes se sont accrus sans exception; les progressions variaient de 1.0 % pour l'énergie électrique (124.1) à 2.9 % pour le téléphone (90.0). L'indice des finances a augmenté par suite des gains réalisés dans les deux sous-groupes: les banques ont progressé de 6.8 % pour atteindre 218.0, les placements et prêts de 8.7 % pour se fixer à 142.0.

Au cours de la même période, l'indice des titres miniers s'est accru de 0.3 % pour s'inscrire à 116.3 en raison d'une hausse de 2.4 % des aurifères (126.0) et d'une progression de 2.1 % des métaux communs (112.0).

Pour ce qui est des deux indices supplémentaires, l'uranium a avancé de 0.4 % et le pétrole et les gaz primaires de 0.4 % pour s'établir respectivement à 187.2 et 537.9.

L'indice des actions privilégiées a monté de 2.7 % et a atteint 72.5.

Indice des prix de trente matières industrielles (1935-1939=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique pondérée, a avancé de 2.0 %, passant de 294.9 en juillet à 300.9 en août. Les prix de neuf marchandises ont augmenté, ceux de six ont diminué et ceux des quinze autres sont demeurés inchangés. Les principaux changements ont été des augmentations pour les peaux de boeuf, le bois de sciage d'épinette, l'huile de lin, l'avoine, le blé, le sucre brut, la laine brute, le porc et l'étain et des diminutions pour le caoutchouc brut, le coton brut, le sisal, les bouvillons, la pâte de bois blanchie au sulfite et le minerai de fer.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a fléchi de 0.1 %, passant de 290.3 en juillet à 289.9 en août. La diminution de 0.7 % de l'indice des produits d'origine animale, qui est passé de 404.8 à 401.8, est la conséquence de la baisse des prix des agneaux, des veaux et des bouvillons dans l'Est et l'Ouest et de la graisse de beurre dans l'Ouest. On a observé une augmentation des prix de la laine brute, des oeufs, du porc et du lait nature dans l'Est et dans l'Ouest et du lait de fromagerie dans l'Est. L'indice des produits de grandes cultures a progressé de 1.2 %, passant de 175.9 à 178.0 par suite d'une hausse des prix de la pomme de terre et de l'orge sur les deux marchés, du foin et du maïs dans l'Est, et du seigle et du lin dans l'Ouest.

Mouvements des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961=100) est passé de 140.2 en juillet à 141.3 en août; cette augmentation de 0.8 % est comparable à la hausse de 0.7 % enregistrée entre les deux mois correspondants de l'année dernière, mais elle est plus importante que l'augmentation enregistrée entre juillet et août ces dernières années. L'indice de tous les principaux éléments a progressé sauf celui de l'habillement qui a diminué de 0.2 %. Le principal facteur d'accroissement de l'indice synthétique a été l'augmentation de 2.2 % de l'indice de l'alimentation. Les autres indices qui ont enregistré une avance sont les suivants: loisirs et lecture 0.8 %, soins personnels et de santé, 0.6 %; transports, 0.5 %; habitation, 0.3 %; tabacs et alcools, 0.1 %. Entre août 1971 et août 1972, l'indice synthétique a progressé de 4.7 %.

Consumer Price Index

The Food index increased 2.2 % to 145.7 in August from 142.5 in July. Though this increase is the largest recorded between July and August since before 1961, it compares with an increase of 2.0 % between these two months last year and with an average increase between July and August of 1.3 % in the preceding five years. In the latest month, the price level of food consumed at home advanced 2.6 % while restaurant meal prices rose 0.2 %. Within the food at home component, most major groups recorded advances but fruit and some miscellaneous items declined in price. The meat, fish and poultry index increased 1.1 % to stand 14.0 % above its level of a year earlier. Pork prices rose, on average, 2.9 % between July and August, with all cuts contributing to the increase, and the pork index stood over 27 % above its level of a year previous. Prices of most beef cuts also rose in the latest month to advance the beef index 0.8 % but poultry quotations fell 1.0 % as chicken prices declined in response to specials in some cities. Egg prices rose 6.6 % but, with the exception of the small increase recorded between these two months last year, the latest increase was below the normal July to August advance of previous years. However, the egg index stood almost 22 % above its level of a year earlier. All dairy product items registered advances in the latest month with fluid milk and powdered skim milk prices increasing in a number of centres across the country. The bakery and cereal products component rose 0.6 % as all items priced, including bread, recorded advances. Vegetable prices edged up, on average, 0.1 % in contrast to an average July to August decrease of over 5 % in the preceding five years. Higher prices were registered for all canned and frozen vegetables surveyed and for most fresh vegetables but tomatoes, cabbage and celery fell in price. The fruit index, which normally decreases at this time of year, declined 1.3 % mainly in response to lower prices for some fresh fruits. In the latest month, fruit prices stood, on average, almost 4 % below their level of a year previous but vegetable prices advanced over 7 % in the same period. Amongst other food stuffs, decreases were registered between July and August for sugar, soft drinks, tea and salad dressing but ground and instant coffee, honey and peanut butter were among the items recording increases. In the twelve months to August 1972, the Food index advanced 7.2 % with the price of food consumed at home increasing 7.4 % and that for restaurant meals 6.1 %.

The Housing index rise of 0.3 % to 143.8 in August from 143.3 in July resulted from increases of 0.5 % and 0.1 % in the shelter and the household operation components respectively. Within shelter, the homeownership element advanced 0.7 % because of higher new house prices, homeowner repair charges and dwelling insurance rates; rents edged up 0.1 %. Within household operation, increased fuel oil prices were registered in London, Saskatoon, Vancouver and Victoria. On the other hand, scattered seasonal sales on a number of items reduced the average level of furniture and floor covering prices 0.2 % and 0.3 % respectively. Household textile prices moved up 0.2 % because of increased drapery material and wool blanket quotations. The household effects insurance index advanced 2.8 % with increased rates in Halifax, Saint John, Montreal, Ottawa and Toronto. Among other items, dishes, glassware and light bulbs were higher in price while a number of cleaning supplies such as scouring powder and soap flakes were on sale in scattered locations. Between August 1971 and August 1972, the Housing index advanced 4.6 %.

L'indice de l'alimentation est passé de 142.5 en juillet à 145.7 en août, ce qui représente une augmentation de 2.2 %; il faut remonter avant 1961 pour trouver une augmentation aussi élevée entre juillet et août; par contre, elle est comparable à l'augmentation de 2.0 % entre ces deux mois l'année dernière et à la progression moyenne de 1.3 % de juillet à août entre 1967 et 1971. Le mois dernier, le niveau des prix des aliments consommés à la maison a progressé de 2.6 % tandis que le prix des repas pris au restaurant a augmenté de 0.2 %. Parmi les aliments consommés à la maison, le prix de la plupart des principales catégories a augmenté, mais celui des fruits et de certains articles divers a diminué. L'indice de la viande, du poisson et de la volaille a avancé de 1.1 % pour atteindre un niveau de 14.0 % supérieur à ce qu'il était un an plus tôt. Le prix du porc a augmenté, en moyenne, de 2.9 % entre juillet et août, l'augmentation touchant tous les morceaux; l'indice du porc s'établissait donc à plus de 27 % au-dessus de ce qu'il était un an plus tôt. Le prix de la plupart des morceaux de bœuf a également augmenté le mois dernier et l'indice du bœuf s'est accru de 0.8 %; l'indice de la volaille a régressé de 1.0 % en raison de la diminution du prix du poulet à la suite de soldes dans certaines villes. Le prix des oeufs a augmenté de 6.6 %, mais, à part la faible hausse enregistrée entre ces deux mois l'an dernier, la dernière augmentation a été inférieure à la hausse normalement enregistrée entre juillet et août au cours des dernières années. Toutefois l'indice des oeufs s'est maintenu à presque 22 % au-dessus de ce qu'il était un an plus tôt. Tous les produits laitiers ont enregistré des hausses le mois dernier, le prix du lait liquide et du lait écrémé en poudre ayant augmenté dans nombre de villes du Canada. L'élément produits de boulangerie et produits céréaliers a progressé de 0.6 % par suite d'une hausse générale du prix de tous ces produits y compris le pain. Le prix des légumes a augmenté en moyenne de 0.1 %, ce qui contraste avec la diminution moyenne de plus de 5 % entre juillet et août au cours des cinq années précédentes. La hausse de prix a touché tous les légumes congelés et en conserve et la plupart des légumes frais; par contre, le prix des tomates, du chou et du céleri a diminué. L'indice des fruits, qui diminue normalement à cette période-ci de l'année, a régressé de 1.3 % en raison principalement d'une diminution du prix de certains fruits frais. Le mois dernier, le prix des fruits s'est maintenu en moyenne à presque 4 % au-dessous de ce qu'il était un an plus tôt; par contre, le prix des légumes s'est accru de plus de 7 % au cours de la même période. Quant aux autres denrées alimentaires, on a enregistré, entre juillet et août, une diminution du prix du sucre, des boissons gazeuses, du thé et de la vinaigrette; le café moulu et instantané, le miel et le beurre d'arachides sont au nombre des articles dont le prix a augmenté. Au cours de douze mois précédant août 1972, l'indice de l'alimentation a progressé de 7.2 % par suite d'une augmentation de 7.4 % des repas consommés à la maison et de 6.1 % des repas pris au restaurant.

L'indice de l'habitation est passé de 143.3 en juillet à 143.8 en août; cette hausse de 0.3 % est attribuable à une augmentation de 0.5 % de l'élément logement et de 0.1 % de l'élément entretien du ménage. Dans le cas du logement, les frais de possession d'une maison se sont accrus de 0.7 % par suite d'une hausse du prix des maisons neuves, des frais de réparation à la charge du propriétaire et des primes d'assurance-logement; les loyers n'ont augmenté que de 0.1 %. Quant à l'entretien du ménage, on a enregistré une hausse du prix du mazout à London, Saskatoon, Vancouver et Victoria. Par ailleurs, les soldes saisonniers observés dans plusieurs endroits pour divers articles ont fait diminuer de 0.2 % et de 0.3 % respectivement les prix moyens des meubles et des couvre-parquets. Le prix des textiles ménagers s'est accru de 0.2 % à cause d'une augmentation du prix du tissu à tentures et des couvertures de laine. L'indice des assurances sur les biens ménagers a progressé de 2.8 % par suite d'une augmentation des primes à Halifax, Saint-Jean (N.-B.), Montréal, Ottawa et Toronto. Parmi les autres articles, le prix de la vaisselle, de la verrerie et des ampoules a augmenté; par contre, certains produits d'entretien tels que la poudre à récurer et les flocons de savon étaient offerts en solde à divers endroits. Entre août 1971 et août 1972, l'indice de l'habitation a marqué une avance de 4.6 %.

The Clothing index, which normally decreases at this time of year, dipped 0.2 % to 131.3 in August from 131.6 in July. The only component registering an increase was footwear as higher prices for women's and children's shoes outweighed lower quotations, due to sales, for men's shoes. Both the men's and women's wear components declined 0.6 %, the former mainly due to sale prices in most cities for suits, slacks and windbreakers, the latter because lower quotations for dresses outweighed increased prices for underwear. Children's wear registered a decrease of 0.1 % mainly because of sales on boys' slacks and girls' cotton dresses. Between August 1971 and August 1972, the Clothing index rose 1.9 %.

The Transportation index increased 0.5 % to 134.3 in August from 133.6 in July mainly as a result of a 0.6 % advance in the automobile operation component. Among automobile operation items, insurance rates increased 3.5 % while the price of motor oil rose 0.6 % and new car prices edged up 0.1 %. On the other hand, gasoline prices fell fractionally following price decreases in some Ontario centres. The inter-city travel component rose 0.5 % in response to a seasonal rise in the train fares index. In August 1972, the Transportation index stood 2.8 % above its level of twelve months previous.

The Health and Personal Care index advanced 0.6 % to 150.0 in August from 149.1 in July as a result of increases of 0.9 % and 0.3 % in the personal care and the health care components respectively. Personal care supplies' prices advanced 1.0 % mainly due to higher quotations for toilet soap, face cream and cleansing tissues. A 0.6 % rise in the personal care services element reflected increased charges for men's haircuts and women's hairdressing in a number of centres across the country. The cause of the rise in the health care component was higher prices for all pharmaceuticals surveyed, particularly prescriptions, headache tablets and vitamins. In the twelve months to August 1972, the Health and Personal Care index advanced 5.3 %.

The Recreation and Reading index rose 0.8 % to 140.5 in August from 139.4 in July mainly as the result of higher motion picture admission charges in Halifax, Saint John, Ottawa, Toronto and Vancouver, and increased football admissions in most major cities. Newspaper subscription rates also rose in Ottawa and Regina. Between August 1971 and August 1972, the Recreation and Reading index increased 3.5 %.

The Tobacco and Alcohol index rose 0.1 % to 132.9 in August from 132.8 in July as mixed price movements across the country resulted in a marginal increase in the tobacco component. In the twelve months to August 1972, the Tobacco and Alcohol index rose 2.5 %.

Consumer price index items, when classified by commodities and services, offer another view of the incidence of the change in prices. Between July and August, the services index rose 0.6 % mainly because of higher prices for theatre and football admission, and men's haircuts and women's hairdressing, together with higher insurance rates on dwellings, household effects and automobiles. The total commodities index advanced 1.0 % as a result of the 2.2 % increase in food prices. The average price level of non-durable commodities excluding food was unchanged as reduced prices for garments offset higher quotations for footwear, pharmaceuticals, toiletries, fuel oil and tobacco. A 0.1 % rise in the durables index resulted from higher prices for glassware, dishes and new cars. Between August 1971 and August 1972, the index for total services advanced 5.3 % while that for total commodities increased 4.3 %.

L'indice de l'habillement, qui diminue normalement à cette période-ci de l'année, a régressé de 0.2 %, passant de 131.6 en juillet à 131.3 en août. Le seul élément qui a progressé a été les chaussures, la hausse du prix des souliers pour dames et enfants ayant été plus forte que la baisse du prix des souliers pour hommes qui ont été mis en solde. Les éléments vêtements pour hommes et pour dames ont régressé de 0.6 %, le premier en raison des soldes dans la plupart des villes pour les complets, les pantalons et les blousons, et le deuxième parce que la baisse du prix des robes a été supérieure à la hausse du prix des sous-vêtements. Les vêtements pour enfants ont enregistré une diminution de 0.1 % en raison principalement des soldes de pantalons pour garçons et de robes de coton pour fillettes. Entre août 1971 et août 1972, l'indice de l'habillement s'est accru de 1.9 %.

L'indice des transports s'est accru de 0.5 % pour atteindre 134.3 en août, contre 133.6 en juillet; l'augmentation est principalement attribuable à une hausse de 0.6 % des frais de possession d'une voiture; parmi ces frais, les primes d'assurance ont été majorées de 3.5 %, le prix de l'huile à moteur, de 0.6 % et celui des voitures neuves, de 0.1 %. Par ailleurs, le prix de l'essence a légèrement diminué par suite de réductions de prix dans certaines villes de l'Ontario. L'indice du transport interurbain a progressé de 0.5 % par suite d'une hausse saisonnière du prix des billets de chemin de fer. En août 1972, l'indice des transports s'établissait à 2.8 % au-dessus de ce qu'il était douze mois auparavant.

L'indice des soins personnels et de santé a progressé de 0.6 %, passant de 149.1 en juillet à 150.0 en août, en raison d'une hausse de 0.9 % des soins personnels et de 0.3 % des soins de santé. Le prix des produits de soins personnels a augmenté de 1.0 % en raison principalement d'une hausse du prix du savon de toilette, de la crème de beauté et du papier à démaquiller. L'augmentation de 0.6 % de l'élément services de soins personnels est attribuable à une hausse du prix des coupes de cheveux pour hommes et des frais de coiffure pour dames dans certaines villes du pays. La cause de l'accroissement de l'indice des soins de santé a été la hausse de prix de tous les produits pharmaceutiques, en particulier des médicaments d'ordonnance, des comprimés contre les maux de tête et des vitamines. Au cours des douze mois précédant août 1972, l'indice des soins personnels et de santé a progressé de 5.3 %.

L'indice des loisirs et de la lecture s'est accru de 0.8 %, passant de 139.4 en juillet à 140.5 en août par suite d'une augmentation du prix des billets de cinéma à Halifax, Saint-Jean (N.-B.), Ottawa, Toronto et Vancouver, et d'une hausse du prix des billets d'entrée aux matches de football dans la plupart des grandes villes. Le tarif d'abonnement aux journaux a également augmenté à Ottawa et à Regina. Entre août 1971 et août 1972, l'indice des loisirs et de la lecture a progressé de 3.5 %.

L'indice des tabacs et alcools a avancé de 0.1 %, passant de 132.8 en juillet à 132.9 en août, les divers mouvements de prix au pays s'étant soldés par une légère hausse de l'élément tabacs. Au cours des douze mois précédant août 1972, l'indice des tabacs et alcools a progressé de 2.5 %.

Si l'on classe les articles qui entrent dans l'indice des prix à la consommation par biens et services, on obtient une image différente du mouvement des prix à la consommation. Entre juillet et août, l'indice des services a avancé de 0.6 % en raison surtout de la hausse du prix des billets de cinéma et de football, des coupes de cheveux pour hommes et des frais de coiffure pour dames et de l'augmentation des primes d'assurance sur le logement, les biens ménagers et les voitures. L'indice synthétique des biens a avancé de 1.0 % par suite d'une hausse de 2.2 % du prix des aliments. Le prix moyen des biens non durables (à l'exception des aliments) est demeuré stationnaire, la baisse du prix des vêtements ayant compensé la hausse du prix des chaussures, des produits pharmaceutiques, des articles de toilette, du mazout et du tabac. L'augmentation de 0.1 % de l'indice des biens durables est attribuable à une hausse du prix de la verrerie, de la vaisselle et des voitures neuves. Entre août 1971 et août 1972, l'indice synthétique des services a progressé de 5.3 % tandis que l'indice synthétique des biens a avancé de 4.3 %.

TABLE 1. Summary of Current Price Indexes
TABLEAU 1. Récapitulation des indices des prix courants

	Indexes — Indices				Percentage changes — Variation proportionnelle		
	August 1972 — Août	July 1972 — Juill.	August 1971 — Août	July 1971 — Juill.	Aug. — Août 1972 — Juill.	Aug. — Août 1971 — Juill.	1972 Aug. — Août 1971
Industrial price indexes — Indices des prix dans l'industrie							
Industry selling price index: manufacturing — 1961=100(1) — Indices des prix de vente dans l'industrie: industries manufacturières:							
General wholesale index — (1935-39=100)(2) — L'indice général de gros	127.8	127.4	122.4	122.3	+ 0.3	+ 0.1	+ 4.4
Vegetable products — Substances végétales	310.3	308.2	292.3	291.0	+ 0.7	+ 0.4	+ 6.2
Animal products — Produits animaux	246.2	240.3	236.0	237.8	+ 2.5	+ 0.8	+ 4.3
Textile products — Produits textiles	377.2	377.4	328.1	323.6	- 0.1	+ 1.4	+ 15.0
Wood products — Produits du bois	280.3	278.2	263.5	262.2	+ 0.8	+ 0.5	+ 6.4
Iron products — Produits du fer	434.0	430.7	404.7	398.9	+ 0.8	+ 1.5	+ 7.2
Non-ferrous metals — Métaux non ferreux	323.3	323.2	317.8	317.4	--	+ 0.1	+ 1.7
Non-metallic minerals — Minéraux non métalliques	262.8	262.4	262.3	262.8	+ 0.2	- 0.2	+ 0.2
Chemical products — Produits chimiques	234.8	234.7	226.7	226.7	--	--	+ 3.6
	246.3	246.9	240.8	241.5	- 0.2	- 0.3	+ 2.3
Canadian farm products — (1935-39=100)(3) — Produits agricoles canadiens							
Eastern — Total — De l'est	289.9	290.3	264.6	268.6	- 0.1	- 1.5	(3)
Western — Total — De l'ouest	329.1	327.6	297.8	292.4	+ 0.5	+ 1.8	+ 10.5
Field — Cultures	250.7	253.0	231.4	244.9	- 0.9	- 5.5	(3)
Animal — Animaux	178.0	175.9	177.2	187.3	+ 1.2	- 5.4	(3)
	401.8	404.8	352.0	350.0	- 0.7	+ 0.6	+ 14.1
Selected price indexes — (2) — Certains indices de prix							
Thirty industrial materials — (1935-39=100) — Trente matériaux industriels	300.9	294.9	266.8	266.7	+ 2.0	--	+ 12.8
Residential building materials — (1961=100) — Matériaux de construction résidentielle	162.5	161.1	149.6	148.4	+ 0.9	+ 0.8	+ 8.6
Non-residential building materials — (1961=100) — Matériaux de construction non résidentielle	143.0	142.5	135.8	135.0	+ 0.4	+ 0.6	+ 5.3
Consumer price indexes — (1961=100) — Indices des prix à la consommation							
All-items — Tous les éléments	141.3	140.2	135.0	134.1	+ 0.8	+ 0.7	+ 4.7
Food — Alimentation	145.7	142.5	135.9	133.3	+ 2.2	+ 2.0	+ 7.2
Housing — Habitation	143.8	143.3	137.5	137.1	+ 0.3	+ 0.3	+ 4.6
Clothing — Habillement	131.3	131.6	128.8	129.1	- 0.2	- 0.2	+ 1.9
Transportation — Transports	134.3	133.6	130.7	130.1	+ 0.5	+ 0.5	+ 2.8
Health and personal care — Soins personnels et de santé	150.0	149.1	142.5	142.2	+ 0.6	+ 0.2	+ 5.3
Recreation and reading — Loisirs et lectures	140.5	139.4	135.8	135.5	+ 0.8	+ 0.2	+ 3.5
Tobacco and alcohol — Tabacs et alcools	132.9	132.8	129.6	128.7	+ 0.1	+ 0.7	+ 2.5
Security price indexes — (1961=100) — Indices des cours des valeurs mobilières							
Investors index — Total — Indices des portefeuillistes	182.2	172.4	148.2	150.0	+ 5.7	- 1.2	+ 22.9
Industrial — Total — Industriels	188.8	177.5	151.0	153.0	+ 6.4	- 1.3	+ 25.0
Industrial mines — Mines industrielles	123.9	116.7	120.3	130.0	+ 6.2	- 7.5	+ 3.0
Foods — Aliments	150.8	140.8	131.6	133.3	+ 7.1	- 1.3	+ 14.6
Beverages — Boissons gazeuses	252.5	241.2	190.4	190.6	+ 4.7	- 0.1	+ 32.6
Textiles and clothing — Textiles et vêtements	184.5	186.5	112.8	115.2	- 1.1	- 2.1	+ 63.6
Pulp and paper — Pâte et papier	110.3	102.2	92.2	92.4	+ 7.9	- 0.2	+ 19.6
Printing and publishing — Impression et édition	360.5	334.3	249.0	256.7	+ 7.8	- 3.0	+ 44.8
Primary metals — Métaux primaires	113.7	106.6	90.8	95.0	+ 6.7	- 4.6	+ 25.2
Metal fabricating — Fabrications des métaux	201.0	185.2	161.2	160.0	+ 8.5	+ 0.8	+ 24.7
Non-metallic minerals — Minéraux non métalliques	175.7	174.8	140.4	141.4	+ 0.5	- 0.7	+ 25.1
Petroleum — Pétrole	311.5	293.2	231.4	222.2	+ 6.2	+ 4.1	+ 34.6
Chemicals — Produits chimiques	115.5	111.7	93.5	94.2	+ 3.4	- 0.7	+ 23.5
Construction — Construction	112.9	107.6	62.2	62.9	+ 4.9	- 1.1	+ 81.5
Retail trade — Commerce de détail	172.2	162.1	132.3	132.8	+ 6.2	- 0.4	+ 30.2
Utilities — Total — Services publics	157.1	154.4	145.8	147.9	+ 1.7	+ 1.4	+ 7.8
Pipeline — Pipe-line	188.7	186.4	168.8	167.6	+ 1.2	+ 0.7	+ 11.8
Transportation — Transport	317.1	312.2	247.3	249.8	+ 1.6	- 1.0	+ 28.2
Telephone — Téléphone	90.0	87.5	93.2	94.9	+ 2.9	- 1.8	- 3.4
Electric power — Énergie électrique	124.1	122.9	116.6	119.3	+ 1.0	- 2.3	+ 6.4
Gas distribution — Distribution du gaz	190.5	186.2	218.8	227.2	+ 2.3	- 3.7	- 12.9
Finance — Total — Finances	187.8	175.1	140.8	141.2	+ 7.3	- 0.3	+ 33.4
Banks — Banques	218.0	204.2	164.4	164.1	+ 6.8	+ 0.2	+ 32.6
Investment and loan — Placements et prêts	142.0	130.6	104.4	106.3	+ 8.7	- 1.8	+ 36.0
Mining stocks — Actions minier							
General index — Indice général	116.3	115.9	107.1	109.8	+ 0.3	- 2.5	+ 8.6
Gold — Or	126.0	129.0	101.3	101.4	- 2.3	- 0.1	+ 24.4
Base metals — Métaux communs	112.0	109.7	111.2	115.4	+ 2.1	- 3.6	+ 0.7
Supplementary indexes — Indices supplémentaires							
Uranium — L'uranium	187.2	186.4	144.0	146.9	+ 0.4	- 2.0	+ 30.0
Primary oils and gas — Pétrole et gaz primaires	537.9	505.2	480.7	476.8	+ 6.5	+ 0.8	+ 11.9

- 1) Gross weighted, including inter-industry shipments. For explanation see page 79. — Indice pondéré brut comprenant les livraisons inter-industrielles.
Pour toute explication, voir page 79.
- 2) Indexes for 1972 are subject to revision. — Les indices pour 1972 sont sujets à révision.
- 3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1971 are subject to revision. See notes page 80 for details of Western grain prices. — La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1971 sont sujets à révision. Voir les renvois de la page 80 pour les prix détaillés des grains de l'Ouest.

TABLE 2. INDUSTRY SELLING PRICE INDEXES BY INDUSTRY AND SELECTED COMMODITIES
TABLEAU 2. INDICE DES PRIX DE VENTE DANS L'INDUSTRIE PAR INDUSTRIE ET PAR CERTAINS PRODUITS
1961=100

Industries and selected commodities(1) Industrie et certains produits(1)		Month - Mensuel												Annual Annuel
		J	F	M	A	M	J	J	A	S	O	N	D
